Invited Paper

IV J. CHOCOLÁČ, N. ALLISON
Niche Area Networks

Session 1: Design

1 J. HALÁMEK, P. JURÁK, , M. KASAL
Analog Digital Converter - Bits and Dynamic Range

5 M. HUSÁK, Z. BURIAN, , F. VANÍČEK
Application of Flip-Flops for Very Low Signal Detections

9 D. ĎURAČKOVÁ, J. BUTÁŠ
Design of the Communicative Adapter

13 R. VRBA, R. KOMANEC, , V. KOLAŘÍK
BIST Simulator Model

15 J. ZENDULKA
Tools for Designing with Xilinx FPGAs

Session 2: Analogue Circuits

19 M. ALBULET, S. RADU, , V. CEHAN
Class E Tuned Amplifier with RF Choke - Part I: An Accurate Method for Analysis and Design

23 M. ALBULET, S. RADU, , V. CEHAN
Class E Tuned Amplifier with RF Choke - Part II: Out of bans Reponse and Experimental Results

27 V. BAJIĆ
Derivation of Singular Model and Stability Analysis of Response for a Class of Transistorized Networks

31 D. BIOLEK
Semi-Symbolic Steady State Analysis of Dynamical Systems

34 Z. Ž. CVETKOVIĆ, R. A. PETKOVIĆ
Characteristics of Loss Exponential Line Network

38 J. A. ILYUSHIN
On the Semiconductor Diodes Mixer Circuits Design

42 S. KUTA, J. JASIELSKI
CMOS Current Conveyor with Regulated Cascode Circuits

47 J. POSPÍŠIL, J. BRZOBOHATÝ, , M. ŠVAJDA
Scattering Model of a Controlled Gyrator Realized by Multiple-Output Current Amplifiers

51 K. VRBA, J. ČAJKA
Second-order Oscillators and Filters with Current Conveyors CCII+

55 K. ZAPLATÍLEK
Contribution to Steady State Analysis of Switched Networks

Session 3: Diagnostics & Testability

59 J. BRAUN, Z. BERKA, , Z. ŽILKA
Coherent and Noncoherent Sampling in DSP Testing and Diagnosis

63 V. DRÁBEK
Dependability Issues of Medical Electronics

67 L. MALÝ, L. HULÉNYI, , L. ADAMČÍK
A Novel Method of Design Rules Creation and Verification Using Test Chip with Random Access

72 M. ŠVÉDA
Dedicated Electronic Control System

76 Z. ŽILKA, J. BRAUN, , Z. BERKA
Boolean Models for Faults Detection in Analog Systems

Session 3: Diagnostics & Testability

80 H. BRADEANU, R. NEGRU
An Alternative Structure to Shared-delay Implementation of Bandpass Digital Filters

Session 4: Signal Processing

84 D. CÂRSTOIU, S. GRIGORESCU
An Organization Model for the Hardware and Software Designed for a Control System

88 D. CÂRSTOIU, S. GRIGORESCU
On-line Expert System for Tuning Controller Based on DSP and Transputer Architecture

92 S. HALUNGA, O. FRATU
The Number of Codes and the Amplitude Increase Effects on the Transient Behaviour of the DLL and MCTL Structures

96 G. JOVANOVIC, D. KRSTIĆ, , S. ZARKULA
DSP Based Phase Synchronizer

100 V. D. PAVLOVIĆ, P. LEKIĆ
Design of the Second Degree Digital FIR Full-Band Differentiator

104 D. PETRUȚ
Very High Capacity One-Level Digital Switching Network Based on Delta Modulation for the Conversation Signal

