

CONTENT

CHAPTER 1	7
General introduction	7
1.1. Motility of fish spermatozoa: from external signaling to flagella response	9
1.2. The main objects chosen for the investigation in the present study	20
1.3. The goals of the thesis	24
CHAPTER 2	31
Enzyme activity in energy supply of spermatozoon motility in two taxonomically distant fish species (sterlet <i>Acipenser ruthenus</i> , Acipenseriformes and common carp <i>Cyprinus carpio</i> , Cypriniformes)	
CHAPTER 3	47
Sturgeon sperm maturation: involvement of proteolysis regulators	
3.1. <i>In vitro</i> sperm maturation in sterlet, <i>Acipenser ruthenus</i>	49
3.2. Motility and fertilization ability of sterlet <i>Acipenser ruthenus</i> testicular sperm after cryopreservation	53
3.3. Proteolytic and anti-proteolytic activity during sterlet spermatozoon maturation	56
CHAPTER 4	69
Prooxidant-antioxidant status regulation in spermatozoon maturation and motility activation	
4.1. The antioxidant system of sterlet seminal fluid in testes and Wolffian ducts	71
4.2. The antioxidant system of seminal fluid during <i>in vitro</i> storage of sterlet <i>Acipenser ruthenus</i> sperm	80
4.3. Oxidative stress and motility in tench <i>Tinca tinca</i> spermatozoa	88
CHAPTER 5	95
General discussion	97
English summary	104
Czech summary	106
Acknowledgements	108
List of publications	109
Training and supervision plan during study	112
<i>Curriculum vitae</i>	114
