

Table of contents

Table of contents	1
Executive summary	2
Section I – Introduction	3
Background and rationale	3
Development of the recommendations	4
Section II – The problem	4
Health effects of SHS exposure	4
Magnitude of exposure to SHS	6
Economic costs of SHS exposure	7
Section III – The solution	7
Effective protection strategies	7
Effects of smoke-free environments on health and tobacco use	10
Economic impact of smoke-free environments	12
Section IV – Experiences and best practices	13
Smoke-free environments should be mandated by law, not by voluntary policies	14
Legislation should be simple, clear and enforceable, and comprehensive	15
Consider which jurisdictional level(s) will afford the most progress	16
Anticipate the opposition	17
Involve civil society	18
Educate and consult to ensure smooth implementation	18
Develop an implementation and enforcement plan and ensure infrastructure for enforcement	19
Monitor implementation and, ideally, measure impact and document experiences	19
Section V – Recommendations	20
Recommendation 1: 100% smoke-free environments, not ventilation	20
Recommendation 2: Universal protection by law	20
Recommendation 3: Proper implementation and adequate enforcement of the law	20
Recommendation 4: Public education to reduce SHS exposure in the home	21
Section VI – Appendices	22
Section VII – References	40
