

## Contents

Preface.....	3
Contents.....	5
<b>1 Structure of fibrous assemblies</b>	
<b>1.1 Fibers</b>	
1.1.1 Definition of fiber characteristics and their relationships.....	7
1.1.2 Fiber blending.....	14
<b>1.2 Fibrous assemblies – definition and description</b> .....	23
<b>1.3 Packing of fibers in fibrous assemblies</b>	
1.3.1 Definition and interpretation of packing density.....	24
1.3.2 Description of idealized fibrous assemblies on the basis of fiber packing.....	26
1.3.3 Pores between fibers.....	30
<b>1.4 Arrangement of fibers in a fibrous assembly</b>	
1.4.1 Model of fiber orientation in plane.....	43
1.4.2 Orientation of fibers in sections.....	52
1.4.3 Mean sectional area of fiber, coefficient $k_r$ and number of fibers in a section.....	56
1.4.4 Fibrous assemblies with determined orientation; multi-axial textiles.....	65
1.4.5 Remarks to fiber orientation in space.....	71
<b>1.5 Fiber contacts in fibrous assemblies</b>	
1.5.1 Probability of contact between two fibers according to C.M.Van Wyk.....	73
1.5.2 Number of contacts.....	75
1.5.3 Distribution of contact places.....	81
1.5.4 Modification of probability of fiber contacts.....	88
1.5.5 Modification of distribution of fiber contacts.....	93
1.5.6 Modification of parameters of fiber contacts.....	97
<b>1.6 Irregularity of fibrous assemblies</b>	
1.6.1 Concept of irregularity.....	101
1.6.2 Staple fiber slivers - binomial and Poisson distribution.....	103
1.6.3 Sliver produced from clusters of fibers.....	114

## Appendices

P1	Concept of probability and basic relationships in theory of probability.....	132
P2	Adaptation the integral of $\int_0^{\pi/2} \cos \vartheta u(\vartheta) d\vartheta$ for fiber orientation in plane.....	138
P3	Function $f(\psi)$ and its integration.....	141
P4	Summation functions $\sum_{j=1}^N \cos(a\pi j/N)$ , $\sum_{j=1}^N \cos(a\pi j/N)$ .....	145
P5	Function $(e^x - 1)^n$ .....	148
P6	Statistical properties of variable type $y$ .....	154
P7	Arithmetic, geometric, and harmonic means .....	159
P8	Mean number of fibers in non-empty bundles and clusters.....	162
	References .....	167
