SYNOPSIS OF THE BOOK..... 9

1. HUMAN BEINGS AND THE ENVIRONMENT 10

2. PHYSICAL WORKING ABILITY..... 12

2.1. Sex 15

2.1.1. The Differentiated Course of Female's Physiological Functions..... 15

2.1.2. Comparison of the Physiological Working Ability of a Male and Female 17

2.2. Age..... 19

2.3. Weight and Height..... 21

2.4. Adaptation 21

2.5. Physical Condition..... 22

2.5.1. Dehydration..... 22

2.6. Interaction between physical working ability and environment level.. 29

2.6.1. Maximum Oxygen Consumption..... 29

2.6.1.1. The Interaction of Maximum Oxygen Consumption and Environment Level..... 30

2.6.2. Work Efficiency 31

3. PSYCHIC WORKING ABILITY 35

3.1. Sex 36

3.2. Age..... 36

3.3. Physical Condition.....	36
3.4. Intelligence Level.....	36
3.5. Faculty.....	37
3.6. Motivation.....	37
3.7. Deprivation	37
4. WORKING ABILITY ENABLED BY CLOTHING... 38	
4.1. The Impact of the clothing of constant thermal insulation and changing water vapour permeability.....	42
4.1.1. Constant Climate and Work Rate.....	42
4.1.2. Cyclic Changes of Air Temperature	44
4.1.3. Cyclic Changes of Work Load.....	46
4.2. The impact of the clothing of varying thermal insulation	48
4.3. The impact of clothing of different styles.....	50
4.4. Comments	52
5. ENVIRONMENT LEVEL	54
6. ORGANISM RESTITUTION	58
6.1. Sleep	58
6.1.1. Reduced Sleep Impact on Experimental Work.....	60
6.1.2. Reduced Sleep Impact on Experimental Work in an Ordinary and a Hot Environment	64
6.1.3. Interaction Among the Lack of Sleep, the Clothing and Work Time.....	71

6.2. Biorhythms	73
6.2.1. Short term Biorhythms	73
6.2.1.1. Three Shift Work Problems	74
6.2.2. Long-term Biorhythms	76
6.3. Biometeorological factors.....	83
6.3.1. Biometeorological Factors and Traffic Accidents	83
6.3.2. Biometeorological Factors and Record Performances at the Boston Marathon.....	83
6.4. Fatigue.....	85
6.4.1. The Problem of Measuring Fatigue.....	88
6.4.2. Effective Methods for Reducing Fatigue	94
6.4.2.1. Reducing the Work Load	95
6.4.2.2. Reducing the Heat Load	97
6.4.2.3. Organizing Adequate Rest Periods	97
6.4.2.4. Organizing Adequate Teams of Workers	99
6.4.2.5. Influence of Adequate Water and Salt Supply.....	101
6.4.2.6. Selection of Workers	103
6.4.3. Illnesses Caused by Fatigue	106
6.4.3.1. Professional Diseases	106
6.4.3.2. Illnesses Produced by Leisure Activities.....	107
6.4.3.3. Syndrome of Chronic Fatigue (SCF).....	107
7. TOTAL WORKING ABILITY	109
8. PERFORMANCE.....	110
8.1. Physical performance.....	111
8.1.1. Hygrothermal Microclimate	117
8.1.1.1. Optimal Hygrothermal Microclimate.....	129

8.1.1.1.1. Human Performance and Optimal Microclimate.....	131
8.1.1.2. Hot Tolerable Hygrothermal Microclimate	137
8.1.1.2.1. The Effects of the Hot, Tolerable Microclimate on Human Performance	138
8.1.1.2.2. The Effect of Tolerable Microclimate on Accident Rate.....	140
8.1.1.2.3. Hot Microclimate Tolerable for a Long Time and for a Short Time.....	142
8.1.1.3. Cold Microclimate Tolerable for a Short Time	174
8.1.2. Toxic Microclimate	174
8.1.3. Aerosol Microclimate	175
8.1.4. Light Microclimate	176
8.1.5. Geomagnetic Microclimate.....	177
8.2. The Effect of microenvironment on mental performance.....	178
8.2.1. Hygrothermal Microclimate	178
8.2.2. Toxic Microclimate	183
8.2.3. Electroionic Microclimate	184
8.2.4. Acoustic Microclimate	187
8.2.4.1. Some Noise Control Measures.....	189
8.2.4.2. Conclusions	195
8.2.5. Light Microclimate.....	196
8.2.6. "Psychic Microclimate"	197
8.3. Conclusions.....	198
8.3.1. An Example from Practice.....	198
8.3.2. Personal Environment.....	201
Bibliography.....	204
