

Abstract	8
Brief summary	9
1 Introduction	11
2 Models of man in economic theory – the role of individual versus the role of the group	18
2.1 Values as basic axioms of modelling human behavior	20
2.2 Why the need for a cultural model?	20
2.3 Manifestations of cultural values	21
2.4 Cultural values over time	23
2.5 Cultural values descriptions and definitions	24
2.6 The types of effects of cultural values on economic outcomes	28
2.7 Some applications of cultural dimensions to economic modelling. The alternatives to the homo economicus model	35
2.8 The beginnings of homo economicus in modern economic science - the theory of Adam Smith	36
2.9 Methodological assumptions of economic theory about human behavior in contrast with sociological theory and the theory of cultural dimensions	37
3 Economic modelling from the cultural perspective	
The Prisoner's Dilemma case	46
3.1 The model	46
3.2 Collectivist values in the Prisoner's Dilemma	48
4 The size of the state from cultural perspective	54
4.1 Hypotheses and methodology. Cultural dimensions	55
4.2 Correlations of Hofstede's cultural dimensions	56
4.3 Some aspects of taxation	57
4.4 Results	60

5	Morality and tax morale. The case of the Czech Republic	65
5.1	The model	66
5.2	The data	66
5.3	Results	67
5.3.1	Principal component analysis	67
5.3.2	Averages	67
5.3.3	Results of regression analysis	68
5.4	Conclusion	69
6	Gender income inequality in cultural setting	70
6.1	Short Literature Review	73
6.2	Decomposing International Gender Based Income Inequality	74
6.3	Inter or Intra Cultural Studies? The Advantages and Disadvantages	75
6.4	Methods	77
6.4.1	Data and Sample Measures – Hofstede's cultural dimensions	77
6.4.2	Independent variables	78
6.4.3	Estimated Regression Equation – Hofstede's cultural dimensions	79
6.4.4	The estimated regression equation is the following	79
6.4.5	Independent variables	80
6.4.6	Comparability Issues	81
6.5	Results	82
6.5.1	Discussion – models with Hofstede's indices	84
6.5.2	Policy recommendations – models with Hofstede's indices	85
6.5.3	Models using World Value Survey data	86
6.5.4	Policy recommendations, WVS models	89
6.6	Conclusion	89
7	Cultural values in international migration and remittances	92
7.1	Methods	92
7.2	Data	95
7.3	Inflow Remittances	96
7.4	Conclusion	98

8	Domestic Material Consumption from Cultural Perspective in European Countries	100
8.1	Introduction and brief literature survey	100
8.2	Methods and data	103
8.3	Results and discussion	106
8.4	Conclusion	107
9	Stability and the direction of causality	109
10	Conclusion	III
