Optimizing global health partnerships at country level	25
HHA: a “one-stop shop” for strengthening health systems	25

IHP+ country compacts	26
Meningitis Vaccine Project	26
Partnering to end NTDs	27
3. Health through the life course	33
Children	34
Newborn babies	34
Infants and young children	35
Immunization	39
Young people	41
What works?	43
Adult women	44
Family planning	44
Pregnancy and childbirth	45
Adult males	47
Violence	48
Older men and women	48
4. Disease threats	59
Communicable diseases	59
HIV/AIDS	59
Tuberculosis	61
Malaria	63
Epidemic- and pandemic-prone diseases	67
What works?	67
Neglected tropical diseases	69
What works?	70
Noncommunicable diseases	72
Cardiovascular diseases	74
Chronic respiratory diseases	74
Cancer	75
Sickle cell disease	76
Noma	77
Mental and neurological disorders	77
Road traffic injuries	78
Complex disease interactions	79
5. Health determinants	87
Introduction	87
Social determinants	88
A strategy for addressing the key determinants of health	89
Health in all policies	89

Social participation and dialogue in policy-making and implementation	90
Occupational risks to health	90

Nutrition	90
Food security	92
Food safety	92
The physical environment	94
Water, sanitation and hygiene	94
Indoor air pollution	95
Climate change	96
Toxic substances	97
Lifestyle risks	98
Harmful use of alcohol	98
Substance abuse	99
Tobacco use	100
Physical inactivity	101
Unhealthy diet	102
Sexual behaviour	102
Disasters – including conflict	103

6. Improving access to health care

Leadership and governance	114
Strengthening human resources for health	115
What works?	117
Who pays for health care?	117
What works?	117
Access to essential medicines	120
Use of national essential medicine lists	121
Traditional medicine	121
Access to health technologies, including diagnostics	122
Use of technologies	123
Blood and blood products	124
Patient safety	124
Service delivery: reaching everyone	125
What works?	126
Information: better data, better health care	126
e-Health	127
Research	128
What works?	130

7. Conclusion: what works?	137
Good governance for health	138
Health in all policies	138
Data-driven decision-making	139
Find and fill the gaps	139
Staff properly paid	140
Harnessing local technological capacity	140
Quality in all things	141
Performance-based health management	141
Community-based intervention	142
Scaling up better	142
Statistical annex	143
1. Demographic and socioeconomic statistics	146
2. Life expectancy and mortality	148
3. Cause-specific mortality and morbidity	150
4. Selected infectious diseases	154
5. Health service coverage	156
6. Risk factors	158
7. Health systems	160
8. Health expenditure	162
9. Health inequities	164
