<b>Abbreviations and acronyms</b> .....	v
<b>Acknowledgements</b> .....	vii
<b>Preface</b> .....	viii
<b>Module 1: Target diseases</b>	
1. Diphtheria .....	5
2. Measles .....	7
3. Mumps .....	10
4. Pertussis .....	12
5. Poliomyelitis (polio) .....	14
6. Rubella and congenital rubella syndrome .....	17
7. Tetanus .....	19
8. Tuberculosis (TB) .....	22
9. Hepatitis B .....	24
10. Haemophilus influenzae type b (Hib) .....	26
11. Japanese encephalitis (JE) .....	28
12. Meningococcal meningitis .....	30
13. Yellow fever (YF) .....	32
14. Vitamin A deficiency (VAD) and EPI plus .....	34
<b>Module 2: The vaccines</b>	
1. Diphtheria-tetanus-pertussis (DTP) vaccine .....	4
2. Measles vaccine .....	6
3. Measles-rubella (MR) and measles- mumps-rubella (MMR) combination vaccines .	8
4. Oral polio vaccine (OPV) .....	10
5. Tetanus toxoid (TT) vaccine .....	12
6. Tuberculosis vaccine (BCG) .....	14
7. Hepatitis B (hepB) vaccine .....	16
8. DTP-hepB combination vaccine .....	18
9. Haemophilus influenzae type b (Hib) vaccine .....	19
10. DTP-hepB+Hib combination vaccine .....	20
11. Japanese encephalitis (JE) vaccine .....	21
12. Meningococcal vaccine .....	22
13. Yellow fever (YF) vaccine .....	23
14. Summary .....	24
<b>Module 3: The cold chain</b>	
1. The cold chain .....	3
2. Cold chain equipment used in health facilities .....	5
3. Cold chain monitoring equipment used in health facilities .....	10

4. How to load cold chain equipment .....	15
5. How to freeze ice-packs .....	20
6. How to monitor and adjust the refrigerator temperature .....	21
7. How to maintain cold chain equipment .....	24
8. The shake test.....	26
9. Summary .....	28

#### **Module 4: Ensuring safe injections**

1. Using safe injection equipment and techniques .....	3
2. Preventing needle-stick injuries and infections .....	9
3. Disposing of used syringes and needles .....	13
Annex 1: Unsafe immunization practices .....	21

#### **Module 5: Planning immunization sessions to reach every infant**

1. Planning at district level involving all health facilities .....	3
2. Special planning issues .....	13
3. Estimating vaccine and supply needs .....	17
4. Stock management .....	23
5. Involving the community in planning .....	26
Annex 1: Guidelines to determine the immunization strategy .....	
Annex 2: Sample district workplan .....	29
Annex 3: Reducing vaccine wastage .....	31
Annex 4: Vaccine wastage calculations at health facility level .....	33

#### **Module 6: Holding an immunization session**

1. Setting up an immunization session .....	3
2. Assessing infants and women and completing the register .....	10
3. Giving the right vaccine safely .....	15
4. Completing the tally sheet and infant's immunization card .....	25
5. Communication with parents during and after the immunization sessions .....	27
6. Concluding the session .....	29

#### **Module 7: Monitoring and using your data**

1. Basic recording tools .....	3
2. Making summary reports .....	12
3. Monitoring your performance .....	17
4. Taking corrective action .....	24
Annex 1: Sample immunization register for infants and mothers .....	30
Annex 2: Reporting routine TT immunization for women .....	31
Annex 3: Blank monitoring chart .....	33
Annex 4: Worked example: Analyses of health facility data .....	34
Annex 5: Supervisory checklist during visits to a health facility .....	35
Annex 6: Simple questionnaire to investigate reasons for low coverage & dropouts .....	37

#### **Module 8: Building community support for immunization**

1. Meeting with the community to build support for immunization services .....	3
2. Planning suitable sessions .....	7
3. Mobilizing your community using suitable message and methods .....	8
4. Dealing with rumours and misinformation .....	10
