

# Contents

Preface	xiii
List of acronyms and abbreviations used in this book	xv
<b>Part I. General considerations</b>	<b>1</b>
Chapter 1 Safety precautions in handling rabies virus ( <i>M. M. Kaplan</i> )	3
Properties of the virus	3
Pathogenesis	3
Laboratory precautions	4
Treatment of wounds	5
Pre-exposure immunization	6
References	7
Chapter 2 An overview of laboratory techniques in the diagnosis and prevention of rabies and in rabies research ( <i>F.-X. Meslin &amp; M. M. Kaplan</i> )	9
Introduction	9
Diagnostic procedures for antigen detection	10
Tests for the determination of rabies antibody	13
Potency tests	14
Research techniques	15
Conclusion	16
References	16
Chapter 3 Characteristics and molecular biology of the rabies virus ( <i>N. Tordo</i> )	28
Introduction	28
Morphology and structure	28
Functional analysis of the infection	32
Molecular biology of the rabies virus	36
Evolution of the rabies virus	43
References	45
<b>Part II. Routine laboratory procedures</b>	<b>53</b>
Chapter 4 Rapid microscopic examination for Negri bodies and preparation of specimens for biological tests ( <i>E. S. Tierkel &amp; P. Atanasiu</i> )	55
Dissection of the brain	55

## LABORATORY TECHNIQUES IN RABIES

	Preparation of slides	55
	The Negri body: differential diagnosis	59
	The mouse inoculation test	60
	Annex Preparation of Sellers' stain	62
Chapter 5	Histopathological diagnosis ( <i>P. Lépine &amp; P. Atanasiu</i> )	66
	Removal of the brain and preparation of tissue samples for examination	68
	Embedding, staining and examination for Negri bodies	77
Chapter 6	The mouse inoculation test ( <i>H. Koprowski</i> )	80
	Choice of mice	80
	Preparation of suspect material for inoculation	81
	Inoculation of mice	83
	Observation of inoculated mice	84
	Further passages of infected material	85
	Removal of the brain	85
	Complications	86
Chapter 7	The fluorescent antibody test ( <i>D. J. Dean, M. K. Abelseth &amp; P. Atanasiu</i> )	88
	Principle	88
	Materials and methods	89
	Discussion	93
Chapter 8	Virus isolation in neuroblastoma cell culture ( <i>W. A. Webster &amp; G. A. Casey</i> )	96
	Rabies tissue-culture infection test (RTCIT)	97
	References	101
	Annex 1 Media	102
	Annex 2 Avidin-biotin staining method	103
Chapter 9	Rapid rabies enzyme immunodiagnosis (RREID) for rabies antigen detection ( <i>H. Bourhy &amp; P. Perrin</i> )	105
	Introduction	105
	Method	105
	Evaluation of the technique	111
	References	111
	Annex Preparation of reagents	112
Chapter 10	Cell culture of rabies virus ( <i>A. A. King</i> )	114
	Susceptible cells, cell lines and strains	114
	Methods of virus propagation	115
	Cytopathology	117
	Persistent infection	117
	Virus in infected cells	118
	Application of cell-culture methods	119
	References	122

