

CONTENTS

INTRODUCTION.....	1
1 BASIC PHYSICAL PROPERTIES OF FLUIDS.....	4
1.1 Basic Physical Properties Relevant for Hydraulic Processes	4
1.2 Specific Weight of Liquids.....	7
1.3 Viscosity	9
1.4 Compressibility of Real Liquids.....	9
1.5 Expansivity of Liquids.....	12
1.6 Surface Tension	13
2 BASIC EQUATIONS USED IN HYDRAULIC PROCESSES.....	18
2.1 Basic Hydrodynamic Equations	18
2.2 Equation of Conservation of Energy – Bernoulli’s Equation.....	23
2.3 Pressure Change Propagation Velocity	25
2.4 Zhukovsky’s Theorem – Water Surge.....	31
2.5 Real Liquid Flow Character	35
3 REAL LIQUIDS FLOW PROPERTIES	40
3.1 Newtonian Liquids	40
3.2 Non-Newtonian Liquids	43
3.3 Viscosity of Multiphase Systems	52
4 TECHNOLOGY WATER JET CUTTING.....	56
4.1 Water Jet Cutting Principle.....	56
4.2 Recommended Quality for Water Jet Cutting	62
4.3 Abrasive.....	63
4.3.1 Garnet GMA Abrasive	63
4.3.2 Abrasive Materials Used in Practice	65
4.4 Cutting Area Surface and Application Potentials for Technology.....	70
4.5 Water Jet Cutting Head.....	72
4.6 Water Jet Quality and Cutting Performance.....	75
4.7 Abrasive Recycling Methods.....	77
4.8 Approaches in Terms of High-Pressured Water Flow Change	81
4.8.1 Some Workplaces Equipped with High-Pressured Water Flow Distribution ...	82
4.8.2 Some High-Pressured Water Distribution Workplaces Abroad.....	90
5 CATEGORIZATION FACTORS FOR WATERJET CUTTING.....	92
5.1 Factors of Basic Physical Properties and Hydrodynamic Relations of Liquids	93
5.2 Technical Factors Affecting Hydroerosive Production Process.....	93
5.3 Technological Factors Affecting Hydroerosive Cutting Surface	100
6 RESEARCH ON THE CUT SURFACE OF AISI 304 IN AWJ CUTTING	107
6.1 Flow Change Combinations Sizing for Water Jet Distribution.....	107
6.2 Experimental Testing Methodology	109
6.3 Analysis and Processing of Specimens	113
6.4 Evaluation of Analysed and Processed Specimens.	123
6.4.1 Evaluation Based on 1st Category of Factors	124

6.4.2	Evaluation Based on 2nd Category of Factors	127
6.4.3	Evaluation Based on 3rd Category of Factors	129
6.4.4	Evaluation Based on 4th Category of Factors	132
6.5	Verification and Recommendations for Practice	133
7	CONCLUSION	141
	REFERENCES	145
