Part I

A FRAMEWORK FOR FINANCIAL DECISIONS

Chapter 1

An overview of financial management 3

1.1 Introduction	4
1.2 The finance function	5
1.3 Investment and financial decisions	6
1.4 Cash – the lifeblood of the business	7
1.5 The emergence of financial management	8
1.6 The finance department in the firm	9
1.7 The financial objective	10
1.8 The agency problem	11
1.9 Managing the agency problem	12
1.10 Social responsibility and shareholder wealth	13
1.11 The corporate governance debate	14
1.12 The risk dimension	16
1.13 The strategic dimension	17
Summary	20
Key points	20
Further reading	21
Questions	22

Chapter 2

The financial environment 24

2.1 Introduction	25
2.2 Financial markets	25
2.3 The financial services sector	27
2.4 The London Stock Exchange (LSE)	30
2.5 Are financial markets efficient?	34
2.6 A modern perspective – chaos theory	41
2.7 Short-termism in the City	43
2.8 Reading the financial pages	44

Chapter 3

Present values and financial arithmetic 60

3.1 Introduction	61
3.2 Measuring wealth	61
3.3 Time-value of money	62
3.4 Financial arithmetic for capital growth	63
3.5 Present value	65
3.6 Present value arithmetic	68
3.7 Valuing bonds	71
3.8 Net present value	73
Summary	77
Key points	77
Further reading	77
Appendix I: The term structure of interest rates and the yield curve	78
Appendix II: The investment–consumption decision	79
Appendix III: Present value formulae	84
Questions	86

Chapter 4

Valuation of assets, shares and companies 88

4.1 Introduction	89
4.2 The valuation problem	89
4.3 Valuation using published accounts	90
4.4 Valuing the earnings stream: P:E ratios	96
4.5 EBITDA – a halfway house	98
4.6 Valuing cash flows	98
4.7 The DCF approach	100
4.8 Valuation of unquoted companies	103
4.9 Valuing shares: the Dividend Valuation Model	104
4.10 Problems with the Dividend Growth Model	106
4.11 Shareholder value analysis	109
4.12 Economic Value Added (EVA)	111

Summary	112
Key points	113
Further reading	113
Questions	114

Part II

INVESTMENT DECISIONS AND STRATEGIES

Chapter 5

Investment appraisal methods	121
5.1 Introduction	122
5.2 Cash flow analysis	122
5.3 Investment techniques – net present value	123
5.4 Internal rate of return	125
5.5 Profitability index	127
5.6 Payback period	128
5.7 Accounting rate of return	129
5.8 Ranking mutually exclusive projects	130
5.9 Investment evaluation and capital rationing	134
Summary	137
Key points	137
Further reading	138
Appendix I: Modified IRR	138
Appendix II: Multi-period capital rationing and mathematical programming	139
Questions	144

Chapter 6

Project appraisal – applications	147
6.1 Introduction	148
6.2 Incremental cash flow analysis	148
6.3 Replacement decisions	151
6.4 Inflation cannot be ignored	153
6.5 Taxation is a cash flow	155
6.6 Use of DCF techniques	157
6.7 Traditional appraisal methods	159
Summary	163
Key points	163
Further reading	164
Appendix: The problem of unequal lives: Allis plc	164
Questions	166

Chapter 7

Investment strategy and process	173
7.1 Introduction	174
7.2 Strategic considerations	174

7.3 Advanced manufacturing technology (AMT) investment	178
7.4 Environmental aspects of investment	180
7.5 The capital investment process	181
7.6 Post-auditing	188
Summary	190
Key points	190
Further reading	190
Questions	191

Part III

INVESTMENT RISK AND RETURN

Chapter 8

Analysing investment risk	195
8.1 Introduction	196
8.2 Expected net present value (ENPV): Betterway plc	197
8.3 Attitudes to risk	197
8.4 The many types of risk	198
8.5 Measurement of risk	200
8.6 Risk description techniques	204
8.7 Adjusting the NPV formula for risk	208
8.8 Risk analysis in practice	210
Summary	211
Key points	211
Further reading	212
Appendix: Multi-period cash flows and risk	212
Questions	215

Chapter 9

Relationships between investments: portfolio theory	219
9.1 Introduction	220
9.2 Portfolio analysis: the basic principles	221
9.3 How to measure portfolio risk	223
9.4 Portfolio analysis where risk and return differ	226
9.5 Different degrees of correlation	227
9.6 Worked example: Gerrybild plc	228
9.7 Portfolios with more than two components	231
9.8 Can we use this for project appraisal? Some reservations	233
Summary	234
Key points	234
Further reading	234
Questions	235

