

CONTENTS

Letter of Editor	81
Programme of Workshop	82
The epidemiology of cryptosporidiosis: application of experimental sub-typing and antibody detection systems to the investigation of water-borne outbreaks J. McLauchlin, D.P. Casemore, S. Moran, S. Patel	83- 92
New species of <i>Cryptosporidium</i> (Apicomplexa: Cryptosporidiidae) from lizards B. Koudela, D. Modrý	93-100
<i>Cryptosporidium parvum</i> infestation in experimentally infected mice: infection dynamics and effect of immunosuppression R. Tarazona, D.A. Blewett, M.D. Carmona	101-107
The serological surveillance of several groups of patients using antigens of <i>Encephalitozoon hellem</i> and <i>E. cuniculi</i> antibodies to microsporidia in patients Z. Kučerová - Pospíšilová, O. Ditrich	108-112
Viability of <i>Cryptosporidium parvum</i> oocysts in natural waters P. Brasseur, C. Uguen, A. Moreno-Sabater, L. Favennec, J.J. Ballet	113-116
Characterization and function of the microsporidian polar tube: a review E.M. Keohane, L.M. Weiss	117-127
Book review J. Lom	128
Screening of compounds for antimicrosporidial activity <i>in vitro</i> E.S. Didier, J.A. Maddry, C.D. Kwong, L.C. Green, K.F. Snowden, J.A. Shadduk	129-139
Polymerase chain reaction for diagnosis and species differentiation of microsporidia C. Franzen, A. Müller, P. Hartmann, P. Hegener, V. Diehl, B. Salzberger, G. Fätkenheuer	140-148
Intestinal microsporidiosis in African skink <i>Mabuya perrotetii</i> B. Koudela, E.S. Didier, L.B. Rogers, D. Modrý, Š. Kučerová	149-155
A <i>Trachipleistophora</i> -like microsporidium of man: its dimorphic nature and relationship to <i>Thelohania apodemi</i> J. Vávra, A.T. Yachnis, E.U. Canning, A. Curry, J.A. Shadduk, J.M. Orenstein	157-162
Prevalence of cryptosporidiosis in AIDS patients with diarrhoea in Santa Maria Hospital, Lisbon O. Matos, A. Tomás, P. Aguiar, D. Casemore, F. Antunes	163-166
Coccidia of genus <i>Caryospora</i> (Apicomplexa: Eimeriidae) from the long nosed vine snake, <i>Ahaetulla nasuta</i> (Serpentes: Colubridae: Boiginae) from southern India, with a description of <i>C. veselyi</i> sp. n. D. Modrý, B. Koudela	167-169
Notes	
Clinical features of diarrhoea in children caused by <i>Cryptosporidium parvum</i> V. Chmelfk, O. Ditrich, R. Trnovcová, J. Gutvirth	170-172
The role of wild rodents in ecology of cryptosporidiosis in Poland E. Siński, M. Bednarska, A. Bajer	173-174
Attempts to transmit <i>Cryptosporidium baileyi</i> , <i>C. muris</i> and <i>C. parvum</i> to aquatic lower vertebrates L. Békési, T. Sréter, M. Dobos-Kovács, I. Varga	175-176
Announcement.....	156
