WHO classification of tumours of the breast	8	9 Myoepithelial and epithelial–myoepithelial lesions	119
TNM classification of tumours of the breast	10	Myoepithelial and epithelial–myoepithelial lesions	120
1 Introduction and general features	13	Adenomyoepithelioma and adenomyoepithelioma with carcinoma	122
2 Invasive carcinoma of no special type	33	10 Mesenchymal tumours	125
3 Special subtypes	39	Nodular fasciitis	126
Invasive lobular carcinoma	40	Benign vascular lesions	127
Tubular carcinoma and cribriform carcinoma	43	Pseudoangiomatous stromal hyperplasia	129
Carcinoma with medullary features	46	Myofibroblastoma	130
Metaplastic carcinoma	48	Desmoid-type fibromatosis	131
Carcinoma with apocrine differentiation	53	Inflammatory myofibroblastic tumour	133
Salivary gland/skin adnexal type tumours	55	Lipoma	133
Adenoid cystic carcinoma	56	Granular cell tumour and benign peripheral nerve-sheath tumour	134
Mucoepidermoid carcinoma	58	Angiosarcoma	135
Polymorphous carcinoma	59	Liposarcoma	137
Mucinous carcinoma and carcinoma with signet-ring-cell differentiation	60	Rhabdomyosarcoma	137
Carcinoma with neuroendocrine features	62	Osteosarcoma	138
Invasive papillary carcinoma	64	Leiomyoma and leiomyosarcoma	139
Invasive micropapillary carcinoma	65	11 Fibroepithelial tumours	141
Inflammatory carcinoma	67	Fibroadenoma	142
Bilateral breast carcinoma and non-synchronous breast carcinoma	69	Phyllodes tumour	143
Exceptionally rare types and variants	71	Hamartoma	147
Secretory carcinoma	71	12 Tumours of the nipple	149
Oncocytic carcinoma	72	Nipple adenoma	150
Sebaceous carcinoma	73	Syringomatous tumour	151
Lipid-rich carcinoma	74	Paget disease	152
Glycogen-rich clear cell carcinoma	74	13 Lymphoid and haematopoietic tumours	155
Acinic cell carcinoma	75	Introduction	156
4 Lobular neoplasia	77	Diffuse large B-cell lymphoma	156
5 Intraductal proliferative lesions	81	Burkitt lymphoma	157
Introduction and overview	82	T-cell lymphoma	158
Usual ductal hyperplasia	84	Extranodal marginal zone lymphomas of mucosa-associated lymphoid tissue	159
Columnar cell lesions	86	Follicular lymphoma	160
Atypical ductal hyperplasia	88	14 Metastases of extramammary malignancies to the breast	161
Ductal carcinoma in situ	90	15 Tumours of the male breast	165
6 Microinvasive carcinoma	95	Gynaecomastia	166
7 Intraductal papillary lesions	99	Carcinoma of the male breast	168
Intraductal papilloma	100	16 Genetic susceptibility: inherited syndromes	171
Intraductal papillary carcinoma	103	Introduction and historical perspectives	172
Encapsulated papillary carcinoma	106	Inherited syndromes associated with an increased risk of breast cancer: Introduction	174
Solid papillary carcinoma	108	BRCA1 and BRCA2 syndromes	176
8 Benign epithelial proliferations	111	Li-Fraumeni syndrome	183
Introduction	112	Ataxia telangiectasia syndrome	186
Adenosis, sclerosing adenosis and apocrine adenosis	112	Cowden syndrome	188
Microglandular adenosis, atypical microglandular adenosis and microglandular adenosis with carcinoma	113	Lynch syndrome	192
Radial scar and complex sclerosing lesion	114	Other breast cancer-predisposing genes	194
Tubular adenoma	115	Contributors	196
Lactating adenoma	116	Sources of figures	203
Apocrine adenoma	116	References	205
Ductal adenoma	117	Subject index	236
Pleomorphic adenoma	117
