

Contents

| | |
|---|-----|
| Introduction | 1 |
| 1. Space-time diagrams and the foundations of special relativity | 5 |
| 1.1 The concept of a space-time | 5 |
| 1.2 Causality and the speed of light | 12 |
| 1.3 Relative motion in special relativity | 24 |
| 2. Fundamentals of measurement | 35 |
| 2.1 Time | 35 |
| 2.2 Distance | 37 |
| 2.3 Simultaneity | 41 |
| 2.4 World maps, world pictures, and radar maps | 44 |
| 3. Measurements in flat space-times | 49 |
| 3.1 The Doppler effect | 49 |
| 3.2 Relative velocity | 59 |
| 3.3 Simultaneity | 70 |
| 3.4 Time dilation | 76 |
| 3.5 Length contraction | 88 |
| 3.6 The whole package of kinematic effects | 96 |
| 3.7 Relativistic dynamics | 102 |
| 3.8 The consistency of physics | 120 |
| 4. The Lorentz transformation and the invariant interval | 122 |
| 4.1 The Lorentz transformation | 122 |
| 4.2 Space-time separation invariants | 139 |
| 4.3 Some flat-space universes | 162 |
| 5. Curved space-times | 186 |
| 5.1 The general concept | 186 |
| 5.2 Acceleration and gravitation: the principle of equivalence | 189 |
| 5.3 Freely falling motion and the meaning of geodesics | 195 |

| | | |
|-----------|--|------------|
| 5.4 | The metric form and the metric tensor | 201 |
| 5.5 | The field equations | 206 |
| 5.6 | Light rays | 209 |
| 5.7 | Causality | 217 |
| 5.8 | Parallel propagation along a curve | 219 |
| 5.9 | Further tests of Einstein's theory | 222 |
| 5.10 | Gravitational waves | 226 |
| 5.11 | Detection of gravitational waves | 229 |
| 5.12 | Alternative theories and approaches | 232 |
| 6. | Spherical and stellar collapse | 240 |
| 6.1 | The Schwarzschild solution | 240 |
| 6.2 | Spherical collapse to black holes | 249 |
| 6.3 | More general black holes | 255 |
| 6.4 | Black hole evaporation and thermodynamics | 257 |
| 6.5 | Black hole candidates and ways of detecting them | 260 |
| 7. | Simple cosmological models | 264 |
| 7.1 | Space-time geometry | 264 |
| 7.2 | The evolution of the universe | 271 |
| 7.3 | Observable quantities | 277 |
| 7.4 | New observational data | 284 |
| 7.5 | The light cone, observational limits, and horizons | 293 |
| 7.6 | Steady-state and inflationary universes | 301 |
| 7.7 | Small universes | 305 |
| 7.8 | Alternative universes | 308 |
| 7.9 | Observational tests | 311 |
| 8. | Finale | 313 |
| | Afterword | 315 |
| | Appendices | |
| A. | Line integrals | 318 |
| B. | Four-vectors and relativistic dynamics | 325 |
| C. | Four-vectors, electromagnetism, and energy-momentum conservation | 341 |
| | Symbols used | 368 |
| | Index | 369 |
