

Content

Preface	7
Chapter 1 Body composition. Models of body composition	9
Chapter 2 Body composition variation	16
Chapter 3 Introduction to body composition methodology / methods	25
3.1 Hydrodensitometry	26
3.2 Dual-energy X-ray absorptiometry (DEXA)	37
3.3 Anthropometric methods. Calliper measurements	44
3.4 Bioelectrical impedance analysis method (BIA)	49
Chapter 4 Body composition as a determinant of fitness and sport performance	62
Chapter 5 Body composition of elite female volleyball players	66
Chapter 6 Body composition of elite female handball players	83
Chapter 7 Body composition of elite female basketball players	95
Chapter 8 Body composition of high elite women sport games players	105
Chapter 9 Body composition optimization in multi discipline sports	120
Chapter 10 Body composition of elite judo athletes	129
Chapter 11 Conclusion	145
Acronyms	150
References	153
