

CONTENTS

Foreword	vii
Contributors	ix
1. Bionanocomposites: State of the Art, Challenges, and Opportunities	1
<i>Alain Dufresne, Sabu Thomas, and Laly A. Pothan</i>	
2. Preparation of Chitin Nanofibers and Their Composites	11
<i>Shinsuke Ifuku, Zameer Shervani, and Hiroyuki Saimoto</i>	
3. Chemical Modification of Chitosan and Its Biomedical Application	33
<i>Deepa Thomas and Sabu Thomas</i>	
4. Biomimetic Lessons for Processing Chitin-Based Composites	53
<i>Otto C. Wilson, Jr. and Tiffany Omokanwaye</i>	
5. Morphological and Thermal Investigations of Chitin-Based Nanocomposites	83
<i>Ming Zeng, Liyuan Lu, and Qingyu Xu</i>	
6. Mechanical Properties of Chitin-Based Nanocomposites	111
<i>Merin Sara Thomas, Laly A. Pothan, and Sabu Thomas</i>	
7. Preparation and Applications of Chitin Nanofibers/Nanowhiskers	131
<i>Jun-Ichi Kadokawa</i>	
8. Preparation of Starch Nanoparticles	153
<i>Déborah Le Corre and Alain Dufresne</i>	
9. Chemical Modification of Starch Nanoparticles	181
<i>Jin Huang, Qing Huang, Peter R. Chang, and Jiahui Yu</i>	
10. Starch-Based Bionanocomposite: Processing Techniques	203
<i>Rekha Rose Koshy, Laly A. Pothan, and Sabu Thomas</i>	
11. Morphological and Thermal Investigations of Starch-Based Nanocomposites	227
<i>Peter R. Chang, Jin Huang, Qing Huang, and Debbie P. Anderson</i>	
12. Mechanical Properties of Starch-Based Nanocomposites	261
<i>Hélène Angellier-Coussy and Alain Dufresne</i>	

13. Applications of Starch Nanoparticles and Starch-Based Bionanocomposites	293
<i>Siji K. Mary, Laly A. Pothan, and Sabu Thomas</i>	
14. Preparation of Nanofibrillated Cellulose and Cellulose Whiskers	309
<i>David Plackett and Marco Iotti</i>	
15. Bacterial Cellulose	339
<i>Eliane Trovatti</i>	
16. Chemical Modification of Nanocelluloses	367
<i>Youssef Habibi</i>	
17. Cellulose-Based Nanocomposites: Processing Techniques	391
<i>Robert A. Shanks</i>	
18. Morphological and Thermal Investigations of Cellulosic Bionanocomposites	411
<i>Anayancy Osorio-Madrado and Marie-Pierre Laborie</i>	
19. Mechanical Properties of Cellulose-Based Bionanocomposites	437
<i>B. Deepa, Saumya S. Pillai, Laly A. Pothan, and Sabu Thomas</i>	
20. Review of Nanocellulosic Products and Their Applications	461
<i>Joe Aspler, Jean Bouchard, Wadood Hamad, Richard Berry, Stephanie Beck, François Drolet, and Xuejun Zou</i>	
21. Spectroscopic Characterization of Renewable Nanoparticles and Their Composites	509
<i>Mirta I. Aranguren, Mirna A. Mosiewicki, and Norma E. Marcovich</i>	
22. Barrier Properties of Renewable Nanomaterials	541
<i>Vikas Mittal</i>	
23. Biocomposites and Nanocomposites Containing Lignin	565
<i>Cornelia Vasile and Georgeta Cazacu</i>	
24. Preparation, Processing and Applications of Protein Nanofibers	599
<i>Megan Garvey, Madhusudan Vasudevamurthy, Shiva P. Rao, Heath Ecroyd, Juliet A. Gerrard, and John A. Carver</i>	
25. Protein-Based Nanocomposites for Food Packaging	613
<i>Hélène Angellier-Coussy, Pascale Chalier, Emmanuelle Gastaldi, Valérie Guillard, Carole Guillaume, Nathalie Gontard, and Stéphane Peyron</i>	
Index	655
