

# Contents

		Page
Chapter	<b>1</b>	<b>QUANTITIES AND UNITS</b> . . . . . 1
		Introduction. Systems of measurement. International system of units. Temperature. Other temperature scales.
Chapter	<b>2</b>	<b>ATOMIC WEIGHTS, MOLECULAR WEIGHTS, AND MOLES</b> . . . . . 14
		Atoms. Nuclei. Relative atomic weights. Mole. Symbols, formulas, formula weights. Molecular formulas, molecular weights.
Chapter	<b>3</b>	<b>FORMULAS AND COMPOSITION CALCULATIONS</b> . . . . . 23
		Empirical formula from composition. Composition from formula. Nonstoichiometric factors. Molecular mass numbers and chemical formulas.
Chapter	<b>4</b>	<b>CALCULATIONS FROM CHEMICAL EQUATIONS</b> . . . . . 39
		Introduction. Molecular relations from equations. Mass relations from equations.
Chapter	<b>5</b>	<b>MEASUREMENT OF GASES</b> . . . . . 51
		Gas volumes. Pressure. Standard atmospheric pressure. Standard conditions (S.T.P.). Gas laws. Boyle's law. Charles' law. Gay-Lussac's law. Combined gas law. Density of an ideal gas. Dalton's law of partial pressures. Collecting gases over a liquid. Deviations from ideal behavior.
Chapter	<b>6</b>	<b>KINETIC THEORY AND MOLECULAR WEIGHTS OF GASES</b> . . . . . 60
		Avogadro's hypothesis. Molar volume. Ideal gas law. Gas volume relations from equations. Basic assumptions of the kinetic theory of gases. Predictions of the kinetic theory.
Chapter	<b>7</b>	<b>THERMOCHEMISTRY</b> . . . . . 74
		Heat. Heat capacity. Law of Dulong and Petit. Calorimetry. Energy and enthalpy. Enthalpy changes for various processes. Rules of thermochemistry.
Chapter	<b>8</b>	<b>ATOMIC STRUCTURE AND THE PERIODIC LAW</b> . . . . . 86
		Absorption and emission of light. Interaction of light with matter. Particles and waves. The Pauli principle and the periodic law. Atomic radii. Ionization potentials. Electron affinity. Magnetic properties.
Chapter	<b>9</b>	<b>CHEMICAL BONDING AND MOLECULAR STRUCTURE</b> . . . . . 100
		Ionic valence. Covalence. Valence-bond representation. Molecular-orbital representation. Shapes of molecules. Coordinate covalence and coordination compounds. Isomerism.
Chapter	<b>10</b>	<b>THE SOLID STATE</b> . . . . . 133
		Crystals. Crystal forces.
Chapter	<b>11</b>	<b>OXIDATION-REDUCTION</b> . . . . . 144
		Oxidation-reduction reactions. Oxidation state. Ionic notation for equations. Balancing oxidation-reduction equations.

## CONTENTS

Chapter	12	<b>CONCENTRATIONS OF SOLUTIONS</b> ..... Solute and solvent. Concentrations expressed in physical units. Concentrations expressed in chemical units. Comparison of the concentration scales. Summary of concentration units. Dilution problems.	157
<hr/>			
Chapter	13	<b>REACTIONS INVOLVING STANDARD SOLUTIONS</b> ..... Advantages of volumetric standard solutions.	170
<hr/>			
Chapter	14	<b>PROPERTIES OF SOLUTIONS</b> ..... Introduction. Vapor pressure. Freezing-point lowering, $\Delta T_f$ . Boiling-point elevation, $\Delta T_b$ . Osmotic pressure. Deviations from laws of dilute solutions. Solutions of gases in liquids. Law of distribution.	177
<hr/>			
Chapter	15	<b>THERMODYNAMICS AND CHEMICAL EQUILIBRIUM</b> ..... The first law. The second law. The third law. Standard states and reference tables. Chemical equilibrium. The equilibrium constant. Le Chatelier's principle.	188
<hr/>			
Chapter	16	<b>ACIDS AND BASES</b> ..... Acids and bases. Ionization of water. Hydrolysis. Buffer solutions and indicators. Weak polyprotic (polybasic) acids. Apparent equilibrium constants. Titration.	209
<hr/>			
Chapter	17	<b>EQUILIBRIA OF COORDINATION COMPLEXES; SOLUBILITY PRODUCT AND PRECIPITATION</b> ..... Coordination complexes. Solubility product. Applications of solubility product to precipitation.	240
<hr/>			
Chapter	18	<b>ELECTROCHEMISTRY</b> ..... Electrical units. Faraday's laws of electrolysis. Galvanic cells. Standard half-cell potentials. Combination of couples. Free energy, nonstandard potentials, and the direction of oxidation-reduction reactions. Use of $E^{\circ}$ -values.	254
<hr/>			
Chapter	19	<b>RATES OF REACTIONS</b> ..... Rate constants and the order of reactions. First-order reactions. Energy of activation. Mechanism of reactions.	272
<hr/>			
Chapter	20	<b>NUCLEAR CHEMISTRY AND RADIOCHEMISTRY</b> ..... Fundamental particles. Binding energies. Nuclear equations. Radiochemistry.	285
<hr/>			
Appendix	A	<b>EXPONENTS</b> .....	297
Appendix	B	<b>SIGNIFICANT FIGURES</b> .....	299
Appendix	C	<b>LOGARITHMS</b> .....	301
Appendix	D	<b>FOUR-PLACE LOGARITHMS</b> .....	306
<hr/>			
INDEX .....			310
TABLE OF ATOMIC WEIGHTS .....			314
