<b>Preface</b>	vii
<b>Acknowledgements</b>	ix
<b>Executive summary</b>	xiii
<b>Introduction</b>	1
<hr/>	
<b>Part I. The scientific basis of national cancer control programmes</b>	5
<hr/>	
<b>1. The nature of cancer</b>	7
Biological aspects of cancer	7
Social aspects of cancer	10
<b>2. The causes of cancer</b>	13
Biological factors in cancer etiology	13
External agents important for cancer control	13
Physical carcinogens	14
Chemical carcinogens	15
Biological carcinogens	16
Dietary influences	16
Social factors in cancer etiology	16
Relative importance of various causes of cancer	19
<b>3. Extent, distribution, and trends of cancer</b>	21
Cancer as a world health problem	21
Cancer of various sites in different countries	24

Cancer trends over time	25
Social and economic impacts of cancer	26
<hr/>	
<b>Part II. Approaches to cancer control</b>	<b>27</b>
<hr/>	
<b>4. Introduction</b>	<b>29</b>
<b>5. Primary prevention</b>	<b>30</b>
Tobacco	30
Diet	39
Alcohol	43
Occupation and environment	47
Infections and cancer	52
Sunlight	53
Sexual and reproductive factors	55
<b>6. Early detection of cancer</b>	<b>58</b>
Education for early diagnosis	58
Screening for cancer	61
<b>7. Treatment of cancer</b>	<b>70</b>
Aims and limitations of treatment for cancer	71
Development of a treatment policy	76
Development of referral policies	77
Ethical aspects of cancer therapy	78
Evaluation of effectiveness of treatment	80
<b>8. Palliative care</b>	<b>82</b>
<b>9. Cancer control research</b>	<b>87</b>
<hr/>	
<b>Part III. Establishing and managing national cancer control programmes</b>	<b>89</b>
<hr/>	
<b>10. Establishing a national cancer control programme</b>	<b>91</b>
Assessing the magnitude of the cancer challenge	92
Prevention policy	97
Integration with national health programming	98
Intersectoral aspects of cancer control	99

## CONTENTS

Setting measurable cancer control objectives	100
Evaluating possible strategies for cancer control	103
Choosing priorities for initial cancer control activities	104
Political will for cancer control	105
<b>11. Managing the establishment of a national cancer control programme</b>	<b>106</b>
Planning the NCCP	106
Establishing the NCCP	107
Launching the NCCP with a workshop	107
Developing a communication strategy	108
Recruiting leaders	108
Consideration of existing health care systems	109
Consultation with nongovernmental organizations	109
Ensuring community involvement	110
Preparing a draft national cancer control plan	110
Organizing a national conference	110
Changing legislation	111
Identifying resources for the NCCP	111
Reviewing the role of existing organizations in cancer control	111
Identifying the systems that already exist	112
Drawing up a budget for cancer control	113
<b>12. Implementing and maintaining a national cancer control programme</b>	<b>115</b>
Functions of the NCCP	115
Management activities in the NCCP	116
The NCCP coordinator	116
The NCCP management board	117
Fund-raising	117
Creating an identity for the NCCP	117
Evaluation of the NCCP	118
<b>13. Monitoring and evaluating components of the national cancer control programme</b>	<b>119</b>
Prevention	121
Early detection of cancer	121
Treatment	122
Palliative care	122
<b>References</b>	<b>123</b>

**Annexes**

1. Calculation of expected age-specific mortality rates  
in different regions 128
2. Outline agenda for a workshop on national cancer  
control programmes 129
3. Example of a programme for a national cancer control  
workshop 131
4. Evaluation of a national cancer control programme 134
