Prof. Jan Mergentaler	iii
Preface to the First Consultation	vi
List of participants of the First Consultation	ix
Contents of the First Consultation	xi

ACTIVE REGIONS

Solar active longitudes and longitudinal concentration of flaring active regions V. BUMBA (review paper)	1
A study of activity in interacting sunspot groups B. SCHMIEDER, L. VAN DRIEL-GESZTELYI, J.-C. HÉNOUX	13
Sunspot motion and flare occurrences L. DEZSŐ AND Á. KOVÁCS	17
Why does the radio activity accompanying the flares in the two large active regions of June 1982 differ so much? V. BUMBA, M. KLVAŇA	21
Flare activity and photoelectric measurements of magnetic and velocity fields M. KLVAŇA, V. BUMBA	25
Electric currents and $H\alpha$ emission in the active regions on the Sun (abstract) V.I. ABRAMENKO, S.I. GOPASYUK, M.B. OGIR	30
Forecast of the maximum of the next 11-year cycle of sunspots No. 23 (abstract) M. KOPECKÝ	31
Soft X-emission of flares, prominences, active regions and X-bright points (abstract) L. KŘIVSKÝ	32
Magnetic field gradients and X-ray emissions for solar activity (abstract) B. VALNÍČEK, M. ŠERŠEŇ	33

FLARE OBSERVATIONS

The influence of HXIS on our appreciation of solar flares G.M. SIMNETT (review paper)	34
Comparison of flare evolution in H α and soft X-rays M. TOMCZAK	57
Microflares and active filaments B. SCHMIEDER, J. FONTENLA AND E. TANDBERG-HANSEN	63
Do sympathetic flares really exist? V. BUMBA, M. KLVAŇA	67
June 26, 1983, 14:07 UT 300 keV, 3B/M7 east-limb solar flare A. ANTALOVÁ, M.B. OGIR	71
The LDE flares (1969-1990) A. ANTALOVÁ, B. VIKTORÍNOVÁ	75
Flares activity during solar cycle 21 S. DINULESCU AND V. DINULESCU	79
The feature of the H α -flare and cm-burst development on 12 July, 1982 O.A. GOLUBCHINA, M.B. OGIR, G.N. ZOGBKOVA	85
Flares above sunspots and magnetic fields (abstract) A.N. BABIN, A.N. KOVAL	89
The observations of solar flares in the H α and HeI λ 10830 line (abstract) E.A. BARANOVSKY, M.B. OGIR, N.N. STEPANIAN, A.V. SHUMKO	90
Iron and calcium abundances in solar flares from the multitemperature analysis of X-ray spectra (abstract) A. FLUDRA, R.D. BENTLEY, J.L. CULHANE, J.R. LEMEN, J. SYLWESTER	91
The dependence of flare energetics on the localization and evolution of flare knots (abstract) V.N. ISHKOV	92
On the source height of decimetre-wave burst emission (abstract) A. KRÜGER, B. KLIEM, J. HILDEBRANDT, M. KARLICKÝ, P. ZLOBEC	93
Analysis of the flare evolution in the emission measure - temperature diagrams for selected events observed by SMM (abstract) B. SYLWESTER, J. SYLWESTER, M. SIARKOWSKI, A. FLUDRA, S. SERIO	94

THEORY OF FLARES

Solar flare MHD processes E.R. PRIEST (review paper)	95
Non-LTE analysis of the iron line emission in the solar flares E.A. BARANOVSKY, E.V. KUROCHKA	121
Turbulent model of the flare energy release J. JAKIMIEC	124
Generation of Langmuir waves in neutral beam-plasma system M. KARLICKÝ, M. MESSEROTTI, P. ZLOBEC	133
A chromospheric response to pulse beam heating (abstract) P. HEINZEL	137
Some magnetohydrodynamic aspects of the problem of solar surge formation and dynamics (abstract) V.N. DERMENDJIEV	138
Magnetic energy release in solar flares (abstract) T.G. FORBES	139
Quadratic function in short-term prediction of flare activity (abstract) M. JAKIMIEC	140

SOLAR CORONA

Magnetic mechanisms for heating the corona E.R. PRIEST (review paper)	142
Numerical model for coronal shock waves formation in two-fluid approximation A.G. KOSOVICHEV, T.V. STEPANOVA	167
Structure of the white-light corona on July 22, 1990 E. MARKOVÁ, L. VYSKOČIL, V. RUŠIN, M. RYBANSKÝ	169
Relation of coronal mass ejections to soft X-ray and microwave bursts I.M. CHERTOK, A.A. GNEZDILOV AND E.P. ZABOROVA	173
Loop model of coronal X-ray emission of RS Canum Venaticorum binaries P. PREŠ AND P. MAJER	177

SOLAR PROMINENCES

Prominence investigations at the Wroclaw observatory B. ROMPOLT (review paper)	182
Problems in prominence NLTE modeling P. HEINZEL (review paper)	195
Height variations of prominence plasma parameters P. KOTRČ, P. HEINZEL, J.-C. VIAL, B. ROMPOLT	208
On measurements of electric fields in solar limb events P. KOTRČ	212
A comment on the structure of the quiescent prominence magnetic field configuration P. AMBROŽ	218
Rotational motion of material in surges B. ROMPOLT, A. MIŃKO-WASILUK AND A. BERLICKI	225
Behaviour of solar active prominence A. KUČERA, J. RYBÁK AND M. SANIGA	232
Numerical simulations of spicule-like features A.S. ANDREEV	236
Quiescent prominence versus Bloch wall in ferromagnetic substance M. SANIGA	240
Time distribution of the long-lived solar filaments in the year 1931 - 1987 (abstract) P.I. DUKHLEV	244
Time-latitude distribution of the solar prominences observed at Lomnický Štít coronal station in the years 1987 - 1990 (abstract) V. RUŠIN, V.N. DERMENDJIEV, M. RYBANSKÝ, K.Y. STAVREV	245
Toward the He to H full intensity ratios in quiescent prominences with filamentary structure (abstract) V.V. ZHARKOVA, N.N. MOROZHENKO	246
List of participants	247
Author Index	249
