

CONTENTS

Preface (K. Bouzek)	7
General information	8
Part I FINAL PROGRAMME	
Final Programme	11
Part II ORAL PRESENTATIONS	
European Energy Research Alliance – a player in European RnD N. Witzanyová, D. Štric	18
SUSEN – Closing the gap to tomorrow's energy technology J. Richter, K. Stehlík	19
Key Drivers of European Power Market Development – EU Policies and Technology M. Křepelka	20
Insights, perspectives and recommendations for a hydrogen economy in Romania and East Europe I. Iordache, D. Schitea, I. Stefanescu, A. Marinoiu, G. Badea	21
Hydrogen technologies in Czech Republic and their representation by the Czech Hydrogen Technology Platform - HYTEP K. Bouzek, K. Stehlík	22
Hydrogen from Biomass – A Complex Process R. Steinberger-Wilckens, S. Archer	23
Grid-scale solid hydrogen energy storage for multi-utility optimization M. Bertoncini	24
Ti-Au-Pt and Ti-Pd-Pt multilayered magnetron sputtered catalysts for hydrogen energy systems E. Petkucheva, E. Lefterova, J. Heiss, U. Schnakenberg, E. Slavcheva)	25
Proton Exchange Membrane Fuel Cell made of magnetron sputtered Pt-CeOx and Pt-Co thin film catalysts V. Matolin, M. Dubau, R. Fiala, J. Lavková, M. Václavů, M. Vorokhta, I. Matolínová	26

Reduced graphene oxide as an efficient hydrogen evolution electrocatalyst in alkaline water electrolysis – experiments and DFT modelling	
D. Chanda, A. Dobrota, J. Hnát, M. Paidar, I. Pasti, K. Bouzek	27
Properties of novel anion selective material with DABCO functional groups for alkaline water electrolysis	
J. Hnát, J. Žitka, M. Paidar, K. Bouzek	28
Innovative technology of alkaline electrolysis	
J. Poláková, A. Doucek, P. Hájek	29
Feasibility of alkaline water electrolysis with cation-selective membrane	
M. Paidar, K. Vazač, M. Roubalik, K. Bouzek	30
Hydrogen – methane blend as an internal combustion engine fuel	
J. Vávra, M. Takáts	31
Natural gas based steam reformer for PEM FC	
D. R. Park, J. D. Kim	32
Novel high-performance batch mini reactor for hydrogen production from catalytic hydrolysis of sodium borohydride for portable applications	
H. X. Nunes, M. J. F. Ferreira, C. M. Rangel, A. M. F. R. Pinto	33
Development of polymer-dispersed platinum nano-particle for the catalyst of hydrogen production from formic acid	
Y. Amao, A. Kai	34
Study on THT, TBM adsorption properties of mesoporous material for fuel cell	
J. Kim, S. Son, D. Park, B. Kim, J. Kim, W. Bang	35
HT-PEM degradation aspects	
M. Rastedt, F.J. Pinar, N. Pilinski, P. Wagner	36
Kinetics of H_3PO_3 electrochemical oxidation on a bulk Pt electrode	
M. Prokop, T. Bystron, K. Bouzek	37
Degradation of Pt catalyst in high temperature PEM fuel cell	
T. Bystron, M. Prokop, K. Bouzek	38
Investigation of Pt oxidation kinetics at high temperature PEM fuel cell conditions	
R. Kodým, T. Bystron, K. Bouzek	39
Three-dimensional mathematical model of the high temperature PEM fuel cell stack	
M. Drakselová, R. Kodým, D. Šnita, K. Bouzek	40
CFY-stacks for use in stationary SOFC and SOEC applications	
S. Megel, C. Dosch, S. Rothe, N. Trofimenko, M. Kusnezoff, A. Michaelis, C. Bienert, M. Brandner, S. Skrabs, A. Venskutonis, L. S. Sigl	41

Kinetic parameters of oxygen evolution reaction in high temperature water electrolysis process	
F. Karas, R. Kodým, M. Paidar, K. Bouzek	42
Thermal control of solid oxide electrolyser cells / fuel cells with high temperature heat pipes	
M. Dillig, J. Karl	43
Development of high-temperature electrolyzers for renewable electricity storage	
O. Posdziech, J. Brabandt	44
Solid oxide fuel cells efficiency prediction	
P. Vágner, M. Pavelka, F. Maršík	45
Part III	
POSTER PRESENTATIONS	
X-ray Absorption Study of Sputtered Platinum Doped Cerium Oxide Catalyst Used in Proton Exchange Membrane Fuel Cell	
R. Fiala, J. Drnec, M. Václavů, M. Vorokhta, I. Khalakhan, V. Matolín	48
An artificial degradation of gas diffusion layers	
M. Tomáš, I.S. Biswas, P. Gazdzicki, L. Kullová, M. Schulze	49
High temperature PEM fuel cell performance under different operating conditions	
P. Novotný, T. Němec, M. Tomáš, F. Maršík	50
Nanostructured Low Platinum-Content Fuel Cell Catalysts for “On-Chip” Applications	
M. Vaclavu, R. Fiala, M. Vorokhta, I. Khalakhan, I. Matolinova, V. Matolín	51
Pressure drop measurements in the flow fields for PEM fuel cells	
A. Giurg, R. Kodým, M. Paidar, K. Bouzek	52
Comparative study on different Magnelli-phase titania trademarks as catalyst supports for electrolytic hydrogen generation	
I. Boshnakova, E. Petkucheva, E. Lefterova, E. Slavcheva	53
Hydrogen permeability of selected perfluorinated sulphonated membranes in PEM water electrolysis	
J. Mališ, K. Bouzek, M. Paidar	54
Anion-selective catalyst binders for alkaline electrolyzers	
J. Schauer, J. Žitka, J. Hnát, K. Bouzek	55
Review of hydrogen production by high temperature electrolysis	
M. Tkáč, K. Stehlík, M. Kryková	56

Feasibility study of high-altitude long-endurance unmanned aerial vehicles using regenerative fuel cell systems M. Kim, Y.-J. Sohn, T.-H. Yang	57
Using hydrogen as working gas in stirling engine L. Červenka, J. Vávra	58
The conversion of hydrogen and carbon dioxide to methane E. Baraj, S. Vagaský, T. Hlinčík, K. Ciahotný, V. Tekáč	59
Hybrid Reverse Electrodialysis-Hydrogen (RED-H₂) energy system: performance analysis and optimization R. A. Tufa, D. Chanda, R. Kodým, M. Němeček, E. Curcio, K. Bouzek	60
Numerical simulations for portable hydrogen applications A. Milewska, J.M. Hanlon, L.Bravo-Diaz, D.H. Gregory, M. Bielewski	61
 Part IV LIST OF PARTICIPANTS	
List of participants	64
 Part V AUTHOR INDEX	
Author index	68
