V. Adamec: Bayesian Estimation of Time Series Models with Change Points	1
E. Adámek: Equilibrium exchange rate in the Czech Republic ...	7
E. Ardielli: Evaluation of the state of e-government in European Union countries	13
J. Bartoška, P. Kučera, T. Šubrt: Modification of the BCWS by Work Effort	19
J. Bartošová, V. Bína: Mathematical approximation of confusion index	25
M. Bělín: The Kitchen Sink Problem: Monte Carlo study of stochastic frontiers	31
T. Beran, Š. Findová: Cost Transformation in Business Management	37
L. Beránek: Context-Aware Recommendation in E-commerce	43
D. Bílková: L-moments and TL-moments	49
S. Bisová: Impact of German Economic Growth on Czech Tourism Demand	56
A. Borovička: Investment portfolio making under uncertainty by a two-stage decision making procedure	62
M. Branda: DEA-risk models with Value at Risk inputs	68
H. Brožová, J. Rydval, L. Šup, S. Moufida, P. Bednar: Security risk factors: ANP model for risk management decision making	74
R. Bucki, B. Chramcov: Economizing logistic costs of the manufacturing system using mathematical modeling to aid decision-making	80
P. Čekmeová: Factors of Czech market share growth in European Union	86
A. Černá, J. Černý, V. Příbyl: Extended Model of Tourist Routes Optimization	92
M. Černý, O. Sokol: Interval data and sample variance: A study of an efficiently computable case	99
Z. Čičková, I. Brezina, J. Pekár: Routes Design Using Own and Hired Vehicles	105
O. Čížek: Nonlinear model of the Eurozone labor market	109
M. Dlask, J. Kukul, Q. Tran: Revisited Zero-Crossing Method for Hurst Exponent Estimation in Time Series	115

Z. Dlouhá: Determinants of job and skill mismatch in the graduate labour market	121
M. Dlouhý: Long-Term Trends in Efficiency of National Health Systems: An Evaluation by Two-Stage Data Envelopment Analysis.....	127
A. Dobešová, D. Hampel: Predicting Inflation by the Main Inflationary Factors: Performance of TVP-VAR and VAR-NN models.....	133
M. Dorda, D. Teichmann: M/En/1/m queueing system subject to two types of failures.....	139
E. Draženská: On the Crossing Number of Cartesian Products...	145
R. Dudzinska-Baryla: Stock valuation based on prospect theory for continuous distribution	150
J. Dupačová, T. Petráš: A note on effect of errors in input parameters on mean-variance efficient portfolios	156
S. Dvořáková, P. Jiříček: Switching Value of Public Projects.....	161
M. Fendek Prof., Dr., E. Fendeková Prof., Dr.: Monopoly profit maximization model in the conditions of perfect price differentiation at a non-linear price setting.....	167
R. Fiala: Testing Gibrat's law for small and medium-sized manufacturing firms: empirical evidence for the Czech Republic....	172
P. Fiala: Biform games in supply chains.....	177
J. Fischer, H. Lipovská: Burgernomics Revisited: Regional Purchasing Power.....	184
T. Formánek, R. Hušek: The Czech Republic and its neighbors: Analysis of spatial macroeconomic dynamics	190
L. Friebel, N. Kernerová, J. Friebelová: Stochastic analysis of profitability of the pig breeding process	196
M. Gangur: Combined System of Continuous Double Auction and Automatic Market Maker in Prediction Market.....	202
P. Gežík: Scheduling Based on the Critical Path Analysis	208
V. Graf, D. Teichmann, M. Dorda: Technical Equipment Scheduling Problem for Transport processes - Experimental Identification of Binary Linear Programming Benefits	213
S. Hašková: Visualization of Bayesian managerial task solution by means of the tools of classical logic: classical versus adaptive approach.....	219
V. Hedija: Gender Wage Differences in V4 Countries: An Analysis Using Intra-Household Specialization.....	225

