Preface	xiii
About the Author	xv
CHAPTER 1 ■ The Purpose and Process of Health Research	1
1.1 Types of Health Research	1
1.2 The Goal of Health Research	3
1.3 The Research Process	5
STEP I ■ Identifying a Study Question	7
CHAPTER 2 ■ Selecting a General Topic	9
2.1 Brainstorming and Topic Mapping	9
2.2 Key Words	10
2.3 Exposure, Disease, Population	11
CHAPTER 3 ■ Reviewing the Literature	15
3.1 Factsheets, Websites, and Informal Sources	15
3.2 Statistical Reports	16
3.3 Abstract Databases	16
3.4 Full-Text Articles	17
3.5 What Makes Research Original?	18

CHAPTER 4 ■ Focusing the Research Question	21
4.1 Study Approach	21
4.2 Study Goals and Specific Objectives	22
4.3 Checklist for Success	23
CHAPTER 5 ■ Assembling a Support Team	25
5.1 Collaborators, Consultants, and Friends	25
5.2 Authorship Criteria	26
5.3 Authorship Order	28
5.4 Decisions About Authorship	29
STEP 2 ■ Selecting a Study Approach	31
CHAPTER 6 ■ Overview of Study Approaches	33
6.1 Types of Study Approaches	33
6.2 Primary, Secondary, and Tertiary Studies	34
6.3 Study Duration	35
6.4 Primary Focus: Exposure, Disease, or Population?	36
CHAPTER 7 ■ Reviews	37
7.1 Overview	38
7.2 Selecting a Topic	39
7.3 Library Access	39
7.4 Narrative Reviews	40
7.5 Systematic Reviews	40
7.6 Meta-Analysis	40
CHAPTER 8 ■ Correlational (Ecological) Studies	43
8.1 Overview	44
8.2 Data for Correlational Studies	44
8.3 Analysis: Correlation	45
8.4 Age Adjustment	46
8.5 Avoiding the Ecological Fallacy	47

CHAPTER 9 ■ Case Series	49
9.1 Overview	50
9.2 Case Definitions	50
9.3 Special Considerations	51
9.4 Analysis	52
CHAPTER 10 ■ Cross-Sectional Surveys	53
10.1 Overview	54
10.2 Representative Populations	54
10.3 Analysis: Prevalence	54
CHAPTER 11 ■ Case-Control Studies	55
11.1 Overview	56
11.2 Finding Cases and Controls	56
11.3 Matching	57
11.4 Special Considerations	58
11.5 Analysis: Odds Ratios	59
11.6 Matched Case-Control Studies	62
CHAPTER 12 ■ Cohort Studies	65
12.1 Overview	66
12.2 Types of Cohort Studies	66
12.3 Special Considerations	69
12.4 Analysis: Incidence and Risk Ratios	70
CHAPTER 13 ■ Experimental Studies	77
13.1 Overview	78
13.2 Describing the Intervention	79
13.3 Defining Outcomes	79
13.4 Selecting Controls	81
13.5 Blinding	83
13.6 Randomizing	84

13.7 Ethical Considerations	85
13.8 Analysis	86
13.9 Screening and Diagnostic Tests	88
CHAPTER 14 ■ Qualitative Studies	91
14.1 Qualitative Study Methods	91
14.2 Consensus Methods	92
14.3 Program Evaluation	93
STEP 3 ■ Designing the Study and Collecting Data	95
CHAPTER 15 ■ Developing a Proposal and Protocol	97
15.1 Overview of Research Plans by Study Approach	97
15.2 Resources for Research	98
15.3 Funding Sources and Budgets	99
15.4 Research Timelines and Responsibilities	100
15.5 Writing a Research Proposal	102
15.6 Writing a Research Protocol	102
15.7 Preparing for Data Collection	103
CHAPTER 16 ■ Primary Studies: Selecting a Sample Population	105
16.1 Types of Research Populations	105
16.2 Target and Source Populations	106
16.3 Sample Populations	107
16.4 Study Populations	108
16.5 Populations for Cross-Sectional Surveys	108
16.6 Populations for Case-Control Studies	109
16.7 Populations for Cohort Studies	111
16.8 Populations for Experimental Studies	112
16.9 Vulnerable Populations	114
16.10 Community Involvement	114

CHAPTER 17 ■ Primary Studies: Estimating Sample Size	117
17.1 Importance of Sample Size	117
17.2 Bigger Samples Are Usually Better	118
17.3 Sample Size Estimation	120
17.4 Power Estimation	121
17.5 Refining the Study Approach	123
CHAPTER 18 ■ Primary Studies: Developing a Questionnaire	125
18.1 Questionnaire Design Overview	125
18.2 Questionnaire Content	126
18.3 Types of Questions	127
18.4 Anonymity	129
18.5 Types of Responses	129
18.6 Wording of Questions	131
18.7 Order of Questions	133
18.8 Layout and Formatting	134
18.9 Validation	136
18.10 Commercial Research Tools	136
18.11 Translation	136
18.12 Pilot Testing	137
CHAPTER 19 ■ Primary Studies: Surveys and Interviews	139
19.1 Interviews Versus Self-Administered Surveys	139
19.2 Recruiting Methods	140
19.3 Data Recording Methods	143
19.4 Training Interviewers	144
CHAPTER 20 ■ Primary Studies: Additional Assessments	147
20.1 Supplementing Self-Reported Information	147
20.2 Anthropometric Measures	147
20.3 Vital Signs	148

