

Contents

Introduction

- 1 Introduction 1
- 2 Key aspects of decision modelling for economic evaluation 15
- 3 Further developments in decision analytic models for economic evaluation 45
- 4 Making decision models probabilistic 77
- 5 Analysing and presenting simulation output from probabilistic models 121
- 6 Decision-making, uncertainty and the value of information 165
- 7 Efficient research design 201
- 8 Future challenges for cost-effectiveness modelling of health care interventions 225
