| | Acknowledgements | V |
| | Outline of Contents | VII |
| | Contents | IX |
| | Boxes | XIX |
| | Tables | XXI |
| | Figures | XXII |
| | Acronyms and abbreviations | XXIV |
| A | Summary for Policymakers | 1 |
| B | Introduction: Humanity reconstructs the biosphere <i>or</i> The three pillars of folly | 7 |
| C | The biosphere at the centre of the people-environment relationship | 13 |
| C 1 | Trends of global change in the biosphere | 15 |
| C 2 | Impact loops as core elements of syndromes | 27 |
| D | Genetic diversity and species diversity | 29 |
| D 1 | The use of genetic and species diversity as illustrated by the higher plants | 31 |
| D 2 | Ecological functions of species | 43 |
| D 3 | Focal issues | 52 |
| E | Diversity of landscapes and ecosystems | 87 |
| E 1 | Natural and cultivated landscapes | 89 |
| E 2 | Development of landscapes under human influence | 93 |
| E 3 | Focal issues | 112 |
| F | The biosphere in the Earth System | 207 |
| F 1 | From Biosphere I to Biosphere III | 209 |
| F 2 | The global climate between forest and desert – two extreme scenarios | 216 |
| F 3 | The biosphere in global transition | 224 |
| F 4 | Human-induced climate change: consequences for ecosystems and species | 231 |
| F 5 | Critical elements of the biosphere in the Earth System | 238 |
| G | Biosphere-anthroposphere linkages: The Overexploitation Syndrome | 247 |
| G 1 | 'Overexploitation' as a syndrome of global change | 249 |
| G 2 | The mechanism of the Overexploitation Syndrome | 254 |
| G 3 | Disposition of forest ecosystems to the Overexploitation Syndrome | 262 |

| | | |
|-----|--|-----|
| G 4 | Intensity of the Overexploitation Syndrome | 265 |
| G 5 | Political implications of the syndrome analysis | 270 |
| H | Valuing the biosphere: An ethical and economic perspective | 273 |
| H 1 | The fundamental issue | 275 |
| H 2 | Ethical fundamentals | 277 |
| H 3 | Fundamentals of environmental ethics | 279 |
| H 4 | Special principles and standards for the use of the biosphere | 281 |
| H 5 | Economic valuation of biosphere services | 284 |
| H 6 | The ethics of conducting negotiations | 294 |
| H 7 | Conclusions for biosphere conservation | 297 |
| I | Global biosphere policy | 299 |
| I 1 | A guard rail strategy for biosphere conservation and management | 301 |
| I 2 | Elements of a global biosphere policy | 308 |
| I 3 | The Convention on Biological Diversity: implementation, interlinkage and financing | 334 |
| J | Research strategy for the biosphere | 359 |
| J 1 | Research on the five biological imperatives | 362 |
| J 2 | Methods and instruments | 370 |
| J 3 | Basic biosphere research | 372 |
| K | Recommendations for action for a sustainable biosphere policy | 377 |
| K 1 | The foundations of a strategy for action | 379 |
| K 2 | Focal areas of implementation | 381 |
| K 3 | Funding and international cooperation | 392 |
| L | References | 395 |
| M | Glossary | 429 |
| N | The German Advisory Council on Global Change | 437 |
| O | Index | 441 |
