

CONTENS

| | |
|--|----|
| Effects of temperature on the <i>in vivo</i> and <i>in vitro</i> multiplication of <i>Trypanosoma danilewskyi</i> Laveran and Mesnil A. K. M. N. ISLAM, P. T. K. WOO | 1 |
| The life cycle of <i>Eimeria danailovi</i> from ducks Z. PECKA | 13 |
| Fine structure of spermatogenesis in monopisthocotylean monogeneans (<i>Macroglyrodactylus polypteri</i> ; <i>Pseudodactylogyrus bini</i>) G. SCHMAHL, M. ELWASILA | 19 |
| <i>Mexiconema cichlasomae</i> gen. et sp. n. (Nematoda: Daniconematidae) from <i>Cichlasoma</i> spp. (Pisces) from Mexico F. MORAVEC, V. VIDAL, G. SALGADO MALDONADO | 33 |
| Morphology of the uterus of <i>Ascaris lumbricoides</i> in the region where fertilization and formation of egg-shell occur H. LÝSEK, J. ONDRUŠ | 41 |
| <i>Brugia malayi</i> in <i>Mastomys natalensis</i> : Efficacy of mebendazole in combination with Freund's complete adjuvant P. K. MURTHY, K. TYAGI, R. K. CHATTERJEE | 51 |
| On the mechanism of penetration of ovicidal fungi through egg-shells of parasitic nematodes. Decomposition of chitinous and ascaroside layers J. KUNERT | 61 |
| <i>Ewingana (Doreyana) baekelandae</i> , sp. n., a parasite of molossid bats in Spain (Acari: Myobiidae) A. ESTRADA-PEÑA, J. DE LA CRUZ | 67 |
| Probability description of regulation on the level of population and individual in the host-parasite system using <i>Oestrus ovis</i> (Diptera: Oestridae) as an example A. G. BART, J. MINÁŘ | 75 |
| Probability models of the rate of infection with tick-borne encephalitis virus in <i>Ixodes persulcatus</i> ticks E. I. KORENBERG, M. HORÁKOVÁ, J. V. KOVALEVSKY, Z. HUBÁLEK, A. S. KARAVANOV | 85 |