108 Z. SMÉKAL
New High-Performance DSP56300 Family

112 D. TARNICERIU, M. GOGU
Effects of Multirate Systems on Few Statistical Proprieties of Random Inputs

Session 5: Modeling & Simulation

116 V. V. APANASOVICH, V. V. PASHKEVICH
Model of Carrier Multiplication in Avalanche Photodiodes

120 Z. BURIAN, F. VANÍČEK
SPICE Models BJT Circuits with h-Parameters

122 M. HORÁK
Richardson Constant, Thermionic Emission and Conservation Laws at Heterojunctions

126 T. PIVOVAR
Power Characterization of Standad Cells Total Capacity

Session 6: Structures

129 L. HARMATHA, L. STUCHLÍKOVÁ, , O. CSABAY
Electrical Characterization of MBE Grown AlGaAs/GaAs Heterostructures

133 L. HULÉNYI, R. KINDER
Simulation of the Doping Profiles of Power DMOS Transistors

137 R. KINDER, L. HULÉNYI, , J. BREZA
Limitation on the Range of Measurements of Doping Profile PN Junction for Profiling by the Capacitance Technique

141 M. MYŠKOVÁ, F. MATĚJKA
Binary Diffraction Structures Fabricated on a Silicon Nitride Membrane

145 J. RACKO, A. GRMANOVÁ, , J. PARÍZEK
Extended Thermionic Emission - Tunneling Theory of the Charge Transport through a Schottky Diode

149 D. RAJNIAK, L. HARMATHA, , M. ŽIŠKA
A Model of Carrier Concentration in Silicon Structures Irradiated with Fast Neutrons at High Fluences

153 L. STUCHLÍKOVÁ, L. HARMATHA, , O. CSABAY
Deep Energy Levels in an AlGaAs-GaAs Heterostructure

Session 7: Sensors

157 A. GRMANOVÁ, D. BUC, , O. VANĚK
Design of a Universal Supporting Micromechanical Module for Chemical Sensors

161 M. HUSÁK, P. ŠEBESTA, , F. VANÍČEK
Sensor System for Pressure Measure of Liver Perfusion

164 V. MYSLÍK, M. METAL, , M. JELÍNEK
Preparation of Laser-Deposited Tin Acetyl Acetonate Thin Films for Use in Gas Sensors

168 M. PŘÁDKA, J. KREJČÍ
Thick Film Conductometric Biosensors - Testing of Bulk Solution Conductivity

171 V. SGÂRCIU, G. IONESCU, , D. CÂRSTOIU

An Electronic Device for Heating Temperature Control of SnO2 Integrated Gas Sensors

