13 Printing a Document	191	251	Picture Frames	
Understanding printing	191	105	Understanding frames	217
Printing the current document	191	100 Barris	Creating a frame	217
To print a document	191	251	To create a frame manually	218
Printing in the background	194	252	To create a frame of a desired size and position	219
To print in the background	195	252	Selecting one or more frames	219
Selecting a printer for a document	196	264	To select a frame	219
To select a printer	196	255	To select a layered frame	220
Printing in landscape mode	197	255	To select multiple frames	220
To change the page layout	198	256	To deselect a frame	221
To change the printer setup	198	256	Editing a frame	221
To change the paragraph style	199	257	To move a frame on the same page	222
Examples of printing in landscape mode	199	257	To copy a frame on the same page	222
Printing an envelope	200	258	To move or copy a frame to another page	223
To print an envelope	200	862	To size a frame	223
Understanding printer fonts	202	ocs	To delete a frame	223
Printing pictures	202	258	Grouping frames	224
	200	259	To group frames	224
14 Using Headers and Footers for Repetitive	205	260	Using layered frames	225
Text and Page Numbers		261	To change the order of layered frames	225
Understanding beaders and footors	205	261	elder a di noi Using text in a frame	226
Uning a fixed based on the text	205	261	To move the insertion point inside a frame	226
Using a fixed header or footer	205	192	To move the insertion point outside a frame	226
To create an alternating fixed header or factor	206	262	Using Modify Frame Layout	226
To create an alternating fixed header or footer	200	262	To modify frame layout	227
lloing a flacting baseder or factor	200	262	To modify the type of frame	227
To greate a floating header or footer	208	264	To modify the size or position of a frame	230
To create an oldernating fleating beader or fector	209	206	To modify frame lines and shadows	231
To go to a floating header or footer mark	210	200	To modify frame columns	233
To remove a floating header or footer	211	002	To modify frame tabs	234
ro remove a noaring neader of totel	211			

Examples of frame layout options	237	286	To delete a picture in a cell opposed	267
Example of multiple page layouts on a single page	242	286	lo delete a table	207
Understanding graphics	243	287	Modifying a table	207
op Using a picture in a frame wate of	245	288	To modify table layout	268
To import a picture	246	228	To disable Automatic row height	268
To specify Computer Graphics Metafile options	247	289	To use Honor protection	260
To specify Hewlett-Packard Graphics Language	248	289	To modily lines and color	270
tile options	185	290	To delete a column or row	270
To paste a picture from another Windows application	249	290	To medify column and row sizes	271
To delete a picture inside a frame	249	290	To connect cells	273
Examples of creating picture frames	249	291	To create a heading	273
16 Using Tables for Columnar Text, Data	251	102	To create leaders	274
and Pictures	231	292	To protect cells	274
and Fictures		292	To unprotect cells	275
Understanding Tables	251	292	Examples of tables	275
Creating a table	252	292	Understanding cell addresses	276
To create a table	252	293		277
Placing information into a table	254	293	Te create or edit a formula	277
To type text into a table	255	293	To create of edit a formula	278
To type numeric data into a table	255	294	To use Quick Add	270
To paste data into a table	256	294	nopylog Using footnotes in a table	279
To paste link data into a table	256	295	To type footnotes into a table	070
To insert data from another application	257	295	Using tabs in a table	219
To import a picture into a table cell	257	296	Using a page break in a table	280
To create a drawing in a table cell	258	296	To insert a page break any shaded	280
To create a chart in a table cell	258	297	To remove a page break	280
To create an equation in a table cell	258	297	Sorting data in a table	280
Moving around in a table	258	298	Using a table for merge	281
Selecting cells in a table	259	298	beido ne lo me To use a table as a merge data file	281
To select one or more columns or rows	260	299	Using table data to create a chart	281
To select an entire table	261	1.000	Creating a form	282
Modifying the appearance of information in a table	261	685	To create the table for the form	282
To apply text formatting and text enhancements	261	300	To protect cells containing label text	283
To modify a paragraph style	261	300	To print a form without printing label text	283
Editing a table	262	301	To save the form for future use	284
To undo an action	262	301	To align objects for the grid envow	0.05
To move or copy selected data	262	301	17 Enhancing a Document with Drawings	285
To use Drag & Drop to move or copy columns or rows	264	301	Understanding Drawing	285
To move or copy a table	266	302	Accessing Draw mode	286
To delete selected data	266	302	etxanopies o forawingsisting of	
To delete extra spaces and lines within the cells	266			