Chapter 10**Setting the risk premium: the Capital Asset Pricing Model** 237

10.1 Introduction	238
10.2 Security valuation and discount rates	238
10.3 Concepts of risk and return	239
10.4 The relationship between different equity markets	243
10.5 Systematic risk	244
10.6 Completing the model	249
10.7 Using the CAPM: assessing the required return	250
10.8 The underpinnings of the CAPM	254
10.9 Portfolios with many components: the capital market line	255
10.10 How it all fits together: the key relationships	257
10.11 Reservations about the CAPM	259
10.12 Testing the CAPM	260
10.13 Factor models	261
10.14 The Arbitrage Pricing Theory	262
10.15 Issues raised by the CAPM: some food for managerial thought	263
Summary	266
Key points	266
Further reading	266
Appendix: Analysis of variance	267
Questions	269

Chapter 11**The required rate of return on investment and Shareholder Value Analysis** 271

11.1 Introduction	272
11.2 The required return in all-equity firms: the DGM	272
11.3 The required return in all-equity firms: the CAPM	276
11.4 Using value drivers – Shareholder Value Analysis (SVA)	278
11.5 Worked example: Safa plc	280
11.6 Using 'tailored' discount rates	283
11.7 Another problem: taxation and the CAPM	288
11.8 Problems with 'tailored' discount rates	289
11.9 A critique of divisional hurdle rates	290
Summary	291
Key points	291
Further reading	292
Questions	293

Chapter 12**Identifying and valuing options** 296

12.1 Introduction	297
12.2 Share options	297
12.3 Option pricing	304
12.4 Application of option theory to corporate finance	309
12.5 Capital investment options	311
12.6 Why conventional NPV may not tell the whole story	314
Summary	315
Key points	315
Further reading	316
Appendix: Black–Scholes option pricing formula	316
Questions	318

Part IV**SHORT-TERM FINANCING AND POLICIES****Chapter 13****Treasury management and working capital policy** 323

13.1 Introduction	324
13.2 The treasury function	324
13.3 Funding	326
13.4 How firms can use the yield curve	328
13.5 Banking relationships	329
13.6 Risk management	330
13.7 Working capital management	337
13.8 Predicting corporate failure	339
13.9 Cash operating cycle	340
13.10 Working capital policy	342
13.11 Overtrading problems	346
Summary	348
Key points	348
Further reading and website	348
Questions	349

Chapter 14**Short-term asset management** 353

14.1 Introduction	354
14.2 Managing trade credit	354
14.3 Worked example: Pickles Ltd	361
14.4 Inventory management	362
14.5 Cash management	367
14.6 Worked example: Mangle Ltd	370

14.7 Cash management models	372
Summary	373
Key points	373
Further reading	374
Appendix: Miller–Orr cash management model	374
Questions	376

Chapter 15

Short- and medium-term finance	379
15.1 Introduction	380
15.2 Trade credit	380
15.3 Bank credit facilities	382
15.4 Invoice finance	385
15.5 Using the money market: bill finance	387
15.6 Hire purchase (HP)	389
15.7 Leasing	391
15.8 Lease evaluation: a simple case	393
15.9 Motives for leasing	396
15.10 Allowing for Corporation Tax in lease evaluation	398
15.11 Financing international trade	402
Summary	405
Key points	405
Further reading	406
Questions	407

Part V

STRATEGIC FINANCIAL DECISIONS

Chapter 16

Long-term finance	411
16.1 Introduction	412
16.2 Guiding lights: corporate aims and corporate finance	412
16.3 How companies raise finance in practice	413
16.4 Shareholders' funds	414
16.5 Methods of raising equity finance	417
16.6 Debt instruments: debentures, bonds and notes	432
16.7 Leasing and sale-and-leaseback (SAL)	441
Summary	443
Key points	443
Further reading	443
Questions	444

Chapter 17

Returning value to shareholders: the dividend decision	447
17.1 Introduction	448
17.2 The strategic dimension	449
17.3 The legal dimension	450
17.4 The theory: dividend policy and firm value	450
17.5 Objections to dividend irrelevance	458
17.6 The information content of dividends: dividend smoothing	463
17.7 Alternatives to cash dividends	465
17.8 The dividend puzzle	470
17.9 Conclusions	471
Summary	472
Key points	472
Further reading	473
Appendix: Home-made dividends	473
Questions	475

