

CONTENTS

7

| | | |
|----------------------|--|-----|
| 1. | Introduction and acknowledgements | 9 |
| 1. | Taxonomy of the causative organisms of adiaspiromycosis | 11 |
| 2. | The morphology of the causative organisms of adiaspiromycosis | 12 |
| 2.1. | Genus <i>Emmonsia</i> | 12 |
| 2.2. | The species <i>Emmonsia crescens</i> | 13 |
| 2.2.1. | The macro- and micromorphology of the adiasporic stage | 15 |
| 2.2.2. | The macro- and micromorphology of the mycelial stage | 29 |
| 2.3. | The developmental phase of <i>E. crescens</i> | 35 |
| 2.4. | The speed of growth of the adiaspores of <i>E. crescens</i> | 38 |
| 3. | Diagnosis of adiaspiromycosis | 44 |
| 3.1. | Identification of the causal organism in the soil | 44 |
| 3.2. | Diagnosis in infected animals | 45 |
| 3.3. | The diagnosis of the disease in man | 47 |
| 4. | The pathology of adiaspiromycosis | 48 |
| 4.1. | Experimental infection | 49 |
| 5. | The epidemiology and epizootiology of adiaspiromycosis | 53 |
| 5.1. | The geographical distribution of adiaspiromycosis caused by <i>E. crescens</i> | 53 |
| 5.2. | The hosts of the adiaspores of <i>E. crescens</i> | 68 |
| 5.3. | The seasonal dynamics of adiaspiromycosis | 71 |
| 5.4. | The natural focality of adiaspiromycosis caused by <i>E. crescens</i> | 75 |
| 5.5. | The control of adiaspiromycosis in man | 83 |
| 6. | <i>E. crescens</i> and antifungal antibiotics | 86 |
| 6.1. | The effect of amphotericin B on <i>E. crescens</i> in vivo | 86 |
| 6.2. | The effect of amphotericin B on <i>E. crescens</i> in vitro | 88 |
| 6.3. | The effect of pimaricin on <i>E. crescens</i> in vivo | 89 |
| 6.4. | The effect of pimaricin on <i>E. crescens</i> in vitro | 90 |
| 6.5. | The influence of other antifungal antibiotics on <i>E. crescens</i> in vitro and in vivo | 90 |
| 7. | Czechoslovak cases of adiaspiromycosis in man | 92 |
| 7.1. | The clinical picture of lung adiaspiromycosis in man - casus Viničné-Šumperk | 92 |
| 7.2. | Biopsy finding in human pulmonary adiaspiromycosis (casus Viničné-Šumperk) | 95 |
| 7.3. | The morphology of solitary adiaspores of <i>E. crescens</i> from the lungs of man | 101 |
| 7.4. | The accidental finding of adiaspiromycosis caused by the species <i>E. crescens</i> in a case of lung tuberculosis | 103 |
| Summary | | 108 |
| Резюме | | 111 |
