|---------|--|----|
| 1 | Introduction | 9 |
| 2 | Literature review | 17 |
| 2.1 | Hearing impairments | 17 |
| 2.1.1 | Relevant and easily confused terms..... | 17 |
| 2.1.2 | The heterogeneity of hearing-impaired children..... | 19 |
| 2.1.3 | The development of children with a hearing impairment..... | 24 |
| 2.1.3.1 | The general characteristics of the cognitive development of hearing-impaired children | 24 |
| 2.1.3.2 | The general features of hearing-impaired children's social development..... | 27 |
| 2.2 | Resilience | 28 |
| 2.2.1 | Individual resilience | 29 |
| 2.2.1.1 | Research on individual resilience within various risky contexts | 30 |
| 2.2.1.2 | Protective factors of resilient individuals..... | 32 |
| 2.2.1.3 | Variation in definitions of resilience: from personal traits to process..... | 35 |
| 2.2.1.4 | The assessment of individual resilience..... | 38 |
| 2.2.2 | Family resilience..... | 43 |
| 2.2.2.1 | The family as a system | 44 |
| 2.2.2.2 | The family as a functional unit..... | 44 |
| 2.2.2.3 | Family resilience research in multiple risky contexts..... | 45 |
| 2.2.2.4 | The protective factors for family resilience..... | 47 |
| 2.2.2.5 | Variation in definitions of family resilience: from competence to process..... | 50 |
| 2.2.2.6 | Assessment of family resilience..... | 52 |
| 2.3 | Convergence of family resilience and hearing impairment research..... | 55 |
| 2.3.1 | Family resilience research in the area of disability | 55 |
| 2.3.1.1 | Impacts of a child's disability on family life..... | 55 |
| 2.3.1.2 | Resilience research on individuals with disabilities and their families..... | 57 |
| 2.3.1.3 | Intervention service: the most important protective factor leading to resilience | 59 |
| 2.3.2 | Hearing impairment and family coping | 61 |
| 2.3.2.1 | The Family as a Factor Influencing the Development of the Personality of a Child | 65 |

| | | |
|---------|---|----|
| 2.3.2.2 | The Special Nature of Demands on Families of Children with Hearing Impairments | 67 |
| 2.3.2.3 | The Family and the Concept of the Child with f Hearing Impairment | 72 |
| 2.3.2.4 | The Aims and Tasks of Psychological Support for Families with a Child with a Hearing Impairment | 76 |
| 2.3.3 | The importance of research on family resilience in families of children with a hearing impairment in China and the Czech Republic | 77 |

3 Research design

| | | |
|---------|---|----|
| 3.1 | The operationalization of relevant terms | 81 |
| 3.2 | Purpose of the research | 82 |
| 3.3 | Research questions | 83 |
| 3.4 | Research hypotheses | 84 |
| 3.5 | Research methodology | 85 |
| 3.6 | Research methods | 88 |
| 3.6.1 | Questionnaire survey | 88 |
| 3.6.1.1 | The steps in developing the questionnaire | 88 |
| 3.6.1.2 | The structure of the questionnaire | 89 |
| 3.6.1.3 | The respondents | 91 |
| 3.6.2 | Semi-structured interviews | 93 |
| 3.6.2.1 | Interview guide | 94 |
| 3.6.2.2 | Respondents | 94 |
| 3.6.2.3 | The administration of the interview process | 95 |
| 3.6.2.4 | The process of analyzing the qualitative data | 95 |

4 Results and discussion

| | | |
|---------|--|-----|
| 4.1 | Results of the questionnaire survey | 97 |
| 4.1.1 | Background information about the participating families and their children | 97 |
| 4.1.2 | Results of closed questions | 103 |
| 4.1.3 | Results of open-ended questions in the questionnaire | 115 |
| 4.2 | Results of qualitative interviews | 129 |
| 4.2.1 | Characteristics of the respondents | 130 |
| 4.2.2 | Results of interviews | 131 |
| 4.2.2.1 | Diagnosis and family reactions to diagnosis | 132 |
| 4.2.2.2 | Childhood hearing impairment as a significant risk for the family | 134 |
| 4.2.2.3 | Rationale for decision making about communication mode, sensory devices, and educational placement | 140 |
| 4.2.2.4 | Families' strategies to cope with a childhood hearing impairment | 143 |

| | |
|--|-----|
| 4.3 Discussion | 148 |
| 4.3.1 Positive adaptation of the family to the child's hearing impairment and influential factors..... | 148 |
| 4.3.2 No significant difference in the overall level of family adaptation but apparent difference in adaptation pattern between the two groups of families..... | 150 |
| 4.3.3 Differences in the impact of the hearing impairment, social support, and social stigma may contribute to the differences in stress levels between the two groups of families | 151 |
| 4.3.4 Protective factors which can contribute to Chinese families' positive adaptation despite a lack of adequate support from the social security system | 154 |
| 4.3.5 Resilient Chinese families used some effective strategies to cope with the childhood hearing impairment in order for their children to have a better future..... | 157 |
| 4.3.6 Implications for intervention services in China..... | 158 |
| 4.3.7 Limitations of the research..... | 161 |
| 5 Conclusion..... | 163 |
