CONTENTS

FOREWORD 5

CONTENTS 7

I) INTRODUCTION 9

I.1. INDUSTRIAL BUILDINGS AND BRIDGES AS CULTURAL HERITAGE 9
I.2. MOTIVATION FOR APPLYING PROBABILISTIC METHODS 13
I.3. SCOPE OF PUBLICATION 14

II) PRINCIPLES OF RELIABILITY ASSESSMENT 16

II.1. GENERAL ASPECTS 16
II.2. BASIC PRINCIPLES 17
II.2.1. Specification of models for basic variables *17*
II.2.2. Residual working life *18*
II.2.3. Limit states *18*

III) BASIC VARIABLES 22

III.1. INTRODUCTION 22
III.2. PROBABILISTIC MODELS FOR ACTIONS 24
III.2.1. Permanent loads *24*
III.2.2. Imposed load *24*
III.2.3. Climatic actions *27*
III.3. PROBABILISTIC MODELS FOR RESISTANCE PARAMETERS 28
III.3.1. Resistance properties *28*
III.3.2. Geometric data *29*
III.4. MODEL UNCERTAINTIES 29

IV) PROBABILISTIC RELIABILITY ANALYSIS 32

IV.1. DEFINITION OF THE PROBLEM 32
IV.2. PRINCIPLES OF UPDATING 32
IV.3. UPDATING OF DISTRIBUTIONS 34
IV.3.1. Basis of Bayesian updating *34*
IV.3.2. Procedure in accordance with ISO 12491 ..... *35*
IV.4. UPDATING OF FAILURE PROBABILITY 37

V) TARGET RELIABILITY 39

V.1. MOTIVATION 39
V.2. TARGET RELIABILITY LEVELS IN CODES 39
V.3. INFLUENCE OF REFERENCE PERIOD 42
V.4. COST OPTIMISATION 43
V.4.1. Basic principles *43*
V.4.2. Derivation of target reliabilities *46*
V.5. REQUIREMENTS ON HUMAN SAFETY 47
V.5.1. Individual risk criterion *47*
V.5.2. Societal risk criterion *48*
V.5.3. Life Quality Index *50*
V.6. CONSIDERATION OF HERITAGE VALUE 51
V.7. DISCUSSION 54
V.7.1. Difficulties in establishing target levels *54*
V.7.2. Practical implications for member and system design *54*

VI) OPERATIONAL VERIFICATION BY A SEMI-PROBABILISTIC METHOD 56

VI.1. INTRODUCTION 56
VI.2. MATERIAL FACTOR 57

VI.2.1. Uncertainty factor for resistance models ... 57
VI.2.2. Factor for variability of material property ... 59
VI.3. FACTOR FOR LOAD EFFECT OF PERMANENT ACTION ... 60
VI.3.1. Uncertainty factor for load effect models ... 60
VI.3.2. Factor for permanent action ... 60
VI.4. FACTOR FOR LOAD EFFECT OF VARIABLE ACTION ... 62
VI.5. EXAMPLE ... 66

VII) CASE STUDIES ... 71

VII.1. STEEL STRUCTURE ... 71
VII.1.1. Introduction ... 71
VII.1.2. Updating of steel strength ... 72
VII.1.3. Updating of failure probability ... 74
VII.2. CAST IRON STRUCTURE ... 75
VII.2.1. Introduction ... 75
VII.2.2. In-situ inspection and measurements ... 76
VII.2.3. Verification of columns ... 78
VII.3. TARGET RELIABILITY ... 80
VII.3.1. Probabilistic reliability analysis ... 80
VII.3.2. Cost optimisation ... 80
VII.3.3. Human safety criteria and LQI ... 85
VII.3.4. Comparison of target reliabilities ... 88

VIII) CONCLUDING REMARKS ... 90

IX) ANNEX – LOAD COMBINATIONS ... 92

IX.1. MODELS FOR LOAD COMBINATION ... 92
IX.1.1. Turkstra's rule ... 93
IX.1.2. Ferry Borges-Castanheta models ... 94
IX.1.3. Rectangular wave renewal processes with intermittencies ... 94
IX.1.4. Comparison of the selected approaches ... 96
IX.2. INTEGRATION WITH RESPECT TO TIME UNDER NON-STATIONARY CONDITIONS ... 97
IX.2.1. Upper bound on failure probability using the Laplace transform ... 98
IX.2.2. PHI2 method ... 99
IX.2.3. Comparison of the selected approaches ... 100
