

Contents:

1. Introduction	6
2. Macromorphology	8
Vegetative and reproductive stages	8
Macroscopic characters of the reproductive stage	8
Construction of the basidiocarps	11
3. Micromorphology	19
Hyphae	19
Basidia	26
Basidiospores	29
Cystidia and other sterile hymenial organs	30
Setae and setal organs	31
Asexual spores	33
Hyphal pegs	33
4. Taxonomy	36
5. Decay characteristics	38
6. Pathological significance	41
7. Culturing from fresh specimens	42
8. Sexuality in polypores	45
9. Forest regions of Europe	47
10. Mycogeography	54
11. Practical advice for collecting and determination	58
12. Key to families and genera	67
13. Descriptions of genera and species	81
