## CONTENTS

## ENVIRONMENTAL HEALTH CRITERIA FOR FENITROTHION

1.	SUMMARY AND EVALUATION, CONCLUSIONS AND						
	REG	COMMENDATIONS	11				
	1.1	Summary and evaluation	11				
		1.1.1 Exposure	11				
		1.1.2 Uptake, metabolism, and excretion	11				
		1.1.3 Effects on organisms in the environment	12				
		1.1.4 Effects on experimental animals and					
		in vitro test systems	13				
		1.1.5 Effects on human beings	14				
	1.2	Conclusions	15				
	1.3	3 Recommendations					
2.	IDE	NTITY, PHYSICAL AND CHEMICAL					
	PRO	OPERTIES, ANALYTICAL METHODS	17				
	2.1	Identity	17				
	2.2	Physical and chemical properties					
	2.3	3 Conversion factors					
	2.4	4 Analytical methods					
3.	SOURCES OF HUMAN AND ENVIRONMENTAL						
	EX	POSURE	27				
	3.1	1 Natural occurrence					
	3.2	2 Man-made sources					
		3.2.1 Production	27				
		3.2.2 Uses	27				
4.	ENVIRONMENTAL TRANSPORT, DISTRIBUTION,						
	AN	D TRANSFORMATION	28				
	4.1	Transport and distribution between media	28				
	4.2	Abiotic and biotic transformation					
		4.2.1 Abiotic transformation	29				
		4.2.1.1 Thermal degradation	29				
		4.2.1.2 Photolysis in air	31				
		4.2.1.3 Hydrolysis and photolysis					
		in water	31				

		4	.2.1.4	Photolysis on soil	35					
		4.2.2 E	liotransf	formation	36					
		4	.2.2.1	Biodegradation in soil	36					
		4	.2.2.2	Biodegradation and bioaccumulation						
				in organisms	39					
		4	.2.2.3	Abiotic and biological						
				degradation in/on plants	50					
5.	ENVIRONMENTAL LEVELS AND HUMAN									
	EX	EXPOSURE 5								
	5.1	Environr	vironmental levels							
		5.1.1 A	ir		56					
		5.1.2 W	later		57					
		5.1.3 S	oil		59					
		5.1.4 F	ood		60					
	5.2	Human e	xposure	9	62					
		5.2.1 F	ood		62					
6.	KINETICS AND METABOLISM									
	6.1	Absorption, distribution, metabolic								
		transform	nation,	elimination, and excretion	63					
	6.2	Retention	n and tu	irnover	67					
7.	EFI	EFFECTS ON EXPERIMENTAL ANIMALS AND								
	IN	VITRO TI	EST SYS	STEMS	69					
	7.1	Single ex	posure		69					
	7.2	Skin and	eye irri	itation; skin sensitization	72					
		7.2.1 SI	kin and	eye irritation	72					
		7.2.2 SI	kin sens	sitization	72					
	7.3	Short-ter	m studi	es	73					
		7.3.1 R	at		73					
		7.3.2 D	og		77					
		7.3.3 R	abbit		78					
		7.3.4 G	uinea-p	Dig	78					
	7.4	Long-ter	m and c	carinogenicity studies	79					
	1.5	tects, embryotoxicity, and								
		teratogen	icity		81					
		7.5.1 R	eproduc	ctive effects	81					
	76	1.3.2 E	mbryot	oxicity and teratogenicity	82					
	7.0	Neurotevicity 82								
	7.0	Effecto	n honot	in annuman	84					
	1.0	Effects 0	n nepat	ic enzymes	91					

7.11 Pactors model ying toxicity 94   7.12 Mechanism of toxicity - mode of action 95   7.12.1 Mode of action 95   7.12.2 Selective toxicity 95   7.12.3 Potentiation of toxicity of other chemicals 96   8. EFFECTS ON MAN 98   8.1 General population exposure 98   8.1.1 Acute toxicity 98   8.1.2 Poisoning incidents 98   8.1.3 Contact dermatitis 99   8.1.4 Possible links with Reye's syndrome 100   8.2 Occupational exposure 100   9.
