|---|-----|
| Acknowledgements..... | 5 |
| 1. Introduction..... | 6 |
| 2. Methods..... | 8 |
| 3. General characteristics and localization of the Crimean Mountains | 9 |
| 3.1 Physiographic domains | 9 |
| 4. Geodynamic evolution | 14 |
| 5. Rock control..... | 21 |
| 5.1 Rock resistance and its reflection in the topography | 22 |
| 5.2 Rock- related landforms..... | 26 |
| 6. Large-scale geomorphology | 29 |
| 6.1 Geomorphometry | 29 |
| 6.1.1 Elevation and relief | 29 |
| 6.1. 2. Hypsometry | 33 |
| 6.1.3 Slope gradients | 37 |
| 6. 2 Preliminary results of apatite fission-track dating | 41 |
| 6. 3 Palaeosurfaces | 42 |
| 6.3.1 Origin and distribution of palaeosurfaces | 45 |
| 6.3.2 Neotectonic deformation of palaeosurfaces | 49 |
| 6. 4 Model of long-term geomorphic evolution of the Crimean Mountains..... | 52 |
| 7. Deep-seated landslides in the main mountain range | 56 |
| 7. 1 Preconditions of slope instabilities..... | 57 |
| 7. 2 Types and geomorphic effect of deep-seated landslides | 58 |
| 7. 3 Deep-seated landslides and their influence on the consequent mass movements: Foros slope collapse case study..... | 61 |
| 7.3.1 Location..... | 61 |
| 7.3.2 Morphology and structural predisposition | 62 |
| 7.3.3 Dating and estimation of the slope failure evolution | 64 |
| 7.4 Landslide-derived diamictons along the Black Sea coast..... | 70 |
| 7. 5 Proposed model of the slope evolution in the main mountain range | 76 |
| 8. Gigantic low-gradient landslides in the northern periphery of mountains | 77 |
| 8.1 Description of landslides..... | 77 |
| 8. 2 Preparatory factors | 85 |
| 8.3 Structure and chronology of landslides | 88 |
| 8.4 Evolutionary model of gigantic low-gradient landslides | 92 |
| 9. Formation of alluvial plains: some remarks | 95 |
| 9.1 Crimean Mountains in the Last Glacial and Holocene | 95 |
| 9.2 Alluvial deposits in valleys of the northern periphery of the Crimean Mountains | 98 |
| 9.2.1 Case study 1: Formation of the alluvial plain of the Kacha River..... | 99 |
| 9.2.2 Case study 2: Formation of the alluvial plain of the Biyuk Karasu River | 101 |
| 9.3 General trends of floodplain genesis: discussion and concluding remarks | 107 |
| 10. Discussion and Conclusion | 109 |
| 11. References | 111 |
