

Contents

The Czech electrotechnical industry J. Hybš	14-22
Dynamical systems of class C and their simple state models J. Pospíšil, Z. Kolka, V. Michálek, J. Brzobohatý,	23-55
Technological integration and challenges faced by electronics industry Ivan Szendiuch,	57-65
Smart Power Integrated Circuits in Automotive-Electronics Petr Hrascky,	67-80
System integration for automotive electronics with smart power technologies Petr Hrascky,	81-86
Neural net Laboratory Jiří Santarius, Jana Tučková,	87-92
An integrate-and-fire neuron implementation Pavol Tikovič, Daniela Ďuračková,	93-98
Desing and implementation of a learning synapse for pulse-coupled neural networks M. Vörös, P. Tikovič, D. Ďuračková,	99-104
Sensitivity function and its display L. Matějček, K. Vrba,	105-108
Model of Internet IP fragmenting logic. Purpose function for evaluation of time losses Delian Genkov, Oleg Assenov,	109-116
Network configuration for cellular automata chip Monica Dascalu, Eduard Franti, Dan Colesniuc,	117-120
Wavelets in image processing Hugo Tassignon,	121-135
Modelling and identification of basis weight and moisture in paper machine using grade change data , Smail Menani,	136-137
Current conveyors CCIII and their noise features Ivo Lattenberg	138-141
Current conveyor structure with extra low X terminal input impedance Ivan Koudar,	142-151
Desing of new universal second-order filters using a general four-port current conveyor Kamil Vrba, Dalibor Biolek, Josef Čajka,	152-155
Simulation of intelligent battery charger A. Procházka, Z. Batoň, R. Kuchta, D. Vaverka, R. Vrba, M. Zemánek,	156-163
Production of ADSL modems David Tkoč, Vladislav Musil,	164-167
Testability analysis in synthesis for testability Peter Bukovjan,	168-177
Control system for n DC motors with digital servo-loop Břetislav Mikel, Ondřej Číp,	178-184
PECL input state for the optical data-communication transmitter Zdeněk Bartoň,	185-192
Regulator and driver for low power thermoelectric cooler Zdeněk Barton, Radimír Vrba,	193-198
Optimisation of relief of thin polymer films of resist for phase diffractive optical elements František Matějka, Jiřina Matějková,	199-201

Modifications of the optical parameters of the silicon thin films due to the light scattering P. Sládek, P. Sřahel, J. řřastnř, R. Přikryl,	202-206
Origin of the metastability of phosphorus or boron doped a-Si:H films P. Sřahel, P. Sládek, P. Roca i Cabarrocas, J. řřastnř,	207-212
Near-field photocurrent spectra in DQW-GRIN laser diodes Lubomřr Grmela, Petr řetal, Pavel Tománek,	213-216
Water quality monitoring and control G. Waterworth,	217-221
Impedance measurements of oxidic and acetyl-acetonic layers for gas sensors Martin Vřnata, Vladimřr Myslík, Filip Vysloužil, Zdeňek Rozehnal, Miroslav Jelinek, Rudolf Frřýček, Milan Kovanda,	222-228
The ohmic contacts on the acetylacetonate layers for gas sensors E. Ratajovř, P. Macáč, V. Myslík,	229-232
The influence of annealing methods on Ni/Au/Ge/Ni/a⁺-GaAs contact structure Petr Macháč, Vladimřr Myslík,	233-236
Problems with miniaturization of two-electrode system for conductivity measurements J. Hubálek, V. Kolařík,	237-242
Electronic circuits of impedance detectors for chemical sensors J. Hubálek,	243-250
Temperature characteristics of thick film electrochemical sensors M. Adánek, J. Krejři, I. Szendiuch,	251-254
The statistical bipolar transistor model including base width modulation effect M. Recman,	255-259
Forward beta modelling M. Recman,	260-265
High Voltage PC controlled power source for conductometric sensors Jaroslav Bouřek, Radimřr Vrba, Pavel Zemánek,	266-268
New methods in magnetron sputtering Jaroslav Bouřek, Jaroslav Sobota,	269-272
Silicon pressure sensors Vladislav Musil, Jan Jaroř,	273-284
IEEE P1451 standard for smart sensors and actuators Vladislav Musil, Pavel Karásek	285-288
Integrated circuits for smart battery management Jan Garřic, Vladislav Musil,	289-295
Measuring and monitoring systřm for vehicle with electric traction unit Radimřr Vrba, Zdeňek Bartoň, R. Kuchta, D. Vaverka, A. Procházka	296-300
Monitoring of traction batteries D. Vaverka, R. Vrba, Z. Bartoň, R. Kuchta, A. Procházka, M. Zemánek	301-309
Study of nitride silicon membrane for pressure sensors F. Matějka, J. Matějkovř, R. Vrba	310-315
Turbo codes and implementation K. Vlček	316-322
