The publication you in your hands presents just some of the successfully implemented projects financed from the European Union funds, in the 2007-2013 programming period, over 43 000 projects were implemented and completed. The European Union funds are here to support regions in their development and growth. The standard of living in any disadvantaged region should grow continuously to achieve a similar if not the same level as in regions across the whole European Union, in the Czech Republic, a selection of interesting and successful projects has been implemented thanks to support from European funds. We have picked four projects out of every region, which have helped to improve the standard of living in the given area. European funds are an investment in the future of the Czech Republic.
