

Content

| | |
|---|----|
| Comparison of German and Czech energetic sector in the field of RES Viktor Majer, Wolfgang Schufft | 5 |
| Integration of renewable energies in the development of modern transport infrastructure Sindy Röhlig, Eberhard Schröter | 11 |
| Economic efficiency of renewable energy sources Alexander Mészáros | 15 |
| Vision of the project Desertec Marek Pavlík, Ján Zbojovský, Martin German-Sobek, Marián Hrinko | 19 |
| Possibilities of using solar energy Roman Jakubčák, Stanislav Kušnír, Matúš Katin | 23 |
| New trends in photovoltaic Martin German-Sobek, Jozef Király, Matúš Novák, Marián Hrinko | 27 |
| Some results from research and development of thin-film photovoltaic cells Hana Benešová, Jan Škorpil | 32 |
| Residual heat utilization of photovoltaic cells Dušan Medved' | 36 |
| Fire risks of photovoltaic systems Milan Bělík | 40 |
| Simplified assessment of connectivity of photovoltaic power plants in the low voltage networks Daniel Kouba | 44 |
| Voltage control of distribution networks with photovoltaic power sources Jan Veleba | 49 |
| Influence of photovoltaic power system on environment in the Czech Republic Lenka Raková, Jan Škorpil | 63 |
| Impact of the renewable energy sources on long-term dynamic in the Slovak power system Pavol Hocko, Jaroslav Petráš, Matúš Novák, Ján Zbojovský | 68 |
| Operation of distributed energy sources Marek Hvizdoš, Ján Tkáč | 75 |

| | |
|--|-----|
| Models of renewable energy sources for grid analysis | |
| Matúš Novák, Pavol Hocko, Martin German-Sobek, Marián Hrinko | 79 |
| Simulation of non-linear load | |
| Vladislav Sítař | 83 |
| Network configuration impact on during-fault voltage in distribution systems | |
| Miloslava Tesařová | 89 |
| Possibilities of power flows control | |
| Stanislav Kušnír, Roman Jakubčák, Pavol Hocko | 94 |
| Operation of hydropower plants in Slovakia | |
| Ján Zbojovský, Pavol Hocko, Marek Pavlík, Jozef Király | 99 |
| Biomass usage in CHP units | |
| Jozef Király, Martin German-Sobek, Ján Zbojovský, Marek Pavlík | 103 |
| New method for preparation of nanomaterial powders | |
| David Rieger | 107 |
| Simulation of electrical lines with distributed parameters in the program Dynast | |
| Vladislav Sítař | 111 |
| Induced losses in linear equipment buried near an overhead power line | |
| Lenka Šroubová, Roman Hamar, Petr Kropík | 117 |
| Computer simulation of induction crucible furnace with supplementary construction element | |
| Oldřich Kroupa | 125 |
| Appendix – Photogallery | 131 |
