

CONTENTS

| | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| OPENING LECTURE | 11 |
| <i>Gutzeit H.O., Tokalov S.V., Pieck S.:</i> Biological effects of radiation – induced stress on cells and the limits of homeostatic regulation | 12 |
| MEET-THE-EXPERT PROGRAMME | 19 |
| <i>Krajčovič J.:</i> Losses and gains of organelles | 20 |
| <i>Peter R.:</i> A totipotent proliferative compartment: the unique stem cell strategy of flatworms | 31 |
| <i>Druckmüller M.:</i> 3D visualization techniques for confocal microscope images | 41 |
| <i>Martišek D.:</i> Methods of detection of equipotential surfaces in cell structures | 47 |
| <i>Janisch R.:</i> Plasma membrane and its regeneration | 55 |
| <i>Aragno D.:</i> Cellular functions of helicases | 59 |
| <i>Hrkal Z.:</i> Mechanism of apoptosis induced in leukaemic cells by photodynamic treatment | 69 |
| <i>Vancová M. and Nebesářová J.:</i> Observation of biological material in low voltage transmission electron microscope | 75 |
| ABSTRACTS | 79 |
| PLENARY LECTURES | 81 |
| <i>Smetana K., Jirásková I., Čermák J., Hrkal Z.:</i> To the nucleolar participation in the apoptotic process | 82 |
| <i>Paleček J., Dvořáková K., Pěkníková J. and Moore H.D.M.:</i> Dynamics and role of cytoskeletal proteins in mammalian sperm cell | 83 |
| <i>Šíp M.:</i> Recognition of binding sites and targeting of drugs on nucleic acids | 84 |
| MALIGNANT CELLS | 87 |
| Lectures | |
| <i>Husam A. and van Leeuwen J.E.:</i> (Super)agonist induced EGFR ubiquitination and proteasome dependent deubiquitination of the EGFR | 88 |
| <i>Veselská R., Zitterbart K., Auer J.:</i> Caffeic acid affects an induced differentiation process into granulocyte stage in HL-60 myeloid leukaemia cell line | 90 |
| Posters | |
| <i>Uldrijan S., Strnad M. and Vojtěšek B.:</i> Synergistic activation of p53 in cancer cells by antineoplastic drugs and cdk inhibitor roscovitine | 91 |
| <i>Boudný V., Chumchalová J., Kocák I., Kovařík J.:</i> Abnormalities in interferon-induced stat 1 activation in human melanoma cell lines and primary cell cultures derived from melanoma patients | 92 |
| <i>Nenutil R., Češková P., Nylander K., Coates P. J., Vojtěšek B.:</i> The role of p73 α in squamous cell carcinoma development | 94 |
| <i>Navrátilová J., Ševčíková S., Šmarda J.:</i> Roscovitine-stabilized p53 suppresses growth and induces differentiation of v-myb transformed monoblasts | 95 |
| <i>Zápotocký M., Hanzalová J., Krejčí O., Holý A., Votruba I., Trka J., Otová B.:</i> Antitumour effect of 9-[2-(phosphonomethoxy)ethyl]-2,6-diaminopurine (PMEDAP) in vitro and in vivo experiments | 96 |

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <i>Skořepová M., Bláha M., Malý J., Bláha V., Pecka M., Urbanková J, Bla žek M.:</i> Lipoprotein levels and platelet aggregation with familial hypercholesterolemia after LDL-apheresis | 97 |
| <i>Soukupová P., Horák V., Hradecký J., Klauďy J.:</i> Early detected increase of heat shock proteins expression in swine melanoma treated by devitalization | 98 |
| <i>Kolářová H., Mosinger J., Psotová J., Strnad M.:</i> Initiation of cell death in cancer cell lines by photodynamic therapy | 99 |
| <i>Němečková A., Strouhal E., Ševčáková A.:</i> Morphological picture of metastatic carcinoma from end of the 8 th — early 9 th century Slovakia | 101 |
| <i>Eckschlager T., Matoušek J., Činátl J., Činátl J. jr.:</i> Effect of bs RNase on chemo sensitive and chemo resistant neuroblastoma cell lines | 102 |
| <i>Eckschlager T., Čermaková M., Černá D., Křížová H., Činátl J., Činátl J., jr.:</i> P-glycoprotein expression and function in cell lines and childhood tumours | 103 |

CELL DEATH 105

Posters

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <i>Matalová E., Chovāncová E., Míšek I.:</i> The distribution of TUNEL-positive cells during molar tooth development | 106 |
| <i>Kylarová D., Procházková J., Maďarová J., Bartoš J., Lichnovský V.:</i> TUNEL, apostain, lamin b and annexin v methods in flow cytometry and microscopy | 107 |
| <i>Neradil J., Veselská R., Svoboda A.:</i> Changes in the cytoskeleton of P19 cells during apoptosis associated with induced differentiation | 108 |
| <i>Procházková J., Kylarová D., Erdšosová B., Lichnovský V.:</i> Double-staining techniques and the issue of apoptosis | 109 |
| <i>Reisnerová H., Horák V., Hruban V., Málek O., Kohutová Z.:</i> Characterization of pig melanoma cells in vitro | 110 |

CHEMICALLY OR PHYSICALLY INDUCED CHANGES, DRUG EFFECTS 111

Lectures

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------|-----|
| <i>Martinek J., Kučera T., Astl J., Veselý D.:</i> Pulsatile secretion of parathyroid gland in experimental conditions | 112 |
| <i>Kučera T. and Canová N.:</i> Cyclosporine a induces cell injury and modulates nitric oxide production in cultured rat hepatocytes | 113 |

Posters

| | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <i>Žižka Z., Řihová B., Ulbrich K.:</i> Ultrastructural alterations of EL-4 cells brought about by free and site-specific drugs | 114 |
| <i>Buchner E. and Peter R.:</i> Influences of ionizing radiation on regeneration and neoblasts (stem cells) in the planarian <i>Dugesia tahitiensis</i> (Turbellaria: <i>Tricladida paludicola</i>) | 116 |
| <i>Křížková L., Belicová A., Dobias J., Krajčovič J., Ebringer L.:</i> Effect of selenium on antibacterial and antimutagenic activity of the probiotic bacterium <i>Enterococcus faecium</i> M-74 | 117 |
| <i>Belicová A., Křížková L., Dobias J., Ebringer L., Krajčovič J.:</i> Antimutagenicity of probiotic bacterium <i>Enterococcus faecium</i> M-74 is enhanced by selenium in <i>Salmonella typhimurium</i> | 119 |
| <i>Bielecki K., Dziamska A., Sarapuk J.:</i> Physiological activity of some aminophosphonates | 120 |