Using the draw icons	286		Importing a drawing	304
To use the draw object icons	286		vision of the music To import a drawing	305
To use the draw command icons	287		Saving a drawing or an object as a graphic file	305
Creating a drawing addition of the '	288		To save a drawing or an object as a graphic file	305
To create an object	288		Copying a drawing or an object	306
To create a freehand object	289		To copy the entire drawing	306
To create a text object	289		To copy selected objects	306
Selecting objects in a drawing	290		Exiting Draw mode The selected	306
To select an object	290		eosteel a bail adeu txetisteleb ofe	381
To select multiple objects	290		18 Enhancing a Document with Charts	307
To select multiple adjacent objects	291		Understanding Charting	307
To select all objects	291		Creating data for a chart	307
To deselect an object	292		To get or copy existing data	308
Editing a drawing	292		To type data into the charting data dialog box	309
To move an object	292		To edit existing data in the charting data dialog box	309
To copy an object	292		Understanding chart types	311
To size an object	293		Oraction a short	210
To edit a text object	293		Creating a chart	312
To modify the shape of an object	293		To create a charts	315
To create a Bezier curve	294		Examples of charts	210
To modify the shape of a polyline or polygon	294		Setting charting defaults	319
To delete an object	295		To set color defaults	321
To delete a drawing and adds poletion	295		Vileonemul no villo sel color delaulis	021
Grouping objects and appendic pater	296		Editing a chart	323
Using layered objects and the officer of the	296		To delete a chart	323
Modifying an object a submer of	297		To use Drawing to modify a chart	324
To rotate an object and a solution and a solution of the solut	297		Framela of a modified chart	325
To flip an object model dat a pried	298	357	Example of a modified chart	205
To extract the line style & fill pattern of an object	298		Using a chart created in another application	325
To apply the current line style and fill pattern to	299		To import a chart stored as a life	326
an object	261		To paste a chart nom another application	. 020
To modify the current line style and color	299		19 Modifying a Picture	327
To modify the current fill pattern	300		Union Comphing Cooling	207
Using a grid money and a long of	300		Using Graphics Scaling	327
To show or hide the grid	301		To size a picture	200
I o align objects to the grid	301		Moving a picture in a frame	320
Modifying Draw settings	301		To crop a picture	020
To modify the degree and direction of rotation	301		Understanding gray scale images	329
To modify the grid settings	302		Using Image Processing	329
Examples of drawings	302		To enhance a gray scale picture	330
	266		To use halftones	332
				332

20 Finding Information in a Document Quickly	333
Using Go To	333
To use Go To the second of the	333
Using Find & Replace	335
To find and replace text	336
To find and replace a paragraph style	339
Examples of Find & Replace	341
To delete text using Find & Replace	344
To delete tabs using Find & Replace	344
To delete returns usingFind & Replace	345
To use wildcard characters	345
Examples of wild card characters	346
I o use wild card literals	347
Using Bookmarks	347
To add a bookmark	348
To go to the next text bookmark	348
To go to a particular bookmark	349
To remove a bookmark	349
Using Line Numbering	349
l o number lines	349
21 Sorting Data Alphabetically or Numerically	351
Using Sort ablects a bade a pathba	351
To sort data added a steled of the	351
Examples of sorting data	354
22 Importing and Exporting Text and	357
Data Files	
Understanding text and data file filters	357
Using import and export file filters	358
Importing and exporting files	360
To import a text or data file	360
To export a text file	362
Using import and export options	363
To use text file import and export options	363
To use ASCII file import and export options	365
To use data file import options	366
Using the import and export table	367
Construction of the distance of the second se	

23 Using Document Information	375
Using Doc Info	375
To use Doc Info	375
To insert descriptive data into a document	379
24 Tracking Revisions to a Document	381
Using Revision Marking	381
To enable revision marking mode	381
To specify revision marking options	382
To mark text as a revision insertion	384
To implement revisions	384
Comparing Documents	386
To compare two versions of a document	387
Using Notes	388
To insert a note	389
xebol as To display a note	390
anoligo xel To edit a note	390
To remove a note	391
To print notes	391
25 Using Reference Tools	393
Inderstanding reference tools	393
Using Thesaurus release a pathodu	393
To use the thesaurus	393
Using Footnotes	394
To insert a footnote	395
To specify footnote options	395
To go to the next footnote reference number	396
To edit the footnote text	397
To modify the footnote reference numbers	397
To remove a footnote	399
Using Table of Contents	399
To assign TOC levels to heading paragraph styles	399
To create a table of contents entry from selected text	401
To generate a table of contents	402
To modify or remove a TOC entry	403
Using Index	404
To create index entries	405
To create index entries in a separate index list document	407
To ambed #310 Marking Marking and To F children	

