

CONTENTS

1	INTRODUCTION	5
2	SELECTION OF STUDY BASINS	6
3	CLIMATE CHANGE SCENARIOS	8
4	DESCRIPTION OF THE BILAN WATER BALANCE MODEL	9
4.1	Basic information	9
4.2	Description of the model	10
4.3	Optimisation of parameters	14
4.4	List of symbols and parameters of the model	15
5	CALIBRATION OF THE MODEL PARAMETERS FOR THE STUDY BASINS	17
6	RESULTS OF SIMULATION AND CLIMATE CHANGE IMPACTS	19
6.1	Air temperature	19
6.2	Precipitation	19
6.3	Potential evapotranspiration and basin evaporation	20
6.4	Total runoff	20
6.5	Low flow regime	21
6.6	Flood flow regime	22
6.7	Base flow	22
6.8	Components of water storage	23
7	WATER RESOURCES IN RESERVOIRS UNDER CONDITIONS OF CLIMATE CHANGE	24
7.1	Impacts of climate change on inflow to reservoirs	24
7.2	Impacts on water resources in reservoirs	25
8	SUMMARY OF RESULTS AND CONCLUSIONS	26
