

*Volcanic Worlds* is the first general review of volcanic activity throughout the Solar System. Written by active research scientists, successive chapters present the evidence for extensive volcanic activity, both in the past and at the present time, on Earth and the planets of the Solar System. As well as describing the state-of-the-art of planetary volcanism, the book also shows how frontline scientists working in this field conduct their research, highlighting the aspects of danger, discovery and insight inherent in this topic.

Comparisons are made between volcanic activity on the Earth and other planets, showing how data from elsewhere in the Solar System can aid our understanding of Earth's past volcanic activity. The book explores the latest results from various missions, including the Mars Global Surveyor and the recently revealed intriguing cryovolcanic features on Jupiter's moons from the Galileo flights.

The book contains the very latest, spectacular images of volcanoes on the Earth and the planets, in both colour and black and white.

<b>Foreword</b> . . . . .	ix
<b>Acknowledgements</b> . . . . .	xi
<b>List of figures</b> . . . . .	xiii
<b>List of tables</b> . . . . .	xxi
<b>List of color plates</b> . . . . .	xxiii
<b>1 Volcanic Worlds: Introduction (Tracy K.P. Gregg and Rosaly M. Lopes)</b>	1
<b>2 Volcanoes on Earth: Our basis for understanding volcanism (Katharine V. Cashman)</b> . . . . .	5
2.1 Introduction . . . . .	6
2.2 Hot spot volcanism . . . . .	9
2.2.1 Volcano morphology . . . . .	10
2.2.2 Fire fountains . . . . .	13
2.2.3 Lava flows. . . . .	15
2.2.4 Lava flow hazards. . . . .	20
2.3 Subduction zone volcanism . . . . .	23
2.3.1 Volcano morphology . . . . .	26
2.3.2 Explosive eruptions . . . . .	30
2.3.3 Silicic lava flows and domes . . . . .	35
2.3.4 Hazards associated with subduction zone volcanism. . . . .	37
2.4 Summary . . . . .	40
2.5 References . . . . .	41
2.6 Bibliography and further reading . . . . .	41
<b>3 Submarine volcanoes: The hidden face of the Earth (Tracy Gregg)</b> . . . . .	43
3.1 Introduction . . . . .	43
3.2 Mid-ocean ridges. . . . .	44

3.3	Data types and collection at mid-ocean ridges . . . . .	46
3.4	Diving in the DSV <i>Alvin</i> . . . . .	49
3.5	Mid-ocean ridge classification . . . . .	50
3.6	Slow-spreading centers: The Mid-Atlantic Ridge . . . . .	52
3.7	Fast-spreading centers: The East Pacific Rise near 10°N . . . . .	54
3.8	Intermediate-spreading centers . . . . .	56
3.9	Hydrothermal Venting at Mid-Ocean Ridges . . . . .	57
3.10	Summary . . . . .	58
3.11	References . . . . .	59
<b>4</b>	<b>Earth's evil twin: The volcanic world of Venus (<i>Ellen Stofan</i>) . . . . .</b>	<b>61</b>
4.1	Types of volcanic features on Venus . . . . .	62
4.2	The volcanic history of Venus . . . . .	72
4.3	Future exploration of Venus . . . . .	75
4.4	References . . . . .	77
<b>5</b>	<b>The face of the Moon: Lunar volcanoes and volcanic deposits (<i>Lisa Gaddis</i>) . . . . .</b>	<b>81</b>
5.1	The moon from Earth: A short history of lunar observation and exploration . . . . .	82
5.2	The face of the Moon . . . . .	86
5.3	Lunar volcanic eruptions . . . . .	91
5.4	A short story about a long time . . . . .	93
5.5	Differences from Earth . . . . .	94
5.6	Return to the Moon . . . . .	95
5.7	References . . . . .	96
<b>6</b>	<b>Volcanoes on Mars: The global view (<i>Susan Sakimoto</i>) . . . . .</b>	<b>97</b>
6.1	Topography from orbit . . . . .	98
6.2	Images from orbit . . . . .	102
6.3	Composition from orbit . . . . .	107
6.4	Discussion . . . . .	107
6.5	References . . . . .	108
<b>7</b>	<b>Volcanoes on Mars: A view from the surface (<i>Joy Crisp</i>) . . . . .</b>	<b>111</b>
7.1	Mars surface materials . . . . .	111
7.2	Working on the Mars Pathfinder mission . . . . .	112
7.3	What did Mars Pathfinder tell us about volcanism on Mars? . . . . .	116
7.4	The Mars Exploration Rovers . . . . .	120
7.5	Conclusions . . . . .	122
7.6	Latest update . . . . .	122