To use the index list document	409	475	Editing an OLE object	438
To modify an index	411	470	To edit an OLE object	438
Examples of index entries	412	477	Using Paste Special	439
Ling Closery	414	477	To use Paste Special	439
To groate a glossery	416	678	Examples of Paste Special	441
To create a glossary data file	417	478	00 Mercian Tout and Date	442
To insort a glossary record into a desument	418	678	28 Merging Text and Data	443
Examples of closes ary record into a document	419		Understanding Merge	443
Examples of glossary records	420	479	Isolas Creating a merge data file	443
26 Working with Multiple Documents	421		To create an Ami Pro merge data file	444
Understanding Master Document	421	479	Example of a merge data me	447
Creating a master document	421	480	Creating a merge document	447
To create a master document	421	480	To create a merge document	440
Modifying a master document	422	184	Example of a merge document	450
To modify a master document	422	482	Merging the data	450
Generating a table of contents or an index	121	482	To perform the merge	451
To select table of contents or index ontions	424	483	Assigning an Ami Pro merge data file	453
To generate the table of contents or index	425	484	and Indanasa To assign an Ami Pro merge data file	453
Printing a master document	126	484	Modifying an Ami Pro merge data file	454
To print a master document	426	485	To display records in a merge data file	454
Editing a document included in a master document	420	485	To edit an Ami Pro merge data file	456
To change the numbering in a single document	420	485	To modify fields	457
Indating a master document	427	488	To sort records in a merge data file	459
opuaring a master document	427	488	Creating labels another a meet of	460
27 Working Together: Integrating Ami Pro	429	489	To merge or print Avery labels	460
with Other Applications	420	490	To merge custom labels	402
	357	491	Printing multiple records on a page	463
Using Mail	429	492	To print a list of records	464
To send a message	429	493	Using Merge conditions head of	464
To receive notification of mail	430	499	To use conditions	464
Understanding links	430	490	Examples of Merge conditions	466
Creating a link	431	200	Using different types of data files for a merge	468
To create a link to an Ami Pro document	431	490	To use a table as a merge data file	469
To create a link from an Ami Pro document	432	OON	To use an external data file as a merge data file	469
Example of linking	433	500	To merge with other types of delimited ASCII data files	471
Using Link Options	433	103	Example of an Ami Pro merge data file containing	472
To create or modify a link	434	502	non-comma delimited data	
Creating a macro that uses DDE	435		20 Managing Files	473
Embedding an object	436	503	23 Managing Files	413
To embed new data as an OLE object	436	504	Using File Management	473
To embed existing data as an OLE object	437		To copy or move a file	4/3

Examples of format options	475
To rename a file	476
To delete a file	477
To change file attributes	477
To change the File Management drive or directory	477
To change the file names in the window	478
To view document information	478
To exit File Management	478
30 Using Scientific and Mathematical	470
Equations	415
Understanding Equations	470
Accessing Equation mode	4/9
Accessing Equation mode	480
Using the equation icons	480
To use the equation template icons	481
To use the equation operator icons	482
To use the equation toggle icons	482
To use the equation dialog box icons	483
To use the equation character and symbol icons	484
To use the equation pulldown box icons	484
Creating an equation	485
To create an equation	485
To insert a character or symbol	485
To insert a fraction	488
To insert a radical	488
To insert a superscript	489
To insert a subscript	490
To insert parentheses	491
To insert standard brackets	492
To insert a summation operator	493
To insert an integral operator	494
To insert text ment to aslomex?	495
To show/hide input boxes and matrix lines	495
To insert an operator	496
To insert customized brackets	497
To insert a matrix	499
To insert a function	500
To insert a space	501
To apply an accent, negate mark, and bold to	502
a character	
To insert a label template	503
To insert a bar, an arrow, or a brace	504

	To insert a TeX command	505
	Examples of equations	500
	Moving the insertion point in an equation	508
	To move the insertion point into a template	500
	to move the insertion point between input boxes in	506
	To move the insertion point within an input box	508
	Selecting parts of an equation	500
	Selecting parts of an equation	509
		509
	Editing an equation	509
	To apply a template	510
	To revise a radical	510
	To revise a natrix	511
	To copy or move an equation or part of an equation	512
	To delete the contents of a template	513
	To delete part of an equation	513
	To delete an equation	513
	Modifying the appearance of an equation	514
	To change the limit position and size of an equation	514
	To change the font	515
	To change equation preferences	515
	Modifying equation character and symbol icons	516
	To customize the equation character and symbol icons	517
	Saving as a TeX file	517
	To save an equation as a TeX file	517
	Importing a TeX file	518
	To import an equation	518
	Exiting Equation mode	518
	Disabilities the collectorwood is pathib3	510
	31 Using Macros to Automate Tasks	519
	Understanding Macros	519
	Recording and playing a quick macro	520
	To record a quick macro	520
	To play a quick macro	520
vas b	To assign shortcut keys to a quick macro	521
	To save a quick macro	521
	Example of a quick macro	522
	Ami Pro Help Meous	

Recording and playing a macro	522
To record a new macro	522
To play a macro previously saved to a file	524
Example of a macro	525
Modifying a macro	525
To assign or change shortcut keys	525
To play a macro when you open or close a document	527
To edit a macro me	527
32 Using Power Fields to Automate	529
Document Production	
Understanding power fields	529
Inserting a power field	530
To insert a power field	531
To save a power field you create	532
Understanding syntax conventions	533
To use pre-defined power fields	534
Using formatting options	540
Examples of power fields	542
Displaying power fields	547
To display power fields	547
To go to a power field	548
Printing power fields	548
Updating power fields at a second sec	548
To update a power field	549
To update all power fields	549
To update a power field automatically	549
To lock a power field	549
Editing a power field	550
I o edit a power field from the Insert Power Fields	550
To edit a power field within the document	551
To use Drag & Drop to move or copy a power field	551
To move or copy a power field	552
To delete a power field	553
To delete a power field you created and saved	554
