

## LITERATURA

1. **Bachman, D. L. – Albert, M. L.:** The cerebral organization of language. In: Peters, Jones (edits): Cerebral cortex, vol. 9. Plenum publishing corp., 1991, s. 213 - 262.
2. **Benson, F. D.:** Classical syndromes of aphasia. In: Boller, Grafman (edits): Handbook of neuropsychology, vol. 1. Elsevier, 1988, s. 267 - 280.
3. **Bisiach, E. – Vallar, G.:** Hemineglect in humans. In: Boller, Grafman (edits): Handbook of neuropsychology, vol. 1. Elsevier, 1988, s. 195 - 222.
4. **Bryden, M. P.:** Cerebral specialization: Clinical and experimental assessment. In: Boller, Grafman (edits): Handbook of neuropsychology, vol. 1. Elsevier, 1988, s. 143 - 159.
5. **Byrne, H. J.:** Cellular analysis of associative learning. Physiological reviews, vol. 67, 1987, 2, s. 329 - 439.
6. **Damasio, A. R. – Tranel, D. – Damasio, H.:** Face agnosia and the neural substrates of memory. Annu. rev. Neurosci., 13, 1990, s. 89 - 109.
7. **Druga, R. – Petrovický, P.:** Anatomie centrálního nervového systému. SPN, Praha, 1989.
8. **Gaisler, J.:** Úvod do etologie. SPN, Praha, 1989.
9. **Guyton, A. C.:** Textbook of medical physiology. W. B. Saunders, 1986.
10. **Horel, J. A.:** Limbic neocortical interrelations. Comparative primate biology, vol. 4: Neurosciences. Alan R. Liss, 1988, s. 81 - 97.
11. **Jánský, L. – Novotný, I.:** Fyziologie živočichů a člověka. Avicenum, Praha, 1981.
12. **Kandel, E. R.:** Cellular mechanisms of learning and the biological basis of individuality. In: Kandel, Schwartz (edits): Principles of neural science. Elsevier, 1985, s. 816 - 833.
13. **Kelly, D. D.:** Sleep and dreaming. In: Kandel, Schwartz (edits): Principles of neural science. Elsevier, 1985, s. 648 - 658.
14. **Kolb, B. – Wishaw, I. Q.:** Fundamentals of human neuropsychology. W. H. Freeman, 1990.
15. **Kupfermann, I.:** Genetic determinants of behavior. In: Kandel, Schwartz (edits): Principles of neural science. Elsevier, 1985, s. 795 - 803.
16. **Kupfermann, I.:** Hemispheric asymmetries and the cortical localization of higher cognitive and affective functions. In: Kandel, Schwartz (edits): Principles of neural science. Elsevier, 1985, s. 673 - 687.
17. **Kupfermann, I.:** Hypothalamus and limbic system I: Peptidergic neurons, homeostasis and emotional behavior. In: Kandel, Schwartz (edits): Principles of neural science. Elsevier, 1985, s. 611 - 625.
18. **Kupfermann, I.:** Hypothalamus and limbic system II: Motivation. In: Kandel, Schwartz (edits): Principles of neural science. Elsevier, 1985, s. 626 - 635.
19. **Kupfermann, I.:** Learning. In: Kandel, Schwartz (edits): Principles of neural science. Elsevier, 1985, s. 805 - 815.
20. **Mayeux, R. – Kandel, E. R.:** Natural language, disorders of language, and other localizable disorders of cognitive functioning. In: Kandel, Schwartz (edits): Principles of neural science. Elsevier, 1985, s. 688 - 703.
21. **Petit, T. L. – Markus, E. J.:** The cellular basis of learning and memory: The anatomical sequel to neuronal use. Neuroplasticity, learning, and memory. Alan R. Liss, 1987, s. 87 - 124.
22. **Posner, M. I. – Petersen, S. E.:** The attention system of the human brain. Annu. rev. neurosci., 13, 1990, s. 25 - 42.
23. **Sedláková, M.:** Úvod do studia obecné psychologie. SPN, Praha, 1982.
24. **Siegel, J. M.:** Mechanisms of sleep control. Journal of clinical neurophysiology, 7, 1990, s. 49 - 65.
25. **Yin, T. C. T. – Medjbeur, S.:** Cortical association areas and visual attention. Comparative primate biology, vol. 4: Neurosciences. Alan R. Liss, 1988, s. 393 - 419.