<b>Part III. Special diagnostic and research techniques</b>	<b>131</b>
<hr/>	
Chapter 11 Techniques for the production, screening and characterization of monoclonal antibodies ( <i>M. Lafon</i> )	133
Immunization of animals	133
Myelomas	134
Fetal calf sera	134
Fusion	134
Screening of hybridoma supernatants	136
Cloning of hybridomas by limiting dilution	139
Production of large amounts of monoclonal antibodies	139
Freezing and thawing of hybridomas	140
Characterization of monoclonal antibodies	141
Use of monoclonal antibodies	142
References	142
Annex Dulbecco's modified Eagle's medium (DMEM)	144
Chapter 12 Monoclonal antibodies for the identification of rabies and non-rabies lyssaviruses ( <i>J. S. Smith &amp; A. A. King</i> )	145
Materials and methods	145
Immunofluorescence tests using MAb-RNPs	147
Antigenic analysis using MAb-Gs	147
Applications	148
Discussion	155
References	155
Chapter 13 The polymerase chain reaction (PCR) technique for diagnosis, typing and epidemiological studies of rabies ( <i>N. Tordo, D. Sacramento &amp; H. Bourhy</i> )	157
Introduction	157
Amplification of the rabies transcripts	157
Diagnosis	159
Typing and molecular epidemiological studies	164
References	169
Annex Preparation of buffers and reagents	170
Chapter 14 Techniques for the purification of rabies virus, its subunits and recombinant products ( <i>B. Dietzschold</i> )	175
Introduction	175
Purification of rabies virus particles	175
Purification of rabies virus subunits and structural proteins under non-denaturing conditions	176
Purification of rabies virus proteins under denaturing conditions	178
References	179
Annex Preparation of reagents	179
Chapter 15 A rapid fluorescent focus inhibition test (RFFIT) for determining rabies virus-neutralizing antibody ( <i>J. S. Smith, P. A. Yager &amp; G. M. Baer</i> )	181

## LABORATORY TECHNIQUES IN RABIES

Standard procedure	181
Calculation of virus-neutralizing antibody titres	185
Alternative test procedures	186
Interpretation of results	187
References	188
Annex 1 Growth media for MNA and BHK-21 S13 cells	190
Annex 2 Calculation of titres	191
Chapter 16 An <i>in vitro</i> virus neutralization test for rabies antibody (C. V. Trimarchi, R. D. Rudd & M. Safford, Jr)	193
Method	193
Interpretation of results	198
References	198
Chapter 17 Competitive ELISA for the detection of rabies virus-neutralizing antibodies (L. D. Elmgren & A. I. Wandeler)	200
Method	201
Interpretation of results	204
References	204
Annex 1 Preparation of buffers and reagents	206
Annex 2 Conjugation of monoclonal antibodies	207
Annex 3 ELISA software	207
Chapter 18 Electron microscopy (K. Hummeler & P. Atanasiu)	209
Structural studies	209
Studies of morphogenesis	209
Annex Medium for agarose: Eagle's basal medium (EBM)	216
<b>Part IV. Methods of vaccine production</b>	<b>219</b>
<b>Section A. Brain-tissue vaccines</b>	<b>221</b>
Chapter 19 General considerations in the production and use of brain- tissue and purified chicken-embryo rabies vaccines for human use (F.-X. Meslin & M. M. Kaplan)	223
Introduction	223
Adverse effects of brain-tissue vaccines	224
Recent developments in brain-tissue vaccine production	226
References	228
Chapter 20 $\beta$ -Propiolactone-inactivated sheep brain vaccine (H. Singh)	234
Composition	234
Preparation of the seed virus	234
Preparation of the vaccine	235
Quality control tests	237
Biochemical tests	238
Preparation of standard vaccine	240
Dosage schedule	240
References	241
Annex 1 Preparation of 0.5 mol/l sodium-potassium phosphate buffer, pH 7.6	241

Annex 2	Preparation of 0.05 mol/l phosphate-buffered saline (PBS), pH 7.0	242
Annex 3	Preparation of stabilizer for rabies vaccine, pH 7.2	242
Chapter 21	Suckling-mouse brain vaccine ( <i>A. M. Díaz</i> )	243
	Formula	243
	Preparation of the inoculum	243
	Inoculation and harvest	244
	Preparation of the vaccine	245
	Control tests	245
	Expiry date	247
	References	247
Annex 1	Ultraviolet irradiation for inactivation of vaccines	248
Annex 2	Preparation of stabilizer solutions	250
<b>Section B. Embryonating egg vaccines</b>		<b>251</b>
Chapter 22	Purified duck-embryo vaccine for humans ( <i>R. Glück</i> )	253
	Preparation of the vaccine	253
	Control tests	257
	Expiry date	258
	References	258
Annex	Preparation of stabilizing medium	258
Chapter 23	Chicken-embryo vaccine for dogs ( <i>H. Koprowski</i> )	260
	Preparation of the vaccine	260
	Control tests	265
	References	266
Annex	Preparation of stabilizing solution, pH 7.6	266
<b>Section C. Cell-culture vaccines</b>		<b>269</b>
Chapter 24	Cell-culture vaccines for human use: general considerations ( <i>K. G. Nicholson</i> )	271
	Human diploid cell vaccine	271
	Other cell-culture vaccines	271
	Safety	272
	Efficacy	274
	Economical post-exposure treatment regimens	275
	Pre-exposure immunization	276
	References	276
Chapter 25	Vaccine for humans prepared in human diploid cells ( <i>R. Branche</i> )	280
	Preparation of the vaccine	280
	Control tests	281
	Conclusion	283
	References	283
Annex	Flow chart for the production of HDC vaccine using the MRC5 cell strain	284

