<b>Preface</b> .....	7
<b>Program</b> .....	9
<b>Invited Lectures</b> .....	15
J. Čapek, M. Hála, O. Zabeida, J.E. Klemberg-Sapieha, L. Martinu Steady state HiPIMS discharge optimization through the control of the magnetic field .....	17
J. Pavlík, M. Kormunda, T. Homola, J. Matoušek, M. Černák Diffuse coplanar surface barrier discharge for treatments of surfaces at atmospheric pressure .....	23
Š. Potocký, O. Babchenko, T. Ižák, M. Varga, A. Kromka, B. Rezek, P. Tesárek Foreign substrates pre-treatment using polymer composites in plasma-enhanced CVD growth of diamond fibers and layers .....	29
A. Poruba, M. Vaněček, R. Bařínka, P. Čech, P. Wostrý Potential for nanotechnology approaches in the production of crystalline and thin film silicon solar cells .....	33
P. Kudláček Ion driven chemistry in expanding thermal plasma: from research to industrialization .....	39
H. Hrubý, J. Anklam Flexibility of Eifeler PVD systems .....	41
D. Heřman Erosion Resistant Coatings in Aerospace – Overview of Testing Methods .....	45
M. Louda, S. Hořejš Importance of the PACVD coatings for aluminium die-casting .....	47
V. Ballo Coating and grinding of cutting tools in firm Staton Turany .....	51
A. Choukourov, I. Gordeev, O. Polonskyi, P. Solař, A. Serov, A. Artemenko, J. Kousal, O. Kylián, D. Slavínská, H. Biederman Nanostructuring of surfaces with plasma-based depositions .....	57

L. Cvrček, L. Joska, J. Fojt, L. Franta, J. Vyskočil Diamond-like carbon coatings for orthopaedic implants .....	63
M. Jílek, P. Vogl New method of controlling reactive magnetron sputtering process .....	67
<b>Oral Presentations .....</b>	<b>71</b>
J. Rezek, J. Vlček, J. Houška, R. Čerstvý High-rate reactive deposition of multifunctional Ta-O-N films using high power impulse magnetron sputtering .....	73
T. Kozák Modelling of high power impulse magnetron sputtering of copper .....	75
L. Pecková, A.D. Pajdarová A global model for the high power impulse magnetron sputtering of zirconium in Ar-O <sub>2</sub> gas mixture .....	79
M. Kormunda Tin oxide coatings with controlled morphological and optical properties .....	83
L. Machala <sup>57</sup> Fe Mössbauer spectroscopy in studying of metallic materials .....	87
J. Frydrych, L. Machala, J. Pechoušek Conversion Electron Mossbauer Spectroscopy: Introduction, Instrumentation and Applications .....	89
L. Prušáková, M. Mikolášek, M. Netrvalová, P. Šutta Design and optimization of thin film silicon solar cells .....	91
P. Novák, L. Prušáková, P. Kulha, P. Šutta The ZnO films for fabrication of transparent electrodes and piezoelectric devices .....	93
M. Netrvalová, P. Šutta Determination of Thin Film Properties for Photovoltaics by using Optical Spectroscopies and X-ray Diffraction .....	95

R. Čtvrtlík, V. Kulikovský, J. Tomáščík Mechanical properties of amorphous boron carbide thin films at elevated temperatures .....	97
J. Kohout, P. Steidl, J. Vlček, R. Čerstvý Hard nanocrystalline Zr-B-C-N films prepared by pulsed magnetron sputtering ...	99
P. Mareš Effect of nitrogen on mechanical properties and on oxidation resistance of Zr-Si-B-C-N films prepared by pulsed magnetron sputtering for low and high content of silicon .....	101
