
LITERATURE

Many practical textbooks of various extent dealing with **medical terminology** are available: unfortunately, their concern concentrates on *English* terminology.

Several sophisticated manuals of **Latin** exist (attracting even the autodidacts) - unfortunately preferring Ceasar's *swords* to the *ensiform process*...

The short bibliography below only lists the titles which might be disposeable for inquisitive English speaking students of medicine who communicate in the Czech area.

Betts, G.: Latin. A complete course. (Teach yourself books) Sevenoaks (GB), Hodder and Stoughton Educational 1986. - ISBN 0 340 38481 6
