Preface	ix
Acknowledgements	xi
Use of the guidelines	xiii
1. Background information and general considerations	1
Types of IUD	1
Approved life span and effective life	3
Mechanism of action	7
Effectiveness	7
Safety	8
Emergency contraception	8
Attitudes towards IUDs	9
Additional sources of information	10
2. Role of IUDs in family planning programmes	12
Factors affecting availability and acceptance	14
Factors affecting programmes	19
Assessment of benefit-risk ratio	26
Additional sources of information	29
3. Information and communication	30
Audiences	34
Assessing information needs	35
Development of a community information programme	36
Information needs of clinics	38
Making information materials available	38
Preparing information materials	39
Handling criticism, misinformation and rumours	39
Additional sources of information	40
4. Logistics	41
Forecasting requirements	41
Order frequency and size	45
Minimum stock levels and order points	46
Marking of supply containers	46

Storage of supplies	47
Distribution	47
Shelf-life and quality control	49
Costs.	49
Additional sources of information.	49
5. Organizing and managing an IUD service	51
Service delivery channels	51
Follow-up and referral facilities	52
Checklist for use in family planning services	53
Obstacles to the introduction of IUDs	55
Facilities.	55
Client flow	56
Clinic location and working hours.	56
Availability of supplies	57
Equipment and instruments.	58
Personnel	59
Programme budgeting and financing	64
Record-keeping	66
Characteristics of successful programmes	66
Additional sources of information.	67
6. Preventing infection	68
Background	68
Terminology	69
Which process should be used?.	70
Protective barriers	72
Hand-washing and gloves	73
Antisepsis	74
Processing used (soiled) instruments, gloves and other items	75
IUD insertion	80
IUD removal	80
Disinfecting bulk-packaged IUDs and other disinfection problems.	81
Tarnishing	82
Maintaining a safe environment	83
Additional sources of information.	83
7. Providing services	85
Clients' rights	85
Counselling.	87
Types of counselling	88
Who should be a counsellor?	89

Effective counselling	90
Rumours and misinformation	92
Client assessment	93
Assessment for genital tract infections	95
IUD insertion	96
Replacement and removal of IUDs	99
Additional sources of information	100
8. Post-insertion and follow-up care	102
Post-insertion problems	102
Advice to clients after insertion	102
Follow-up care	106
Management of failed IUD (pregnancy)	107
Management of other health problems	108
Additional sources of information	109
9. Training	110
Training counsellors	111
Training health workers	112
Approach to IUD training	112
Course content	114
Training requirements	114
Criteria for selection of trainees	115
Evaluation	116
Costs	116
Additional sources of information	117
10. Evaluation	118
The evaluation process	119
The evaluation framework: concepts and terminology	121
Role of special studies (case studies and surveys) in programme evaluation	122
Additional sources of information	124
Annex 1. IUD distributors and manufacturers	126
Annex 2. Model IUD training course	128
Annex 3. Contraceptive prevalence worksheet	138
Annex 4. Order-processing/goods-delivery cycle	140
Annex 5. Contents of IUD kits provided by international agencies	141
Annex 6. Medical eligibility criteria for IUD use	143

Contents

Annex 7.	How to be reasonably sure that a woman is not pregnant	152
Annex 8.	Safe and gentle IUD insertion procedure	155
Annex 9.	Procedure for removing an IUD	159
Annex 10.	Management of side-effects and other health problems	161
Annex 11.	Indicators for evaluating IUD services	168
Annex 12.	Model list of questions for assessment of client satisfaction	174
