<i>Introduction</i>	6
<i>General Concepts</i>	7
<i>Brief Hints on Immunology</i>	9
Types of immunity	9
Cells of the immune system	10
Antibodies.....	20
<i>Materia Medica Of Low Dose Cytokines</i>	24
<i>Safety Profile of Treatment by Low Dose Cytokines</i>	26
<i>General Guideline for Usage Of Low Dose Cytokines</i>	28
<i>Single Cytokines Description</i>	30
<i>Interleukin 1</i>	31
<i>Tumor Necrosis Factor α</i>	39
<i>Interleukin 2</i>	45
<i>Interleukin 3</i>	52
<i>Interleukin 4</i>	58
<i>Interleukin 5</i>	63
<i>Interleukin 6</i>	68
<i>Interleukin 7</i>	75
<i>Interleukin 8</i>	81
<i>Interleukin 9</i>	88
<i>Interleukin 10</i>	94
<i>Interleukin 11</i>	102
<i>Interleukin 12</i>	109
<i>Interferon α</i>	117

<i>Interferon γ</i>	127
<i>Summary Outlines</i>	135
Cytokines and immunity	136
Cytokines and inflammation	137
Cytokines and Immunoglobulins	139
Cytokines and viruses	140
Cytokines and cancer	141
<i>Homeostasis - Th1 Th2 balance</i>	142
<i>Diseases presumably correlated with Th1 Hypoactivation</i>	152
TUBERCULOSIS	152
HIV	153
<i>Diseases presumably correlated with Th1 Hyperactivation</i>	155
RHEUMATOID ARTHRITIS	156
MULTIPLE SCLEROSIS	162
TYPE 1 DIABETES.....	166
CROHN'S DISEASE	169
PSORIASIS	173
HASHIMOTO'S THYROIDITIS.....	174
<i>Diseases presumably correlated with Th2 Hyperactivation</i>	179
ALLERGY	180
ASTHMA.....	183
ATOPIC DERMATITIS	185
SJÖGREN'S SYNDROME.....	187
SYSTEMIC LUPUS ERYTHEMATOSUS	190
ULCERATIVE COLITIS	193
<i>Diseases presumably correlated with Th2 Hypoactivation</i>	199
CELIAC DISEASE.....	199

<i>Summary tables</i>	203
<i>Role of the Dendritic Cells in Neoplastic Diseases</i>	207
ROLE OF OXIDATIVE STRESS	209
MERCURY POISONING AS STIMULUS OF TH2 SWITCH	210
BETA GLUCANS AS TH1 UP-REGULATION FACTORS	211
<i>Substances that influence the Th1/Th2 Balance</i>	213
- HORMONES	213
- MINERALS	215
- THERAPEUTIC MUSHROOMS	215
- PROBIOTICS	218
- PLANTS	219
