

CONTENTS

INVITED PAPERS

Rule-Induction in Machine Learning: Some Latest Enhancements and Trends	3
<i>Ivan Bruha</i>	
How to Find Reference Views for Image-Based Scene Representations?	21
<i>Václav Hlaváč, Aleš Leonardiš, Tomáš Werner</i>	
Desambiguating Syntactic Constructions from Tagged Corpus	(see APPENDIX)
<i>Karel Pala</i>	
Uncertain Reasoning with Floating Connectives	31
<i>Peter Vojtáš</i>	
Recent Developments in Context-Sensitive Learning: The METAL(.) Family of Metalearners	41
<i>Gerhard Widmer</i>	

RESEARCH PAPERS

Robust Absolute Stability of a Class of Fuzzy Systems: Necessary and Sufficient Algebraic Conditions	59
<i>Vladimir B. Bajic</i>	
Clustering using the Minimum Message Length Criterion and Simulated Annealing	67
<i>Ian Davidson</i>	
On-Line Implementation of a Self-Learning Fuzzy Logic Controller	75
<i>S. H. Ghwanmeh, K. O. Jones, D. Williams</i>	
Towards A Knowledge-Based Simulation Methodology Based on Chronolog (MC)	83
<i>Chuchang Liu, Mehmet A. Orgun</i>	
Creation of Speech Database Components	92
<i>Václav Matoušek, Pavel Mautner, Jana Netrvalová</i>	
Learning with Value Hierarchies in the ESOD framework	102
<i>Vojtěch Svátek</i>	

POSITION PAPERS

Neural Networks as Pattern Recognition Systems	113
<i>Lourdes Calderon</i>	
On the Use of Term Space Knowledge for Directing the Transfer of Probabilities in Probabilistic Information Retrieval	128
<i>Fabio Crestani</i>	

Knowledge Restructuring During Scientific Field Development	136
<i>Tomáš Cahlík, Marcel Jiřina</i>	
Vision Based Vehicle Navigation using Reduced Set of Natural Guidemarks	144
<i>Antonín Schreiber, Václav Jirsík</i>	
Jeffrey's Rule for Belief Functions	152
<i>Anna Slobodová</i>	
 POSTER ABSTRACTS	
Continuous Classes in Rule Induction: Empirical Comparison of Two Approaches	163
<i>Ivan Bruha, Petr Berka</i>	
Hierarchical Causal Domain Model-Based Knowledge Acquisition	165
<i>Janis Grundspenkis</i>	
Visualisation and Debugging of Forward Chaining Systems	167
<i>Marek Hatala</i>	
Use of Machine Learning Algorithms in Distributed Environment DISCIM	169
<i>Jiří Klema</i>	
Fuzzy WAM for Expert Systems	171
<i>Martin Lieskovský</i>	
Using Genetic Algorithms for Problems with Soft Constraints	173
<i>Marián Mach</i>	
Using CLP for Scheduling Slabs into Push Furnaces	175
<i>Ján Paralič</i>	
A Noisy-Tolerant Algorithm for Learning from Human Skills	177
<i>Jiřina Pavlíčková</i>	
Deductive Database Implementation Using RDBMS	179
<i>Karel Ježek, Vladimír Toncar</i>	
Assignment Feedforward Architecture of the Neural Network	181
<i>Eva Volná</i>	
APPENDIX	185
