PREFACE	3
1. INTRODUCTION	7
1.1 Motor performance as a research problem	7
1.2 Motor performance of students of Physical Education – summary of knowledge	8
2. RESEARCH PROJECT	12
3. METHODS	14
3.1 Surveyed population; schools involved in the survey	14
3.2 Indicators of motor performance and somatic dimensions	17
3.3 Gathering and statistical processing of data	20
4. RESULTS AND DISCUSSION	22
4.1 Overall results, differences between PE and U populations, comparison by faculty and year	22
4.1.1 Standing broad jump	22
4.1.2 100-metre run	32
4.1.3 12-minute run	43
4.1.4 Pull-ups and flexed-arm hang	55
4.1.5 100-metre swim	63
4.1.6 Height	67
4.1.7 Weight	71
4.1.8 Summary and interpretation	75
4.2 Bisexual differences in motor performance and in basic somatic dimensions	82
4.3 Intercorrelations between motor test scores and somatic measurements	90
5. SUMMARY AND CONCLUSIONS	93
SUMMARY IN CZECH	96
SUMMARY IN GERMAN	99
REFERENCES	103
SUPPLEMENTS	107
A.1 Tables of detailed results (primary processing of data)	107
A.2 Comparison of current research findings with earlier surveys	121
B Characteristics of faculties participating in the research	
B.1 Faculty of Physical Culture, Palacký University, Olomouc, Czech Republic	122
B.2 Academy of Physical Education in Katowice, Poland	123

B.3	Faculty of Physical Education and Sport, Comenius University, Bratislava, Slovak Republic	124
B.4	Faculty of Sport, University of Ljubljana, Slovenia	125
B.5	Institut of Sport Sciences, University of Innsbruck, Austria	126