M. Hedvičáková, A. Pozdílková: Analysis of Business Accounts in the Czech Republic	231
R. Hendrych: Robustified on-line estimation of the EWMA models: Simulations and applications	237
R. Hlavatý, H. Brožová: Optimization model with nonconvex monotone piecewise linear objective function	243
J. Hofman, L. Lukáš: Generalized EOQ Type Inventory Models with Time Dependent both Demand Rate and Holding Cost Rate	249
M. Holčapek, T. Tichý: Backtesting of value at risk with fuzzy-stochastic variables	255
M. Horniaček, L. Šimková: Strong Markov perfect general equilibrium with innovation	261
R. Horský: The Regularization of the Random Walk	267
J. Hozman, T. Tichý: A discontinuous Galerkin method for pricing of two-asset options	273
R. Hřebík, J. Kukul: Multivarietal Data Whitening of Main Trends in Economic Development	279
Z. Chvátalová, J. Hřebíček: Simulation of Production Derivatives with Maple: A Path to Corporate Performance Sustainability	285
L. Chytilová, J. Hančlová: An Application of input-oriented CCR model and the Malmquist productivity index for Measuring the Development of the Bank Efficiency in the Visegrad	291
J. Jablonský: Efficiency measurement in multi-period production systems	298
H. Jähn: Integration of Soft Factors in the Value-added Process-related Performance Analysis	304
O. Jajkowicz: Determinants of the shadow economy in the EU countries: empirical verification	310
J. Janáček, M. Kvet: Sequential radial approach to handle large p-median problems	315
V. Jandová, J. Talašová: Evaluation of absolute type in the Partial Goals Method	321
M. Kaňka: Geometry of Cobb-Douglas surfaces	327
V. Kaňková: Scenario Generation via L1 Norm	331
S. Kapounek, Z. Kučerová: Bank lending determinants of EU countries: A Bayesian model averaging evidence	337

E. Kasem, O. Trenz, J. Hřebíček, O. Faldik: Mathematical model for sustainability assessment of agriculture farms with biogas plants.....	343
N. Kaspříková: Calculation and evaluation of new AOQL single sampling plans for inspection by variables.....	349
F. Koblasa, M. Vavroušek, F. Manlig: Two-dimensional Bin Packing Problem in batch scheduling.....	354
M. Kobzareva, J. Pelikán: Robust formulation for allocation problem.....	360
J. Kodera, Q. Tran, M. Vošvrda: The estimation of an extended Kaldor model parameters with Mathematica.....	365
M. Koháni: Modeling and handling of uncertain demand in counting zones tariff system.....	371
M. Kopa: Out-of-sample SSD efficiency of mean-CVaR efficient portfolios.....	377
P. Kořátková Stránská, M. Navrátil, J. Heckenbergerová: Automatic Detection of Buying or Selling Signal Using Head and Shoulders Chart Pattern with Neckline.....	383
N. Kouaissah, S. Ortobelli Lozza: On the estimation of the state price density.....	389
P. Kozel, Š. Michalcová: The use of linear programming to solve routing tasks in practice.....	395
I. Krejčí, P. Mazouch: Measuring the Age of Machinery and Equipment in Czech Republic.....	401
L. Křišťoufek, M. Vošvrda: Gold, currencies and market efficiency	407
M. Krzciuk: On the simulation study of the properties of MSE estimators in small area statistics.....	413
M. Kubát, J. Górecki: An experimental comparison of Value at Risk estimates based on elliptical and hierarchical Archimedean copulas.....	419
Z. Kučerová, J. Poměnková: The Activity of the Banking and Shadow Banking Sector vs. Lending Standards in Selected Euro Area Countries: A Wavelet Approach.....	425
E. Kuchina: Empirical Analysis of the Dependence of the Foreign Direct Investments on the chosen Macroeconomic Factors....	431
J. Kukul, Q. Tran: Stock Market Common Movement Investigation via Cross Spectral Analysis.....	437
M. Kuncová, J. Sekničková: Optimization Models Used for the Electricity Supplier Selection.....	443

M. Kvasnička: Choice of optimization routine for multi-agent models: A case of viral video marketing campaign	449
M. Kvet, J. Janáček: Two phase approach for large public service system design	455