## LABORATORY TECHNIQUES IN RABIES

Chapter 26	Purified Vero cell vaccine for humans ( <i>B. Montagnon &amp; B. Fangeſ</i> )	285
	Cell cultures	285
	Preparation of the vaccine	286
	Control tests	287
	Expiry date	288
	References	288
Chapter 27	Purified chick-embryo cell vaccine for humans ( <i>R. Barth &amp; V. Franke</i> )	290
	History	290
	Preparation of the vaccine	290
	Control tests	292
	Administration of the vaccine	293
	Expiry date	293
	Laboratory tests	294
	References	294
Chapter 28	Fetal rhesus monkey lung diploid cell vaccine for humans ( <i>R. Barth &amp; V. Franke</i> )	297
	History	297
	Preparation of the vaccine	297
	Control tests	298
	Expiry date	299
	Administration of the vaccine	299
	Laboratory tests	299
	References	299
Chapter 29	Dog kidney cell vaccine for humans ( <i>R. Barth, V. Franke &amp; G. van Steenis</i> )	301
	Preparation of the vaccine	301
	Control tests	302
	Administration of the vaccine	303
	References	303
	Annex Preparation of medium 199	303
Chapter 30	Primary hamster kidney cell vaccine for humans ( <i>R. Barth, V. Franke &amp; F. T. Lin</i> )	306
	Preparation of the vaccine	306
	Control tests	307
	Expiry date	308
	Administration of the vaccine	308
	References	308
	Annex Hanks' balanced salt solution	309
Chapter 31	Vnukovo-32 primary hamster kidney cell vaccines for humans ( <i>R. Barth, V. Franke &amp; M. A. Selimov</i> )	310
	Preparation of the vaccines	310
	Control tests	312
	Administration of the vaccines	312
	References	312

## CONTENTS

Chapter 32	Cell-culture vaccines for veterinary use ( <i>P. Reculard</i> )	314
	Substrates for the production of seed virus and vaccine	314
	Preparation of the vaccines	316
	Manufacturing requirements for cell-culture rabies vaccines and recommendations for their use	318
	Planning a facility for the production of rabies vaccine for veterinary use	321
	References	322
Chapter 33	Modified live-virus rabies vaccines for oral immunization of carnivores ( <i>J. Blancou &amp; F.-X. Meslin</i> )	324
	Modified live-virus vaccines	324
	Guidelines for assessing the safety and efficacy of MLV vaccines	330
	References	331
	<b>Section D. Genetically engineered vaccines</b>	<b>339</b>
Chapter 34	General considerations in the use of recombinant rabies vaccines for oral immunization of wildlife ( <i>C. E. Rupprecht, C. A. Hanlon &amp; H. Koprowski</i> )	341
	References	344
Chapter 35	Expression of rabies proteins using prokaryotic and eukaryotic expression systems ( <i>B. Dietzschold</i> )	347
	Prokaryotic expression systems	347
	Eukaryotic expression systems	347
	References	350
	<b>Part V. Vaccine safety and tests for potency and antigen quantification</b>	<b>353</b>
Chapter 36	General considerations in testing the safety and potency of rabies vaccines ( <i>P. Sizaret</i> )	355
	References	358
Chapter 37	The NIH test for potency ( <i>L. A. Wilbur &amp; M. F. A. Aubert</i> )	360
	Standard test	360
	Modified NIH test	365
	References	368
	Annex Preparation of Challenge Virus Standard (CVS) diluent, pH 7.6	368
Chapter 38	Habel test for potency ( <i>K. Habel</i> )	369
	Standard test	369
	Modified Habel test	370
	Annex Calculating 50% end-point dilutions by the method of Reed & Muench	371
Chapter 39	Guinea-pig potency test for chicken-embryo vaccine ( <i>H. Koprowski</i> )	374
	Immunization procedure	374