20.4	Clinical Examination	148
20.5	Tests of Physiological Function	149
20.6	Laboratory Analysis of Biological Specimens	149
20.7	Medical Imaging	149
20.8	Tests of Physical Fitness	150
20.9	Environmental Assessment	150
20.10	GIS (Geographic Information Systems)	150
CHAPTER 21 ■ Primary Studies: Ethical Considerations		151
21.1	Benevolence, Autonomy, and Justice	151
21.2	Incentives	153
21.3	Informed Consent Statements	154
21.4	Informed Consent Process	155
21.5	Informed Consent Documentation	156
21.6	Confidentiality and Privacy	157
21.7	Cultural Considerations	158
21.8	Vulnerable Populations	159
21.9	Ethics Training and Certification	160
CHAPTER 22 ■ Ethical Review and Approval		161
22.1	Ethics Committee Responsibilities	161
22.2	Warning: Ethics Review Takes Time	162
22.3	Application Materials	162
22.4	Review Process	164
22.5	Review by Multiple Committees	165
22.6	Ongoing Review	166
22.7	Conflicts of Interest	167
22.8	Is Ethics Review Required?	167
CHAPTER 23 ■ Secondary Studies: Existing Data Sets		169
23.1	Overview of Secondary Analysis	169
23.2	Publicly Available Data Sets	170

23.3	Private Data Sets	171
23.4	Clinical Records	171
23.5	Ethics Committee Review	172
CHAPTER 24 ■ Tertiary Studies: Systematic Reviews and Meta-Analyses		173
24.1	Overview of the Systematic Review Process	173
24.2	Search Strategy	174
24.3	Data Extraction	175
24.4	Meta-Analysis	176
STEP 4 ■ Analyzing Data		179
CHAPTER 25 ■ Data Management		181
25.1	Codebooks	181
25.2	Data Entry	183
25.3	Data Cleaning	184
25.4	Data Recoding	185
25.5	Maintaining Confidentiality	186
CHAPTER 26 ■ Descriptive Statistics		187
26.1	Analytic Plan by Study Approach	187
26.2	Types of Variables	188
26.3	Measures of Central Tendency	190
26.4	Measures of Spread	191
26.5	Statistical Honesty	195
26.6	Consultation and Collaboration	195
CHAPTER 27 ■ Comparative Statistics		197
27.1	Comparative Analysis by Study Approach	197
27.2	Hypotheses for Statistical Tests	198
27.3	Rejecting the Null Hypothesis	199
27.4	Interpreting <i>p</i> -Values	201

27.5	Interpreting Confidence Intervals	202
27.6	Measures of Association	204
27.7	Selecting an Appropriate Test	205
27.8	Comparing a Population to a Set Value	206
27.9	Comparing Independent Populations	207
27.10	Comparing Paired Data	209
CHAPTER 28 ■ A Brief Guide to Advanced Health Statistics		211
28.1	Confounding and Effect Modification	211
28.2	Regression	213
28.3	Linear Regression	214
28.4	Logistic Regression	217
28.5	Dummy Variables	218
28.6	Survival Analysis	219
28.7	GIS/Spatial Analysis	220
STEP 5 ■ Reporting Findings		221
CHAPTER 29 ■ Article Structure		223
29.1	Abstract	223
29.2	Introduction	224
29.3	Methods	224
29.4	Results	225
29.5	Discussion	225
29.6	Endmatter	225
29.7	Tables and Figures	226
29.8	Writing Checklists	228
CHAPTER 30 ■ Citing		231
30.1	Referring to the Scientific Literature	231
30.2	Writing in One's Own Words	233
30.3	What Is Common Knowledge?	235

30.4	Avoiding Plagiarism	235
30.5	Citation Styles	236
CHAPTER 31 ■ Writing Strategies		239
31.1	The Writing Process	239
31.2	Getting Started	240
31.3	Staying Motivated	241
31.4	Conquering Writer's Block	242
CHAPTER 32 ■ Critically Revising		245
32.1	Does the Paper Have a "Plot"?	245
32.2	Structure and Content	246
32.3	Style and Clarity	247
CHAPTER 33 ■ Posters and Presentations		249
33.1	Purpose of Conferences	249
33.2	Structure of Conferences	249
33.3	Submitting an Abstract	250
33.4	Preparing a Poster	251
33.5	Presenting a Poster	253
33.6	Preparing for an Oral Presentation	254
33.7	Giving an Oral Presentation	257
CHAPTER 34 ■ Selecting Target Journals		259
34.1	Choosing a Target Journal	259
34.2	Aim, Scope, and Audience	260
34.3	Impact Factors	261
34.4	Journal Characteristics	261
34.5	Publication Costs	261
34.6	Online Journals	262

CHAPTER 35 ■ The Submission, Review, and Publication Process 263

35.1 From Paper to Publication	263
35.2 Journal Selection	264
35.3 Manuscript Formatting	264
35.4 Cover Letter	266
35.5 Online Submission	267
35.6 Initial Review	269
35.7 External Review Results	270
35.8 Rejection	270
35.9 Revision and Resubmission	271
35.10 After Acceptance	274

CHAPTER 36 ■ Why Publish? 277

36.1 Scientific Dialogue	277
36.2 Critical Feedback	278
36.3 Respect for Participants and Collaborators	278
36.4 A Step Toward Future Research	278
36.5 Personal Benefits	279

Index 281
