

## CONTENTS

<b>Preface (K. Bouzek) .....</b>	7
<b>General information .....</b>	8
<b>Part I</b>	
<b>FINAL PROGRAMME</b>	
 <b>Final Programme .....</b>	12
<b>Part II</b>	
<b>INVITED LECTURES</b>	
 <b>Fuel Cells and Hydrogen – What can they contribute to our energy future?</b>	
Robert Steinberger-Wilckens (University of Birmingham, United Kingdom) .....	18
 <b>The Fuel Cells and Hydrogen Joint Undertaking: Towards the deployment of fuel cells and hydrogen</b>	
Bert de Colvenaer (Executive Director, Fuel Cells and Hydrogen Joint Undertaking, Belgium) .....	19
 <b>Examples of national/local network building around FCEV and HRS roll out in the EU</b>	
Marieke Reijalt (Executive Director, European Hydrogen Association, Belgium) .....	20
 <b>German energy revolution – recent development and major challenges</b>	
Henry Bergmann (Anhalt University of Applied Sciences, Köthen, Germany) .....	21
 <b>Towards sustainable mobility – Why hydrogen is the most promising option</b>	
Thomas von Unwerth (Technische Universität Chemnitz, Germany) .....	22
 <b>PEM fuel cells and electrolyzers: potential and routes for improvement of the technology</b>	
Francois Lapicque (CNRS, Nancy, France) .....	23
 <b>Composite membranes for high temperature PEM fuel cells: from single cells to stack</b>	
M. A. Rodrigo, J. Lobato, P. Cañizares, F. J. Pinar, H. Zamora and D. Úbeda (University of Castilla-La Mancha, Ciudad Real, Spain) .....	24
 <b>Carbon and sulfur tolerant anodes for SOFCs</b>	
M. Athanasiou, D. K. Niakolas, S. G. Neophytides (FORTH/ICE-HT, Patras, Greece) .....	25

**Part III****ORAL PRESENTATIONS**

<b>The Laboratory of Hydrogen Technology: A new key part of Technological centre for research of renewable sources and accumulation of electric power.</b> D. Minarik (VSB – Technical university of Ostrava, ENET – Centre of Energy Units for Utilization of non Traditional Energy Sources, Czech Republic) .....	28
<b>Fifteen years of research and development in the field of hydrogen technologies at the Institute of Chemical Technology Prague</b> K. Bouzek, M. Paidar, R. Kodým, J. Hnát (Department of Inorganic Technology, Institute of Chemical Technology Prague, Czech Republic) .....	29
<b>The history of the Fuel Cell drive Technology at Daimler AG</b> E. Haner, A. Talke (Daimler AG, Germany) .....	30
<b>Hydrogen Technologies for Energy Storage Applications</b> A. Doucek, J. Čermáková, L. Polák (ÚJV Řež, plc., Department of Hydrogen Technologies, Czech Republic) .....	31
<b>Influence of PBI membrane type and doping time on the high temperature PEM fuel cell performance</b> M. Paidar, A. Giurg, P. Mazúr, K. Bouzek (Institute of Chemical Technology Prague, Department of Inorganic Technology, Czech Republic) .....	32
<b>Low Pt thin film catalysts for PEM fuel cell technology</b> V. Matolín, R. Fiala, M. Václavů, J. Lavková, I. Matolínová (Charles University in Prague, Faculty of Mathematics and Physics, Czech Republic) .....	33
<b>Relation between activation losses and membrane efficiency in the fuel cell operation</b> F. Maršík, P. Novotný (University of West Bohemia, New Technologies – Research Centre, Czech Republic) .....	34
<b>Optimisation of an Anode for the PEM Water Electrolysers</b> J. Polonský, M. Paidar, K. Bouzek (Institute of Chemical Technology Prague, Department of Inorganic Technology, Czech Republic) .....	35
<b>Alkaline water electrolysis with solid polymer electrolyte</b> J. Hnát, J. Schauer, J. Žitka, M. Paidar, K. Bouzek (Institute of Chemical Technology, Prague, Dept. of Inorganic Technology, Czech Republic) .....	36
<b>Hydrogen production from lignite liquefaction applying nuclear co-generation</b> K. Stehlík, F. Wertz, L. Karásková-Nenadálová, J. Vit, K. Vonková (Research Center Rez, Czech Republic) .....	37