Chapter 18

Capital structure and the required return	478
18.1 Introduction	479
18.2 Measures of gearing	480
18.3 Operating and financial gearing	484
18.4 Financial gearing and risk: Lindley plc	486
18.5 The 'traditional' view of gearing and the required return	489
18.6 The cost of debt	492
18.7 The overall cost of capital	494
18.8 Worked example: Damstar plc	496
18.9 More on Economic Value Added (EVA)	498
18.10 Financial distress	499
18.11 Two more issues: signalling and agency costs	504
18.12 Conclusions	504
Summary	506
Key points	506
Further reading	506
Appendix: Slipping down the credit ratings	507
Questions	508

Chapter 19

Does capital structure really matter?	512
19.1 Introduction	513
19.2 The Modigliani–Miller message	513
19.3 MM's propositions	515

19.4 Does it work? Impediments to arbitrage	519	21.3 Foreign exchange exposure	598
19.5 MM with corporate income tax	519	21.4 Should firms worry about exchange rate changes?	600
19.6 Capital structure theory and the CAPM	522	21.5 Economic theory and exposure management	601
19.7 Linking the Betas	525	21.6 Exchange rate forecasting	607
19.8 MM with financial distress	526	21.7 Devising a Foreign Exchange Management (FEM) strategy	610
19.9 Calculating the WACC	527	21.8 Internal hedging techniques	614
19.10 The adjusted present value method (APV)	530	21.9 External hedging techniques	617
19.11 Which discount rate should we use?	532	21.10 Conclusions	623
Summary	533	Summary	624
Key points	533	Key points	624
Further reading	534	Further reading	625
Appendix I: Derivation of MM's Proposition II	534	Questions	626
Appendix II: MM's Proposition III: the cut-off rate for new investment	535		
Appendix III: Allowing for personal taxation: Miller's revision	536		
Questions	537		

Chapter 20

Acquisitions and restructuring 541

20.1 Introduction	542
20.2 Takeover waves	542
20.3 Motives for takeover	548
20.4 Financing a bid	552
20.5 Evaluating a bid: the expected gains from takeovers	554
20.6 Worked example: ML plc and CO plc	555
20.7 The importance of strategy	557
20.8 The strategic approach	558
20.9 Post-merger activities	563
20.10 Assessing the impact of mergers	567
20.11 Value gaps	573
20.12 Other forms of value-creating	575
Summary	582
Key points	582
Further reading	582
Questions	584

Chapter 22

Foreign investment decisions 630

22.1 Introduction	631
22.2 Advantages of MNCs over national firms	631
22.3 Foreign market entry strategies	632
22.4 The incremental hypothesis	634
22.5 Complexities of foreign investment	636
22.6 The discount rate for Foreign Direct Investment (FDI)	637
22.7 Evaluating FDI	638
22.8 Exposure to foreign exchange risk	642
22.9 How MNCs manage operating exposure	645
22.10 Hedging the risk of foreign projects	646
22.11 Political and country risk	647
22.12 Managing Political and country risk (PCR)	650
22.13 Financing FDI	651
22.14 The WACC for FDI	653
22.15 Applying the APV to FDI	654
Summary	656
Key points	656
Further reading	656
Questions	658

Part VI

INTERNATIONAL FINANCE

Chapter 21

Managing currency risk 593

21.1 Introduction	594
21.2 The structure of exchange rates: spot and forward rates	596

Chapter 23

Review and behavioural finance 661

23.1 Introduction	662
23.2 Review of main principles in finance	662
23.3 Behavioural finance	665
23.4 The changing finance function – if we had 20/20 vision!	670

Summary	671	B Solutions to selected questions	691
Key points	672	C Present value interest factor (PVIF)	722
Further reading	672	D Present value interest factor for an annuity (PVIFA)	724
Appendices		Glossary	726
A Solutions to self-assessment activities		References	735
	673	Index	743

Supporting resources

Visit www.pearsoned.co.uk/pikeneale to find valuable online resources:

Companion Website for students

- Summary of each chapter to aid revision
- Self-assessment questions to check your understanding
- Annotated links to relevant sites on the Internet
- An online glossary to explain key terms
- Quizzes per chapter to improve information seeking skills.

For instructors

- Complete, downloadable Instructor's Manual including summary of question material and answers to all questions not answered in the book itself
- Extra question and answer material for use in class or for examinations
- Case studies for more in-depth discussion on practical issues
- PowerPoint lecture slides that can be downloaded and used as OHTs.

Also: the Companion Website provides the following features:

- Search tool to help locate specific items of content
- E-mail results and profile tools to send results of quizzes to instructors
- Online help and support to assist with website usage and troubleshooting.

For more information please contact your local Pearson Education sales representative or visit www.pearsoned.co.uk/pikeneale.
