

CONTENTS

Guide to the Manual	ix
1. The Roots of Science	1
A. The Greek Alphabet	2
B. Scientific Terms Derived from Greek	2
C. Scientific Terms Derived from Latin	6
D. Greek and Latin Numerical Terms	8
E. Roman Numerals	9
2. Computational Essentials	10
A. Algebra	11
B. Geometry	12
C. Trigonometry	16
D. Analytical Geometry	17
E. Combinatorics	20
F. Basic Integration and Differentiation	21
G. Curves Commonly Used to Fit Biological Data	22
H. Logarithms	31
I. Abridged Tables of Exponential Functions e^x and e^{-x}	34
J. Statistics	36
3. Dictionary of Physics and Physical Chemistry	56
4. Chemistry	91
A. Chemical Elements	92
B. Nomenclature of Inorganic Chemistry	93
C. Classification and Nomenclature of Organic Chemistry	99
D. Chemical Bonds of Biological Importance	119
E. Chemical Reactions and Processes of Biological Importance	124
5. Dictionary of Molecular Biology	141
A. Basic Concepts	142
B. Basic Terms of Molecular Genetics	147
C. Terms of Recombinant DNA Research ..	153

6.	Animal Kingdom	169
	A. Taxonomy	169
	B. Scientific-Common Name Equivalents ...	182
	C. Animal Evolution	193
	D. Propagation and Life Span of Some Mammals and Birds	199
	E. Metabolic Rates of Some Animals	200
7.	Abbreviations, Synonyms, and Symbols	201
	A. Physiology	201
	B. Biological Chemistry and Pharmacology ..	204
	C. Physics and Physical Chemistry	210
	D. Graphics	213
8.	Units of Selected Physical and Chemical Quantities	215
	A. The International System of Units [SI (Système Internationale) System]	215
	B. Dimensions of Some Physical Entities ...	219
	C. Selected Physical Constants	221
9.	Measures (Including Temperature and Conversion Between Metric and American Systems)	222
	A. Metric System	222
	B. Linear Measures	223
	C. Volume	224
	D. Area	225
	E. Dry Measures	226
	F. Weights	226
	G. Temperature	227
10.	Basic Laboratory Procedures	229
	A. Solutions, Buffers, Physiological Salines, and Culture Media	229
	B. Use of Radioactive Tracers	237
	C. Spectrophotometry	247
	Subject Index	251