**LABORATORY TECHNIQUES IN RABIES**

	Preparation of challenge material	374
	Challenge of the guinea-pigs	376
	Interpretation of results	376
Chapter 40	Single radial immunodiffusion test for the determination of the glycoprotein content of inactivated rabies vaccines ( <i>M. Ferguson</i> )	378
	Principle	378
	Materials	378
	Method	379
	Interpretation of results	381
	References	382
	Annex Preparation of Dulbecco's phosphate-buffered saline solution A (PBSA), pH 7.2	382
Chapter 41	Enzyme-linked immunosorbent assay (ELISA) for the determination of the glycoprotein content of rabies vaccines ( <i>P. Perrin, M. Lafon &amp; P. Sureau</i> )	383
	Principle	383
	Preparation of antibodies	383
	Precautions	383
	Sensitization of microtitration plates	384
	Assay procedure	384
	Interpretation of results	386
	Evaluation of <i>in vitro</i> potency	387
	References	387
Chapter 42	The Essen-ELISA for the determination of the glycoprotein content of inactivated cell-culture rabies vaccines ( <i>O. Thraenhart</i> )	389
	Principle	389
	Method	389
	Evaluation of results	391
	References	393
	Annex Preparation of buffers and reagents	393
Chapter 43	The modified antibody-binding test for <i>in vitro</i> quantification of rabies virus antigen in inactivated rabies vaccines ( <i>R. Barth</i> )	394
	Principle	394
	Method	394
	Interpretation of results	395
	Evaluation of the test	395
	References	396
<b>Part VI. Antirabies serum and immunoglobulin</b>		<b>399</b>
Chapter 44	Production of antirabies serum of equine origin ( <i>T. Luekrajang, J. Wangsai &amp; P. Phanuphak</i> )	401
	Introduction	401
	Method	401

**CONTENTS**

Factors affecting the production of ERIG	402
Safety	403
References	403
 Chapter 45 Purification techniques for heterologous rabies antiserum ( <i>R. Glück &amp; D. Labert</i> )	 405
Preservation and storage of serum or plasma	405
Purification by enzyme treatment and heat denaturation	406
Purification by precipitation using ethacridine lactate and ethanol	408
Stabilization and preservation of purified HRIG	409
Standardization of the final product	409
References	409
Annex Preparation of buffers	410
 Chapter 46 Production of human rabies immunoglobulin ( <i>P. Fournier &amp; R. K. Sikes</i> )	 411
Introduction	411
Formula	411
Source and shipment of blood	411
Reagents	412
Technique	412
Disadvantages	415
References	415
Annex Preparation of reagents	416
 Chapter 47 Potency test for antirabies serum and immunoglobulin ( <i>E. A. Fitzgerald</i> )	 417
Principle	417
Preparation and titration of challenge virus	417
Serum-virus neutralization	418
Interpretation of results	419
Currently used potency tests	420
References	421
 <b>Appendices</b>	 <b>423</b>
<hr/>	
Appendix 1 Simple technique for the collection and shipment of brain specimens for rabies diagnosis ( <i>J. Barra</i> )	425
Appendix 2 Techniques for the preparation of rabies conjugates ( <i>P. Perrin</i> )	433
Appendix 3 Methods for the calculation of titres ( <i>M. F. A. Aubert</i> )	445
Appendix 4 Addresses of international institutions for technical cooperation in rabies control	460
Index	469