175 R. VRBA
System Approach to Self-Diagnostics in Smart Sensors

Session 8: Technology

181 I. HÜTTEL, P. MACHÁČ, , M. CHOMÁT
Polymer Rib Waveguides on Silicon

184 N. KESRI
Semiconducting Thin Films of Tin Oxide Fabricated by Reactive D.C. Sputtering

188 P. MACHÁČ, V. MYSLÍK, , M. VRŇATA
Preparation of Ohmic Contact on InP by Laser Alloying

192 J. ŠKRINIAROVÁ, J. BREZA, , J. KOVÁČ
Citric Acid: Selective or Non-Selective Etchant for InGaAs/GaAs

196 J. ŠTEFKA, T. ŠIKOLA, , L. DITTRICHOVÁ
Simulation and Measurement of the Current Profile of Broad Ion Beams

Session 9: CAD

199 O. ASSENOV
ADD-evristic Algorithm to Solve the Task of Service Points Disposition

203 D. BAILEY
Taming the Gui Dragon

211 S. BJELIĆ, D. MATIC, , M. NERANDZIC
Computer Aided Design for Supervisory Control SCADA of Electric Power Systems

216 J. ČECHÁK
Geophone Sensing Eigenvalue Based Technique II

220 M. EYSSELT
The Contribution to the Generalised Reed-Muller Expansions Generated by Software

224 G. S. POPESCU
Extrapolation Algorithm for Timing Simulation of Large Linear or Linearized Circuits

228 J. SCHWARZ
Placement Optimization by Decomposition Methods

Session 10: Education

232 D. GRISHIN, V. V. LOGINOVA, , B. M. LOGINOV
Simulation of Two-level Educational Course Construction Processes

236 D. GRISHIN, V. V. LOGINOVA, , B. M. LOGINOV
Non-traditional Construction of Two-level Educational Process

240 F. IONESCU, C. GRIGORESCU
Software Package for Parallel Computing Training

244 I. SZENDIUCH
New Approach to Hybrid Microelectronics

248 V. ŠEBESTA
Matlab in Sophomore-Level Course

Session 11: Neural Networks

250 J. BALICKI
Recurent Artificial Neural Networks for Solving Square Multiobjective Optimization Problems

254 J. KADERKA
Applying Saber System to the Simulation of Analogue Neurones

258 A. LEUCIUC
Chaos Synchronization Possibilities in a Class of Duffing Circuits

262 D. ĎURAČKOVÁ, D. ŠULÍK
A New Simplified Model of Cellular Networks

Poster Sessions

1: Design

266 M. BAXANT
High Voltage Power Supply for the Dielectric Barrier Discharge

269 M. HRDLIČKA, M. ŠVÉDA
ASI Tree

273 D. F. CHIPER
An Efficient VLSI Array for Computing IDCT

277 M. KRKOŠKA
Design of EEPROM Interface for Mistral2's Microprocessor and Serial External EEPROM

281 D. KRSTIĆ, A. VASIC
On a Frequency Response on Non-linear PLL FM Demodulators in the Presence of FM Signals

285 L. MALÝ, D. GEVAERT, , J. VANNEUVILLE
An Automatic Technology Independent Library Development for Submicron CMOS

290 M. MUSIL
On the Use of Strain Gage Amplifier for Current Output with Monolithic Instrumentation Amplifier

294 V. MUSIL
A TQM Aproach for EMC Management and Planning

297 V. MUSIL
Designing to Eliminate EMC Problems

303 L. PANTŮČEK
Inter Integrated Circuits Bus I2C

307 M. ŠIMČÁK
Tone Synthesis by Means of Frequency Modulation

311 I. VEČEŘA
Pipilined A/D Converer Using Switched-Current Technique

316 K. VLČEK, J. POPELEK
Analog Hardvare Description Language (VHDL-A) and its Relations to VHDL

2: Analogue Circuits

320 V. BAJIĆ
Stability Robustness of Linear Time-Varying RLCM Networks under the Failure of Resistors

324 P. HORSKÝ
RC Oscilators with Precision Phase between Two Outputs

328 B. STRAKA, R. VRBA
Noise Analysis of Wideband I-V Converters

332 M. ŠVAJDA
CMOS Instrumentation Amplifier Based on Current-Conveyors

3: Diagnostics & Testability

336 E. BEZVESILNAJA
Computer System Interruption Rate Analysis - Concepts and Measurements

4: Signal Processing

339 P. VANĚK
Sophisticated Data Acquisition System

5: Modeling & Simulation

343 M. HORÁK
Quantum Mechanics of Electrons with Different Effective Masses

347 T. PIVOVAR
Consideration about Total Capacity Estimation for Standart Cells

350 J. POPELEK, R. FOLLNER
The Modified Huygens-Fresnel Principle Versus Rigorous Vector Theorz of Difraction

354 M. RECMAN
The MOS FET Modeling for Statistical Circuit Simulation

7: Sensors

358 J. KREJČÍ, M. KRAUS, , M. PŘÁDKA
Nonlinear Two-Points Calibration of Biosensors

362 J. KUŘÍK, P. LEGÁT
Tenzometric Dynamic Crossing Scale

366 R. ŠLECHTICKÝ
Physical Phenomena Employed on Sensor Design

8: Technology

370 I. SZENDIUCH
Approach to Multi Chip Modules

374 I. SZENDIUCH
Managing Process Control for Surface Mount Technology

378 J. ŠANDERA
Conductive Adhesives and Application in SMT

9: CAD

382 J. ZENDULKA
Program for Demonstration of Scheduling and Allocation in High-Level Synthesis

11: Neural Networks

386 J. BALICKI, Z. KITOWSKI, , B. ŻAK
Hopfield's Analog Neural Networks for Computer Network Design
