INTRODUCTION 7

Part One THE BASICS OF PERSPECTIVE

One:

HOW WE SEE 10

Light 11

Cone of Vision 14

Viewing Distance 16

Two:

PERSPECTIVE TOOLS 18

Picture Plane 19

Station Point 22

Eye Level 24

Vanishing Points 28

Three:

THREE-DIMENSIONAL FORMS 32

Perspective Systems 33

Shadow Projection 36

Part Two

PUTTING PERSPECTIVE TO WORK

Four:

LANDSCAPES 42

Low Eye Level 43

High Eye Level 50

Medium Eye Level 54

Multiple Vanishing Points 58

Combining Elements 62

Inclined Planes 66

A View in One-Point Perspective 70

A Distant Subject 74

A Close Subject 78

Two-Point Interior with Sunlight 82

Nonlinear Perspective 86

Five:

STILL LIFE 90

Objects Placed at Different Angles 91

The Circle in Perspective 92

Artificial Light 94

Inclined Planes 95

Simple Forms with Single Light Source 96

Varied Objects with Inclined Planes 100

Light and Shadow Patterns 104

Six:

FIGURE 108

The Figure as Geometric Forms 109

Light and Shadow 112

Seated Figure 114

Standing Figure 118

Recumbent Nude 122

Seven:

SHORTCUTS AND HELPFUL HINTS 126

Diagonals 127

Vertical Reference Line 129

Special Vanishing Points 129

Ground Line and Measuring Point
for Single Surfaces 130

Ground Line and Measuring Point
for Complete Objects 131

Boxing-In Forms 133

Reflections 134

Eight:

MECHANICAL SYSTEMS 135

One-Point "Office Method" Plan Projection 136

Two-Point "Office Method" Plan Projection 138

Two-Point Ground-Line Projection 140

BIBLIOGRAPHY 142
