Executive summary	vi
1. Estimating the costs of substance abuse: introduction	1
1.1 Introduction	2
1.2 The purposes of economic cost estimates	2
1.3 Organization of this report	3
2. A layperson's guide to economic cost estimation	5
2.1 Introduction	6
2.2 Economic cost studies	6
2.2.1 Economic cost studies: a type of COI study	6
2.2.2 Costs to whom?	7
2.2.3 What constitutes a cost – social vs. private costs	8
2.2.4 Further costs: productivity losses	11
2.2.5 The ultimate cost: placing a value on life itself	11
2.3 Demographic approach vs. the human capital approach	12
2.4 Prevalence vs. incidence based approaches	13
2.5 What economic cost studies are not	13
2.6 Interpretation of substance abuse cost estimates	15
3. Some theoretical issues in the application of the framework	17
3.1 Definition and measurement of abuse	18
3.2 Definition of costs	18
3.3 Treatment and measurement of addictive consumption	19
3.4 Human capital and demographic approaches	20
3.5 Choice of appropriate discount rates	20
3.6 Treatment of private costs and benefits	21
3.7 Treatment and measurement of intangible costs, including willingness-to-pay	21
3.8 Comparing and presenting estimates of the value of human life	22
3.9 The positive economic impact of consumption	23
3.10 Estimation of avoidable costs	24
3.11 Prevalence vs. incidence based estimates	24
3.12 Crime and substance abuse	25
3.13 Who bears the social costs of substance abuse?	27

3.14 The budgetary impact of substance abuse	27
3.15 Special considerations in drug-producing countries	29
4. Towards a common framework: the matrix of costs and issues of measurement	31
4.1 Which substances to study	32
4.2 Major types of costs included in cost estimation studies	33
4.3 Health care and health services	36
4.3.1 Treatment for substance abuse	36
4.3.2 Health treatment for co-morbidity and trauma	37
4.4 Productivity costs	38
4.4.1 Premature mortality	38
4.4.2 Morbidity – lost employment or productivity	39
4.4.3 Treatment of non-workforce mortality and morbidity	40
4.5 Crime and law enforcement costs	42
4.5.1 Criminal justice expenditures	42
4.5.2 Crime victim's time losses	42
4.5.3 Incarceration	43
4.5.4 Crime career costs	43
4.6 Other costs	44
4.6.1 Treatment of research, education and law enforcement costs	44
4.6.2 Prevention and other public health efforts	44
4.6.3 Property destruction for crime or accidents	44
4.6.4 Welfare costs	45
5. Data requirements and special considerations for developing countries	47
5.1 Data requirements for estimating social costs	48
5.2 Closing the data gaps	49
6. Interpretation of cost estimates and the relevance to evaluation of policies and programmes	51
Summary and conclusions	56
Appendix A–Glossary of common terms used on economic cost studies	57
Appendix B– The evaluation of economies with significant drug production industries	65
Appendix C–Comparing the social costs of substance abuse to GDP	71
Appendix D—Application of the guidelines in cost estimation studies	75