<b>Fluidized bed gasification of biomass: the yield of hydrogen under different operating conditions.</b>	
M. Jeremiáš, M. Pohorelý, K. Svoboda, S. Skoblia, Z. Beňo, P. Kameníková, T. Durda (Institute of Chemical Process Fundamentals, Academy of Science of the Czech Republic) .....	38
<b>The effect of power cycles architectures at hydrogen production plants</b>	
P. Hajek (ÚJV Řež, a. s., Czech Republic) .....	39
<b>Power Flow Problem in a Smart Grid with Hydrogen Storage Systems</b>	
M. Morte (ÚJV Řež, a. s., Czech Republic) .....	40
<b>Solid Oxide Steam Electrolysis – activities recently going on at ICT Prague</b>	
F. Karas, M. Paidar, K. Bouzek (Institute of Chemical Technology, Prague, Dept. of Inorganic Technology, Czech Republic) .....	41
<b>Development of mathematical modelling tool for analysis and optimization of the High Temperature Solid Oxide Steam Electrolysis process</b>	
R. Kodým, F. Karas, M. Paidar, K. Bouzek (Institute of Chemical Technology, Prague, Dep. Of Inorganic Technology, Czech Republic) .....	42
 <b>Part IV</b>	
<b>POSTER PRESENTATIONS</b>	
<b>Mathematical modelling – powerful tool for understanding of degradation mechanisms in PEM type fuel cell</b>	
M. Drakselová, R. Kodým, S. Sunde, K. Bouzek (Institute of Chemical Technology Prague, Department of Inorganic Technology, Czech Republic) .....	44
<b>Phosphorus electrochemistry on Pt electrode: a key to better understanding of high temperature PEM fuel cells containing H<sub>3</sub>PO<sub>4</sub></b>	
T. Bystróň, M. Prokop, K. Bouzek (Institute of Chemical Technology Prague, Department of Inorganic Technology, Czech Republic) .....	45
<b>Preparation of Pt based catalytic layer on the rotating electrode surface for catalyst characterisation in H<sub>3</sub>PO<sub>4</sub> at elevated temperatures</b>	
M. Prokop, M. Paidar, T. Bystróň, K. Bouzek (Institute of Chemical Technology Prague, Dept. of Inorganic Technology, Czech Republic) .....	46
<b>Stability of Nafion® membrane at elevated temperature and pressure</b>	
J. Mališ, M. Paidar, K. Bouzek (Institute of Chemical Technology Prague, Department of Inorganic Technology, Technická 5, Czech Republic) .....	47

<b>Alkaline water electrolysis with cation-selective membrane</b>	
K. Vazač, M. Paidar, M. Roubalík, K. Bouzek (Institute of Chemical Technology, Prague, Dept. of Inorganic Technology, Czech Republic) .....	48
<b>Concept of zero-gap of alkaline water electrolysis</b>	
J. Čermáková, A. Doucek, P. Hájek (UJV Rež, a. s., Hydrogen Technologies Department, Czech Republic) .....	49
<b>Synthesis and characterization of NiFe<sub>2</sub>O<sub>4</sub> electrocatalyst and preparation of MEA (membrane electrode assembly) using different binders in gas diffusion electrodes for the hydrogen evolution in alkaline water electrolysis</b>	
D. Chanda, J. Hnát, M. Paidar, K. Bouzek (Department of Inorganic Technology, Institute of Chemical Technology Prague, Czech Republic) .....	50
<b>Hydrogen production via HTSE based on electrolyte-supported solid oxide electrolysis cells</b>	
L. Polák, A. Doucek, J. Čermáková (ÚJV Řež, plc., Department of Hydrogen Technologies, Czech Republic) .....	51
<b>Thin films of WO<sub>3</sub> prepared by magnetron sputtering deposition</b>	
M. Brunclíková, M. Zlámal, P. Kšírová, Š. Kment, Z. Hubička, J. Krýsa (Institute of Chemical Technology, Prague, Dep. Of Inorganic Technology, Czech Republic) .....	52
<b>Membrane separation of hydrogen</b>	
V. Martin-Gil, V. Fíla (Institute of Chemical Technology, Prague, Dep. of Inorganic Technology, Czech Republic) .....	53
<b>Part V</b>	
<b>LIST OF PARTICIPANTS</b>	
List of participants .....	56
<b>Part VI</b>	
<b>AUTHOR INDEX</b>	
Author index .....	60
