
Contents

Preface

iv

1	Physical geography: a starting point	1
2	The global energy system	10
3	Energy balance of the atmosphere	25
4	Heat and moisture in the atmosphere	47
5	The atmosphere in motion	65
6	Weather-forming systems	87
7	Climates of the world	102
8	Micro and local climates	128
9	Climatic change	147
10	The global water balance	173
11	Precipitation	183
12	Evapotranspiration	201
13	Runoff and storage	215
14	Oceans and their circulation	232
15	Landscape form and process	246
16	The formation of rocks	252
17	Earth-building	266
18	Weathering	289
19	Erosion and deposition	308
20	Hillslopes	321
21	Streams	336

22	Periglacial systems	363
23	Alpine and continental glaciation	398
24	Aeolian systems	417
25	Lacustrine, coastal and marine systems ...	430
26	Ecosystems	451
27	Soil formation	461
28	Development of the vegetation layer	478
29	Biogeochemical cycling	493
30	World ecosystems	507
31	Humans and the ecosystem	529

Appendix I	Psychrometric Tables	548
Appendix II	Köppen-Geiger system of climatic classification	550
Appendix III	Soil classification systems	552

<i>Glossary</i>	557
<i>Further reading</i>	574
<i>Bibliography</i>	580
<i>Index</i>	587
<i>Acknowledgements</i>
